التعويضات المتحركة الجزئية 2 - الثاني - فني الاسنان - كلية طب الاسنان - درجة الامتحان (25)

د / نهله الجحدري

- 1) In the insertion step, tissue undercuts which blocked with....., can cause interferences
 - 1) ☒ wax
 - 2) ☐ plaster
 - 3) ☐ all
 - 4) ☐ none
- 2) In the isertion step. We should ensure that remaining upper and lower natural teethocclude
 - 1) ☐ partially
 - 2) ☒ completely
 - 3) ☐ all
 - 4) ☐ none
- 3) If we have upper and lower dentures in the same patient, we do insertion.....
 - 1) ☒ upper alone then lower alone, finally two together
 - 2) ☐ two together from the beginning
 - 3) ☐ all
 - 4) ☐ none
- 4) We check the occlusion in the insertion step with
 - 1) ☐ pressure indicating paste(PIP)
 - 2) ☒ articulating paper
 - 3) ☐ WAX
 - 4) ☐ none
- 5) We equilibrate occlusion in the insertion step until.....
 - 1) ☐ all natural teeth contac in their normal occlusion
 - 2) ☐ all artificial teeth contact
 - 3) ☒ all
 - 4) ☐ none
- 6) No need for technician to deliver the denture to the dentist with the cast
 - 1) ☐ TRUE.
 - 2) ☒ FALSE.
- 7) If the fitting surface of the denture causing pain to the patient(pressure areas),we do.....
 - 1) ☐ remove the pressure area directly as the patient mentioned
 - 2) ☒ be sure of the area first by PIP, then remove it
 - 3) ☐ all
 - 4) ☐ none
- 8) The clasp may cause interfere in the insertion, and may we need to remove it to do the insertion because of.....
 - 1) ☐ we did the clasp without blockage of the undercut
 - 2) ☐ we did block the undercut but with wax
 - 3) ☒ all
 - 4) ☐ none
- 9) If we loose adaptation of the denture we do
 - 1) ☐ rebasing
 - 2) ☒ relining
 - 3) ☐ repair
 - 4) ☐ none
- 10) We do relining in the lab with

- 1) - cold cure acrylic
 - 2) ☒ heat cure acrylic
 - 3) - all
 - 4) - none
- 11) After relining, rebasing and repair ,we need to do
- 1) ☒ minor occlusal adjustments
 - 2) - major occlusal adjustments
 - 3) - all
 - 4) - none
- 12) Indication of rebasing include
- 1) - Under extension of denture flange
 - 2) - Fracture of denture base
 - 3) - Staining or discolouration of denture base
 - 4) ☒ all
- 13) The broken segments of the partial denture are dovetailed along the fracture line to provide
- 1) ☒ retention for the new resin
 - 2) - aesthetic to the new resin
 - 3) - smoothness to the new resin
 - 4) - None of the above
- 14) In repair before reassembling the pieces of denture and held them in position with sticky wax, The Cast is painted with
- 1) - acrylic
 - 2) ☒ separating medium
 - 3) - wax
 - 4) - all
- 15) In repairing procedures we use
- 1) ☒ cold cure acrylic powder with heat monomer
 - 2) - heat cure acrylic powder with cold monomer
 - 3) - cold cure acrylic powder and monomer
 - 4) - heat cure acrylic powder and monomer
- 16) We mainly need an accurate opposing cast and a jaw relation record in the replacement of
- 1) - anterior denture teeth
 - 2) ☒ posterior denture teeth
 - 3) - all
 - 4) - none
- 17) We can avoid clasp fracture by locating clasp arms only where an acceptable of retention
- 1) ☒ minimum
 - 2) - maximum
 - 3) - all
 - 4) - none
- 18) In clasp repair, we take the impression with
- 1) - the denture it self only
 - 2) ☒ astock tray with alginate over the denture
 - 3) - no need for an impression
 - 4) - none
- 19) it used as an intermediate therapy until the permanent prosthesis is fabricated
- 1) - Treatment acrylic partial denture
 - 2) - Transitional partial denture
 - 3) ☒ interim partial denture

- 4) - none
- 20) used as a splint following oral surgical procedures
- 1) ☒ Treatment acrylic partial denture
 - 2) - Transitional partial denture
 - 3) - interim partial denture
 - 4) - none
- 21) The spoon denture is a tissue supported denture ,we don't use clasps
- 1) ☒ TRUE.
 - 2) - FALSE.
- 22) Indicated for class 3 with many modifications and with not good abutment
- 1) - Spoon denture
 - 2) ☒ Every's denture
 - 3) - immediate denture
 - 4) - none
- 23) We insert this denture exactly after teeth extraction
- 1) - Spoon denture
 - 2) - Every's denture
 - 3) ☒ immediate denture
 - 4) - none
- 24) We can do an adapted base without any teeth replacement to act as a vehicle to carry tissue treatment material
- 1) ☒ TRUE.
 - 2) - FALSE.
- 25) Contraindications of relining include
- 1) - Dentures with major speech problem
 - 2) - Presence of severe osseous undercuts
 - 3) - Presence of abused soft tissues
 - 4) ☒ all
