

قائمة الاسئلة

علم الأوبئة والمجتمع - المستوى الأول - قسم التقويم وطب أسنان الأطفال والطب الوقائي - - كلية طب وجراحة الفم والاسنان ...- درجة الامتحان (60)

أ.د/عبدالقادر زبارة

- 1) CPP-ACP product which is called tooth mousse is available as
 - 1) - Chewing gum
 - 2) - Tablets
 - 3) + Tooth paste
 - 4) - Mouth wash
- 2) The colorless type of fluoride varnish is called
 - 1) - Duraphat
 - 2) + Fluor protector
 - 3) - Varnish America
 - 4) - Durashield
- 3) Fluoride varnish is containing a percent of sodium about
 - 1) - 1%
 - 2) - 2%
 - 3) + 5%
 - 4) - none
- 4) the following caries detector dye is used for enamel
 - 1) - acid red system
 - 2) - acid blue system
 - 3) + zygol
 - 4) - amino acridine
- 5) the most common type of fissures affected by caries is
 - 1) - v type
 - 2) + I type
 - 3) - U type
 - 4) - Y type
- 6) the following are advantages of PRR except
 - 1) - conservative procedure
 - 2) - less discomfort for patient
 - 3) - easily added or replaced
 - 4) + take short time procedure
- 7) Caries diagnosis method that need intra-oral camera and computer is called
 - 1) + Fiber-optic transillumination
 - 2) - DIAGNO-dent
 - 3) - Infra-red thermograph
 - 4) - Electric caries detector
- 8) The following is measure the thermal energy when fluid is lost from a lesion by evaporation
 - 1) - Fiber-optic transillumination
 - 2) - DIAGNO-dent
 - 3) + Infra-red thermograph
 - 4) - Electric caries detector
- 9) During PRR technique, we make acid etching
 - 1) - One time
 - 2) + Two times
 - 3) - Three times
 - 4) - none

- 10) Bad oral habits due to missing permanent incisors is
- 1) - Anatomical factors
 - 2) Mechanical factors
 - 3) - Pathological factors
 - 4) - Imitation factors
- 11) The following theory suggested that prolonged sucking may cause thumb sucking
- 1) Oral drive theory of sears and wise
 - 2) - Freudian theory
 - 3) - Benjamin theory
 - 4) - Learning theory
- 12) A versatile modified quad helix appliance is called
- 1) Modified blue glass appliance
 - 2) - Palatal crib
 - 3) - Palatal rakes
 - 4) - Hey rakes
- 13) Tongue thrust due to macroglossia is called
- 1) - Physiological
 - 2) - Habitual
 - 3) - Functional
 - 4) Anatomical
- 14) Nasal polyps may cause
- 1) - Habitual mouth breathing
 - 2) obstructive mouth breathing
 - 3) - anatomic mouth breathing
 - 4) - none
- 15) the following are risk factors for bruxism except
- 1) - age
 - 2) sex
 - 3) - emotion
 - 4) - genetics
- 16) WHO define the public health as the art and science of
- 1) - Preventive disease
 - 2) - Prolonging life
 - 3) - Promoting health care
 - 4) All
- 17) Any action taken prior to the disease onset is called
- 1) 1ry prevention
 - 2) - 2ry prevention
 - 3) - 3ry prevention
 - 4) - none
- 18) Disability limitation is considered as
- 1) - 1ry prevention
 - 2) - 2ry prevention
 - 3) 3ry prevention
 - 4) - none
- 19) Simple restoration is considered as
- 1) - Health promotion
 - 2) - Specific protection
 - 3) Early diagnosis and treatment

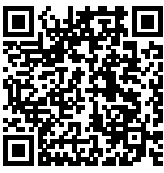

- 4) - none
- 20) Epilepsy may be due to the following causes except
- 1) - Idiopathic
 - 2) - Trauma
 - 3) - Infection
 - 4) Genetics
- 21) Brain atrophy due to nutritional deficiency is related to
- 1) - B2
 - 2) - B6
 - 3) B12
 - 4) - All
- 22) The following handicapped patient is contraindicated to wear any removable appliance
- 1) - Visual impairment
 - 2) - Hearing impairment
 - 3) Epilepsy
 - 4) - All
- 23) The following malignancy is very rare and affecting maxillary teeth more than mandibular teeth
- 1) Melanoma
 - 2) - Lymphoma
 - 3) - Basal cell carcinoma
 - 4) - Verrucous carcinoma
- 24) The most common method used in diagnosis of oral cancer is
- 1) - C T
 - 2) - M R I
 - 3) Biopsy
 - 4) - Panoramic x ray
- 25) If patient present with a lump on vermilion border of the lip, it may be
- 1) - Oral submucosa fibrosis
 - 2) Actinic keratosis
 - 3) - Oral candidiasis
 - 4) - Oral lichen planus
- 26) In TNM staging, T3 means that
- 1) - Cancer 2cm or less
 - 2) - Cancer 2-4 cm
 - 3) Cancer 4-6 cm
 - 4) - none
- 27) The following infectious diseases are bacterial in origin except
- 1) - Syphilis
 - 2) - Tuberculosis
 - 3) Mumps
 - 4) - Tetanus
- 28) The following diseases have vaccinations except
- 1) - Hepatitis B
 - 2) Hepatitis C
 - 3) - Rubella
 - 4) - Mumps
- 29) To get supplies out of cabinet, we use
- 1) - Examination gloves
 - 2) Over gloves

- 3) - Puncture-resistant utility gloves
4) - Surgical gloves
- 30) Amalgam condenser is considered as
1) Semi-critical tool
2) - Critical tool
3) - Non-critical tool
4) - none
- 31) The second stage of sterilization is
1) - Transportation
2) - Preparation and packaging
3) Cleaning and decontamination
4) - Storage
- 32) The following are physical agents of sterilization except
1) - Dry heat
2) - Radiation
3) - Sunlight
4) Ethylene oxide
- 33) The time required in dry heat sterilization is
1) - 20-30 min
2) - 30-40 min
3) - 40-50 min
4) none
- 34) Glutaraldehyde with phenol is considered as
1) High level disinfection
2) - Intermediate level disinfection
3) - Low level disinfection
4) - none
- 35) The following food help to reduce plaque build up
1) Sesame seeds
2) - Pears
3) - Celery
4) - Cheese
- 36) Good oral hygiene is important for
1) - Cost saving
2) - Educational success
3) - Improved self-esteem
4) All
- 37) Motivation people is considered as
1) - Cognitive objective of health education
2) affective objective of health education
3) - behavioral objective of health education
4) - none
- 38) the receiver of the health message is called
1) - communicator
2) audience
3) - message
4) - communication channel
- 39) the following are indications of using electric tooth brush except
1) - aged person

- 2) - arthritic patient
 - 3) - mentally retarded patient
 - 4) + cardiac patient
- 40) for more cleaning effect interproximal, we prefer
- 1) - waxed dental floss
 - 2) + un-waxed dental floss
 - 3) - both waxed dental floss and un-waxed dental floss
 - 4) - none
