

Abstract

Praise be to Allah , Lord of the Worlds, and may blessings and peace be upon our Prophet Mohammed and all his family and companions.

And after:

This thesis, entitled (Demands of the People of Relatives in Explanation of Abu Harbah's Supplication), aims as a study and investigation to briefly introduce Imam Abu Harbah and his scholarly status, and Imam Hussein bin Abdul Rahman al-Ahdal and his scholarly status and his book entitled (Demands of the People of Relatives in Explanation of Abu Harbah's Supplication), which is considered an explanation. For one of the supplications to conclude the Holy Qur'an. The thesis also aimed to verify the text and this manuscript and serve it as an academic scientific service under the chapter (the infallibility of the angels, peace be upon them, until the end of the manuscript).

The researcher reached a set of results, the most important of which are: the status of the two Imams Abu Harbah and Al-Hussein bin Abdul Rahman Al-Ahdal, and their scientific efforts in editing and classification in my beloved country, Yemen, and that the science of belief has a great place among the sciences of Sharia, and as for the issues of the manuscript, the Imam's saying clearly appeared. Al-Hussein bin Abd al-Rahman al-Ahdal affirmed the infallibility of the angels and their purity from shortcomings, as well as the prophets of God Almighty and His Messenger, and that the correct worldly knowledge is what the evidence is based on from the Qur'an and the authentic Sunnah, that the Sharia is complete, that dignity does not attest to its possessor's absolute guardianship, and that it is not valid to compare between people unless With a legitimate understanding, and that the origin of the sciences is the Qur'an and the Sunnah in text and understanding, as was shown through the manuscript proving the throne and the bearer of the Throne and its greatness, without conditioning or representation, and that innovation in religion is one of the reasons for expulsion and distancing oneself from the honorable act of drinking from the established basin, and that one must stop using possible expressions. In beliefs in order to elaborate on them, Imam Al-Ahdal also took care of responding to some Sufi terms and concepts that contradict the correct approach. The researcher arrived at a set of recommendations and proposals, the most important of which are: paying attention to the books of Imam Al-Ahdal and his approach to some issues of belief and paying attention to the heritage of Yemeni scholars in particular.
