

30. Course Specification of Engineering Probability and

Statistics

	I. Course Identification and General Information:						
1.	Course Title:	Engineering Probability and Statistics				stics	
2.	Course Code & Number:	BR13	1				
			C.	Н		Total	
3.	Credit hours:	Th.	Tu.	Pr.	Tr.	Total	
		2	2	-	-	3	
4.	Study level/ semester at which this course is offered:	Level 3- Semester 1					
5.	Pre –requisite (if any):	Mathematical Analysis, Linear Algebra (BR121) and Mathematics 2 (FR003)			_		
6.	Co –requisite (if any):	None					
7.	Program (s) in which the course is offered:	Communication Engineering and Networks					
8.	Language of teaching the course:	English					
9.	Location of teaching the course:	Faculty of Engineering - Electrical Department					
10.	Prepared By:	Asst. Prof. Dr. Mohammed Abdul Karim Al-Suraby					
11.	Date of Approval						

II. Course Description:

This course provides an introduction to probability and statistics. This course covers the role of probability and statistics in engineering. It includes the concepts of probability; random variables; probability distributions (discrete; continuous and joint probability distributions)

Prepared by

Head of Department Asst. Prof. Dr. Adel Ahmed Al-Shakiri Quality Assurance Unit Assoc. Prof. Dr. Mohammad Algorafi Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti Academic Development Center & Quality Assurance Assoc. Prof. Dr. Huda Al-Emad

and their mathematical expectation; transformations of variables; central limit theorem and statistical estimation and hypothesis testing.

	III. Course Intended learning outcomes (CILOs) of the course	Referenced PILOs
a1	Define the basic concepts of probability, statistics, random variables, probability distribution, covariance, correlation coefficient and transformations of variables.	A1
a2	Recognize the law of large numbers and the central limit theorem, the estimation, statistical hypotheses and testing.	A1
b1	Evaluate the Probability Density Function (PDF) of a random variable from a series of independent observations.	B2
b2	Analyze and interpret engineering data by using statistical concepts.	B2
c1	Calculate various moments of common random variables including at least means, variances and standard deviations and calculate the distribution of a function of a random variable.	C1 and C4
c2	Apply statistical methodology and tools in the engineering problem- solving process and apply the concepts of random variables to engineering applications.	C1 and C4
d1	Engage independent lifelong learning.	D2
d2	Effective use of information resources	D5

Χ.	Course Policies:
	Class Attendance:
1.	A student should attend not less than 75 % of total hours of the subject; otherwise he will
	not be able to take the exam and will be considered as exam failure. If the student is
	absent due to illness, he/she should bring an approved statement from university Clinic
	Tardy:
2.	For late in attending the class, the student will be initially notified. If he repeated lateness
	in attending class he will be considered as absent.
	Exam Attendance/Punctuality:
3.	A student should attend the exam on time. He is Permitted to attend an exam half one
J.	hour from exam beginning, after that he/she will not be permitted to take the exam and
	he/she will be considered as absent in exam-
	Assignments & Projects:
4.	The assignment is given to the students after each chapter; the student has to submit all
	the assignments for checking on time-
	Cheating:
5.	For cheating in exam, a student will be considered as failure. In case the cheating is
	repeated three times during his/her study the student will be disengaged from the Faculty-
	Plagiarism:
	Plagiarism is the attending of a student the exam of a course instead of another student.
6.	If the examination committee proved a plagiarism of a student, he will be disengaged
	from the Faculty. The final disengagement of the student from the Faculty should be
	confirmed from the Student Council Affair of the university.
	Other policies:
	- Mobile phones are not allowed to use during a class lecture. It must be closed, otherwise
7.	the student will be asked to leave the lecture room
	- Mobile phones are not allowed in class during the examination.
	Lecture notes and assignments my given directly to students using soft or hard copy
