طب الاسنان التحفظي المستوى الثاني - طب وجراحة الفم والاسنان

د. وداد عليوه

- 1) Which instrument used for removing infected caries is?
  - 1) - Chisel
  - 2) - Modified hatchet
  - 3) - Modified chisel
  - 4) ☒ The spoon excavator
- 2) All the following types of matrix used for composite restoration except?
  - 1) - Saddle
  - 2) - Sectional
  - 3) - All
  - 4) ☒ None
- 3) Which the following types of matrix used for amalgam restoration class II?
  - 1) - Saddle
  - 2) - Sectional
  - 3) ☒ Tofflemire
  - 4) - None
- 4) In cutting instruments, the part which corresponds to the Nib is?
  - 1) - Face
  - 2) ☒ blade
  - 3) - Shank
  - 4) - Handle
- 5) Finishing and polishing of an amalgam restoration is done?
  - 1) - After placement of amalgam
  - 2) - After 12 hours of placing amalgam
  - 3) ☒ After 24 hours of placing amalgam
  - 4) - On 3rd day of placing amalgam
- 6) Which instruments used for carving amalgam is?
  - 1) - Condenser
  - 2) ☒ Carver.
  - 3) - Burnisher.
  - 4) - Excavator.
- 7) The type of chisel that has a curved blade is?
  - 1) - Straight chisel
  - 2) - Bin-angle chisel
  - 3) ☒ Wedelstaedt chisel
  - 4) - Hoe
- 8) High-speed hand piece used for?
  - 1) - Effective for enamel removal
  - 2) - Remove an old restoration
  - 3) - Crown or bridge preparation
  - 4) ☒ All
- 9) Which of the following instrument is used to for composite resin restorations?
  - 1) - Condenser
  - 2) - Gingival margin trimmers.
  - 3) ☒ Plastic Filling Instrument.
  - 4) - Excavator.

- 10) Thin clear strip used to isolate cavity prep for composite restorations?
- 1) - Wooden wedge
  - 2) - Plastic wedge
  - 3) ☒ Mylar strips
  - 4) - None
- 11) Which type of bur used to produce resistance & retention in amalgam restorations?
- 1) - Round bur
  - 2) ☒ Pear shaped bur
  - 3) - Fissure bur
  - 4) - Inverted cone bur
- 12) PTFE tape or Teflon used for?
- 1) - As a tooth separation medium in class I stamp composite technique
  - 2) - As a tooth separation medium after air-drying
  - 3) - In deep margin elevation
  - 4) ☒ All
- 13) A " The spoon excavator " is used to cleave away unsupported proximal enamel and to plane and finish proximal enamel walls with?
- 1) - Pen grasp
  - 2) - Modified pen grasp
  - 3) ☒ Palm and thumb grasp
  - 4) - Reverse pen grasp
- 14) Which of the following instrument is designed to produce a proper bevel on gingival enamel margins of proximo-occlusal preparations?
- 1) - Condenser
  - 2) ☒ Gingival margin trimmers.
  - 3) - Burnisher.
  - 4) - Excavator
- 15) Number of line angles in Class II amalgam restoration?
- 1) - 2
  - 2) - 9
  - 3) - 6
  - 4) ☒ 11
- 16) Cavities that occur only in anterior teeth are?
- 1) - Class I cavities
  - 2) - Class V cavities
  - 3) - Class II cavities
  - 4) ☒ Class IV cavities
- 17) The classes of cavity which occurs both in anterior and posterior teeth are?
- 1) - Class III
  - 2) - Class II
  - 3) ☒ Class I & VI
  - 4) - Class IV
- 18) Class III restorations are prepared on?
- 1) ☒ Mesial and distal surface of anterior teeth
  - 2) - Mesial surface of canine
  - 3) - Distal surface of canine
  - 4) - Mesial and distal surface of posterior teeth.
- 19) In cavity preparation cavo-surface margin will be a junction between?
- 1) - Cavity wall / floor and adjacent tooth surface.

- 2) ☒ Cavity wall and and external surface of the tooth.
- 3) ☐ Floor of the occlusal box and a proximal box
- 4) ☐ Axial wall and occlusal floor.
- 20) Tooth preparation involving two surfaces?
- 1) ☐ A-Simple
- 2) ☒ B-Compound
- 3) ☐ C-Complex
- 4) ☐ D- Both A and B
- 21) Is an internal wall which is perpendicular to the long axis of the tooth?
- 1) ☒ Axial wall
- 2) ☐ Pulpal floor
- 3) ☐ Gingival floor
- 4) ☐ All
- 22) Number of point angles in Class III amalgam restoration?
- 1) ☐ 2
- 2) ☒ 3
- 3) ☐ 8
- 4) ☐ 6
- 23) If extension of primary groove includes more than two half of cusp incline?
- 1) ☐ CUSP CAPPING consider
- 2) ☐ CUSP CAPPING not necessary
- 3) ☒ CUSP CAPPING mandatory
- 4) ☐ All
- 24) Preserving marginal ridge strength is features of?
- 1) ☒ Outline form and initial depth
- 2) ☐ Primary resistance form
- 3) ☐ Primary retention form
- 4) ☐ None
- 25) Pulpal wall is flat in all cases except in?
- 1) ☐ Upper 1st premolar
- 2) ☒ lower 1st premolar
- 3) ☐ lower 2st premolar
- 4) ☐ Upper 2st premolar.
- 26) Facio-lingual width should be not more than?
- 1) ☐ 1/3 the intercuspals distance
- 2) ☐ 1/2 the intercuspals distance
- 3) ☒ 1/4 the intercuspals distance
- 4) ☐ All
- 27) To utilize the box shape with a relatively flat floor is features of?
- 1) ☐ Outline form and initial depth
- 2) ☒ Primary resistance form
- 3) ☐ Primary retention form
- 4) ☐ None
- 28) Dovetail in Class I cavity preparation is a principal of?
- 1) ☐ Outline form and initial depth
- 2) ☐ Primary resistance form
- 3) ☒ Primary retention form
- 4) ☐ None
- 29) In composite restoration type of retention form is?

- 1) - Mechanical
  - 2) ☒ Micro chemical
  - 3) - All
  - 4) - None
- 30) Removal of infected dentinal caries safe by using?
- 1) - Round burs only
  - 2) ☒ Spoon excavators.
  - 3) - All
  - 4) - None
- 31) In "compound" cavity preparation?
- 1) - Only one tooth surface is involved
  - 2) ☒ Two surfaces are involved
  - 3) - Three or more surfaces are involved
  - 4) - None
- 32) Which of the following is not an internal wall for a cavity preparation?
- 1) - Axial wall
  - 2) - Pulpal wall
  - 3) ☒ Gingival floor
  - 4) - All
- 33) All of the following are external walls of a cavity preparation except?
- 1) ☒ Axial wall
  - 2) - Gingival wall
  - 3) - Buccal wall
  - 4) - Distal wall
- 34) In cavity preparation the form to prevent displacement of the restoration is called?
- 1) ☒ Retention form
  - 2) - Resistance form
  - 3) - Convenience form
  - 4) - All
- 35) Frequently used instruments for placing retentive grooves for amalgam and composite are?
- 1) ☒ Small round burs nos.  $\frac{1}{4}$  to  $\frac{1}{2}$
  - 2) - Small inverted cone bur
  - 3) - Small chisels
  - 4) - Round bur nos. 2 and 4
- 36) Instruments used for cavity preparation amalgam and composite resins are:
- 1) - Small round burs nos.  $\frac{1}{4}$  to  $\frac{1}{2}$
  - 2) - Small inverted cone bur
  - 3) - Small chisels
  - 4) ☒ Round bur nos. 2 and 4
- 37) Class II restorations are prepared on?
- 1) ☒ Mesial and distal surface of posterior teeth.
  - 2) - Distal surface of anterior teeth
  - 3) - Mesial surface of canine
  - 4) - Distal surface of canine
- 38) Internal wall that is towards the pulp and covering the pulp is?
- 1) - Mesial wall
  - 2) - Axial wall
  - 3) - Distal wall
  - 4) ☒ Pulpal floor

39) Tooth preparation involving three surfaces is?

- 1) - Compound
- 2) - Simple
- 3) + Complex
- 4) - None

40) Hand cutting instruments are composed of:

- 1) - Handle and blade only.
- 2) - Handle and neck
- 3) + Handle, shank and blade.
- 4) - Handle, shank and neck
