

40. Course Specification of Digital Signal Processing

I. Course Identification and General Information:					
1.	Course Title:	Digital Signal Processing			
2.	Course Code & Number:	CNE317			
3.	Credit hours:	C.H.			Total C.H.
		Th.	Tu.	Pr.	
		2	2	2	-
4.	Study level/ semester at which this course is offered:	4 th Level/ 1 st Semester			
5.	Pre –requisite (if any):	Signals and Systems (CNE216), Communications Principles (CNE2211), Programming Language 2 (C/C++) (CCE152) Matlab.			
6.	Co –requisite (if any):	None			
7.	Program (s) in which the course is offered:	Communication and Network Engineering			
8.	Language of teaching the course:	English			
9.	Location of teaching the course:	Faculty of Engineering, Sana'a University			
10.	Prepared By:	Assoc. Prof. Dr. Mohammed A. Saeed Al-Mekhlafi			
11.	Date of Approval	2020			

II. Course Description:
<p>This course introduces the basic concepts and principles of Digital Signal Processing (DSP) and their applications. Topics include: Review of discrete-time (DT) signals and systems; Correlation, convolution, sampling theorem, aliasing, and quantization, frequency-domain representation of discrete-time signals and systems, circular convolution, decimation and interpolation, the discrete-time Fourier transform (DTFT), the discrete Fourier transform (DFT), the fast Fourier transform (FFT), the z-transform, linear phase transfer functions, digital filter structures, finite-impulse response (FIR) digital filter design, infinite-impulse</p>

Head of
Department
Asst. Prof. Dr.
Adel Ahmed Al-
Shakiri

Quality Assurance

Assoc. Prof. Dr.
Huda Al-Emad

Rector of Sana'a University
Prof. Dr. Al-Qassim Mohammed
Abbas

response (IIR) digital filter design, digital processing of continuous-time signals, and applications of digital signal processing in communications.

III. Course Intended learning outcomes (CILOs) of the course		Referenced PILOs
a1	Demonstrate the basic signal processing techniques and algorithms and ability to apply them in signal processing and system analysis.	A1
a2	Define the periodic sampling of continuous signals and the relationship between Fourier transforms of the sampled continuous signal and the resulting discrete-time signal.	A1, A2
b1	Analyze the impulse- and frequency-response of a discrete LTI system by using DSP tools such as z-transform and DFT techniques.	B2
b2	Analyze discrete-time signals in time and transform domains, using tools such as FFT and inverse FFT.	B3
c1	Implement different types of digital filters to meet arbitrary specifications.	C2
c2	Use computers and MATLAB to create, analyze, and process signals, and to simulate and analyze systems.	C4
d1	Write signal processing algorithms and methods with minimal supervision and communicate the outcomes as a written report.	D4

(A) Alignment Course Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
a1 – Demonstrate understanding of the basic signal processing techniques and algorithms and ability to apply them in signal processing and system analysis.	<ul style="list-style-type: none"> ▪ Interactive Lectures ▪ Class Discussions ▪ Problem Solving ▪ Independent readings 	<ul style="list-style-type: none"> ▪ Assignments ▪ Quizzes ▪ Midterm Exam ▪ Final Exam
a2 – Define the periodic sampling of continuous signals and the relationship between Fourier transforms of	<ul style="list-style-type: none"> ▪ Interactive Lectures ▪ Class Discussions 	<ul style="list-style-type: none"> ▪ Assignments ▪ Quizzes ▪ Midterm Exam

 Prof. Dr. Al-Qassim Mohammed Abbas

5.	Write a MATLAB code to perform cross correlation between two vectors using MATLAB	1	2	a1, b2, c2, d1
6.	Write a MATLAB code to compute DFT and IDFT of a given sequence using MATLAB.	1	2	a1, b1, b2, c2, d1
7.	Write a MATLAB code to perform linear convolution of two sequence using DFT using MATLAB.	1	2	a1, b1, c2, d1
8.	Write a MATLAB code to determine z-transform from the given transfer function and its ROC using MATLAB.	1	2	a1, b1, c2, d1
9.	Write a MATLAB code to design a Type 1 Chebyshev IIR highpass filter using MATLAB.	1	2	a1, c1, c2, d1
10.	Write a MATLAB code to design an IIR Elliptic low pass filter using MATLAB.	1	2	a1, b1, c2, d1
11.	Write a MATLAB code to design an IIR Butterworth bandpass filter using MATLAB.	1	2	a1, b1, c2, d1
12.	Write MATLAB codes to generate rectangular, Hamming, Hanning, Blackman, and Kaiser windows using MATLAB.	1	2	a1, b1, b2, c1, c2, d1
13.	Write a MATLAB code to design low pass filter using the Kaiser window using MATLAB.	1	2	a1, b1, c2, d1
14.	Write a MATLAB code to study coefficient quantization effects on the frequency response of a cascade form IIR filter using MATLAB.	1	2	a1, a1, b2, c1, c2, d1
Number of Weeks /and Units Per Semester		14	28	

V. Teaching strategies of the course:

- Interactive Lectures
- Class discussions
- Problem Solving
- Computer-based Learning
- Independent readings
- Web based Investigations

VI. Assignments:				
No	Assignments	Aligned CILOs	Week Due	Mark
1.	Problems on Discrete-Time Signals and Systems, & Sampling and Reconstruction	a1, a2	3 rd	2
2.	Problems on z-Transform and its Inverse	a1, b1	6 th	2
3.	Problems on Discrete Fourier Transform (DFT) and Fast Fourier Transform (FFT)	a1, b1, b2, c1,d1	10 th	2
4.	Problems on Design of Finite Impulse Response (FIR) Filters	a1, c1, c2,d1	13 th	2
5.	Problems on Design of Infinite Impulse Response (IIR) Filters	a1, c1, c2,d1	15 th	2
	Total			10

VII. Schedule of Assessment Tasks for Students During the Semester:					
No.	Assessment Method	Week Due	Mark	Proportion of Final Assessment	Aligned Course Learning Outcomes
1.	Assignments	3 rd , 6 th , 10 th , 13 th , 15 th	10	5%	a1, a2, b1, b2, c1, c2, d1
2.	Quizzes	4 th , 13 th	20	10%	b1, b2, c1, c2
3.	Attendance & Participation	Weekly	10	5%	a1
4.	Lab Reports	Weekly	20	10%	b1, b2, c1, c2
5.	Midterm Exam	7 th	20	10%	a1, a2, b1

6.	Final Exam	16 th	120	60%	a1, a2, b1, b2, c1, c2
Total			200	100%	

VIII. Learning Resources:

- *Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).*

1- Required Textbook(s) (maximum two).

1. Sanjit K. Mitra, 2011, “Digital Signal Processing: A computer-based approach”, Fourth Edition, USA, McGraw Hill.

2- Essential References.

1. V. Oppenheim, R. W. Schaffer, 1999, “Discrete-Time Signal Processing”, Second Edition, USA, Prentice Hall.
2. J. G. Proakis and D.G. Manolakis, 2014, “Digital Signal Processing”, Fourth Edition, UK, Pearson.
3. Richard G. Lyons, 2011, “Understanding digital signal processing”, Prentice Hall PTR, Third Edition, USA, Pearson Education.

3- Electronic Materials and Web Sites etc.

1. Gogglng the Internet

IX. Course Policies:

1.	Class Attendance: - The students should have more than 75% of attendance according to rules and regulations of the faculty.
2.	Tardy: - The students should respect the timing of attending the lectures. They should attend within 15 minutes from starting of the lecture.
3.	Exam Attendance/Punctuality: - The student should attend the exam on time. The punctuality should be implemented according to rules and regulations of the faculty for mid-term exam and final exam.

4.	<p>Assignments & Projects:</p> <ul style="list-style-type: none"> - The assignment is given to the students after each chapter; the student has to submit all the assignments for checking on time.
5.	<p>Cheating:</p> <ul style="list-style-type: none"> - If any cheating occurred during the examination, the student is not allowed to continue and he has to face the examination committee for enquires.
6.	<p>Plagiarism:</p> <ul style="list-style-type: none"> - If one student attends the exam on another behalf; he will be dismissed from the faculty according to the policy, rules and regulations of the university.
7.	<p>Other policies:</p> <ul style="list-style-type: none"> - All the teaching materials should be kept out the examination hall and mobile phones are not allowed. - Mutual respect should be maintained between the student and his teacher and also among students. Failing in keeping this respect is subject to the policy, rules and regulations of the university.
