تعويضات الوجه والفكين-الرابع-تكنولوجيا صناعة الاسنان -كلية طب الاسنان-درجة الامتحان(20)

ا.م.د. تغريد احمد الكبسي

- 1) All include the objectives of Maxillofacial prosthesis except :
 - 1) - a. help in healing
 - 2) - b.function
 - 3) + c. anesthesia
- 2) 2/ All include the advantages of splint except:
 - 1) - a. inexpensive
 - 2) + b. irreversible procedure
 - 3) - c. uninvasive
- 3) 3/ All include the removalble dentulous splint except:
 - 1) - a. cast metal splint
 - 2) + b. metal cap splint
 - 3) - c. occlusion splint
- 4) 4/ the edentulous spint is :
 - 1) + a. gunning splint
 - 2) - b. fenestrated splint
 - 3) - c. longsley splint
- 5) 5/ which splint that used in parasymphyseal fracture of mandible:
 - 1) + a. lingual splint
 - 2) - b. labio-lingual splint
 - 3) - c. palatal splint
- 6) 6/ indications of labiolingual splint :
 - 1) - a. dentulous patient
 - 2) - b. mixed dentition patient
 - 3) - c. edentulos patient
 - 4) + a. dentulous patient + b. mixed dentition patient
- 7) 7/ choose the splint that can be used when there is deciduous teeth or when the clinical crown are not available. :
 - 1) + a. fenestrated splint
 - 2) - b. lingual splint
 - 3) - c. palatally splint
- 8) the centric relation splint word referral to :
 - 1) + a. stabilization splint
 - 2) - b. anterior reposition splint
 - 3) - c. posterior reposition splint
- 9) 9/ All consider the side effect of anterior repositioning splint except:
 - 1) - a. creation posterior open bite
 - 2) - b. creation lateral open bite
 - 3) + c. creation anterior open bite
- 10) 10/ the stabilization occlusion splint aim to do :
 - 1) + a. permissive work
 - 2) - b. directive work
 - 3) - c. both above
- 11) 11/ All not indicated to mechanisms of anterior repositioning splint except:
 - 1) + a. directive
 - 2) - b. permissive

- 3) - c. aesthetic
- 12) 12/ the joint stabilization splint is :
- 1) ☒ a. bruxism splint
- 2) - b. click splint
- 3) - c. Kingsley splint
- 13) 13/ anterior repositioning splint indicated in :
- 1) ☒ a. anterior disc displacement with reduction
- 2) - b. anterior disc displacement without reduction
- 3) - c. posterior disc displacement
- 14) 14/ the anterior bite plates is a hard acrylic resin appliance that placed in mandible arch and has a bite platform that provide contact only with maxillary anterior teeth :
- 1) - a.true
- 2) ☒ b.false
- 15) 15/ whic splint that disengage the posterior teeth in order to eliminate their role in masticatory function:
- 1) ☒ a. anterior bite plate appliance
- 2) - b. posterior bite plate appliance
- 16) 16/ posterior bite p^late indicated in :
- 1) - a. disc displacement with reduction
- 2) ☒ disc displacement without reduction
- 17) 17/ in cases of articular pain used :
- 1) - a. anterior bite plates appliance
- 2) ☒ b. posterior bite plate appliance
- 18) 18/ ocular appliance to replace:
- 1) ☒ a. eye
- 2) - b. ear
- 3) - c. nose
- 19) 19/ non toxic, non allergic are properties refer to :
- 1) ☒ a. chemical properties
- 2) - b. physical properties
- 3) - c. fabrication properties
- 20) 20/ magnets is considerretention :
- 1) - a. anatomic retention
- 2) ☒ b. mechanical retention
