

## 40. Course Specification of Machine Design - I

I. Course Identification and General Information:						
1.	Course Title:	Machine Design - I				
2.	Course Code & Number:	ME235				
3.	Credit Hours:	C.H				TOTAL CR. HRS
		Th.	Seminar/Tu	Pr	Tr.	
		2	2	-	-	
4.	Study level/ semester at which this course is offered:	Third year - Second Semester				
5.	Pre –requisite (if any):	Materials Science and Engineering (ME111), Machine Drawing (ME131) & Mechanics of Materials - II (ME234)				
6.	Co –requisite (if any):	None				
7.	Program (s) in which the course is offered:	Mechanical Engineering Program.				
8.	Language of teaching the course:	English Language.				
9.	Location of teaching the course:	Mechanical Engineering Department.				
10.	Prepared By:	Associate Prof. Dr. Khalil Al-Hatab				
11.	Date of Approval:					

II. Course Description:
<p>This course emphasizes the application of theoretical and engineering background taught in other courses, but also relies heavily on empirical approaches and simplifications of theory. Core material includes static and fatigue failure theories, design of shafts, design of permanent joints; riveted joints, welded joints, bolted joints, power screws, keys, splines, pins, rings and design of springs. The course is centered on a major design project, which is undertaken in groups.</p>

III. Alignments of the Course Intended learning outcomes (CILOs)	Referenced PILOs
<p><b>a1</b> Understand the fundamental scientific principles of mechanical design (stress, strain, material properties, and complex statics and fatigue loadings) and their importance and use in design analysis.</p>	A1.

Head of  
 Department  
 Asst. Prof. Dr.  
 Adel Ahmed  
 Al-Shakiri

Rector of Sana'a  
 University  
 Prof. Dr. Al-Qassim  
 Mohammed Abbas

<b>a2</b>	Gain fundamental ideas and principles toward the selection of engineering materials and design of basic machine elements (shafts, bolted and welded joints and springs) based on the mechanical strength.	A2.
<b>a3</b>	Relate analytical skills, modern engineering tools and systematic approaches to mechanical design analysis procedures, employing a practice-oriented design workflow, computer-aided design and developing engineering judgment through this practice.	A4.
<b>b1</b>	Explore a range of key machine component categories following fundamental engineering analysis that includes evaluation of component function, complex statics and fatigue loadings, failure mode and criteria and life.	B1.
<b>b2</b>	Design machine elements by applying stress analysis and fatigue theories and appropriate criteria of failure.	
<b>b3</b>	Examine the design standards in assessment and specification of machine components, appreciating the role and context of standards in design, and being exposed to examples that highlight how and why standards are formulated in engineering practice.	B2.
<b>c1</b>	Employ the practical experience of available computer aided design software (ANSYS, SOLIDWORKS & ABAQUS) within the engineering design workflow and apply this to a range of design analysis problems.	C1.
<b>c2</b>	Perform technical reports that includes analysis briefs, graphically express basic machine elements, describe the context and significance of the design, and stress analysis of machine components and the procedures / methods used to solve them and apply the results for the services.	C2.
<b>c3</b>	Implement of safety and reliability concepts in the design of machine elements.	C3.
<b>d1</b>	Cooperate effectively as a part of a team.	D1.
<b>d2</b>	Review the literature for a real-world problem, select the project idea, use databases and analytical and computing skills tools as well as, evaluate information and evidence from various sources.	D4.
<b>d3</b>	Effectively Communicate, discuss results and defend his ideas.	D5.

<b>(A) Alignment Course Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:</b>		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
<b>a1-</b> Understand the fundamental scientific principles of mechanical design (stress, strain, material properties, and complex statics and fatigue loadings) and their importance and use in design analysis.	Lectures, Tutorials, Software Packages, Projects	Examinations, Homework Presentations
<b>a2-</b> Gain fundamental ideas and principles toward the selection of engineering materials and design of basic machine elements (shafts, bolted and welded joints and springs) based on the mechanical strength.	Lectures, Tutorials, Software Packages, Projects	Examinations, Homework Presentations, Individual and Group Project Reports.
<b>a3-</b> Relate analytical skills, modern engineering tools and systematic approaches to mechanical design analysis procedures, employing a practice-oriented design workflow, computer- aided design and developing engineering judgment through this practice.	Lectures, Tutorials, Software Packages (ANSYS, SOLIDWORKS & ABAQUS), Projects.	Examinations, Homework Presentations, Individual and Group Project Reports

<b>(B) Alignment Course Intended Learning Outcomes of Intellectual Skills to Teaching Strategies and Assessment Strategies:</b>		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
<b>b1-</b> Explore a range of key machine component categories following fundamental engineering analysis that includes evaluation of component function, complex statics and fatigue loadings, failure mode and criteria and life.	Lectures, Tutorials, Lectures, Real-World Problem, Projects	Examinations, Homework, Presentations, Individual and Group Project Reports

<b>Total</b>				<b>15</b>

### VII. Schedule of Assessment Tasks for Students During the Semester:

No.	Assessment Method	Week Due	Mark	Proportion of Final Assessment	Aligned Course Learning Outcomes
1	Homework	2 <sup>nd</sup> to 14 <sup>th</sup>	15	10%	a1, a2, a3, b1, b2, b3, c3
2	Real problem Presentation	5 <sup>th</sup> to 11 <sup>th</sup>	10	6.67.%	a1, a2, a3, b1, b2, b3, c1, c2, c3, d1, d2,d3
3	Project report and presentation	4 <sup>th</sup> , 5 <sup>th</sup> , 6 <sup>th</sup> , 11 <sup>th</sup> , 14 <sup>th</sup>	15	10%	a1, a2, a3, b1, b2, b3, c1, c2, c3, d1, d2,d3
4	Quiz 1- Quiz 3	4 <sup>th</sup> , 7 <sup>th</sup> , 11 <sup>th</sup>	15	6.67%	a1,a2,a3,b1,b2, b3,c1,c2,c3
5	Mid-Term Exam	8 <sup>th</sup>	20	13.33%	a1,a2,a3,b1,b2, b3,c1,c2,c3
6	Final exam	15 <sup>th</sup>	75	50%	a1,a2,a3,b1,b2, b3,c1,c2,c3
<b>Total</b>			<b>150</b>	<b>100%</b>	

### VIII. Learning Resources:

- Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).

#### 1- Required Textbook(s) (maximum two ).

1. Budynas, RG & Nisbett, JK, 2015, Shigley's Mechanical Engineering Design (SI units), 10<sup>th</sup> ed, McGraw Hill, New York.
2. Course Notes and Power Point Presentations

Head of Department

I. Course Policies:	
1	<p><b>Class Attendance:</b></p> <p>- The student should be attending not less than 75% of total contact hours of the subject, otherwise he will not able to take exam and <b>be considered</b> as <b>an</b> exam failure. If the student is absent due to illness, he/she should bring <b>an approved</b> statement from university Clinic.</p>
2	<p><b>Tardy:</b></p> <p>- For <b>lateness</b> in attending the class, the student will be initially <b>notified</b>. If he <b>repeats</b> late in attending class <b>he will be considered absent</b>.</p>
3	<p><b>Exam Attendance/Punctuality:</b></p> <p>- The student should attend the exam on time. He is <b>permitted</b> to attend the exam half one hour from exam beginning, after that he/she will not <b>be</b> permitted to take exam and he/she <b>is considered</b> absent in <b>the</b> exam.</p>
4	<p><b>Assignments &amp; Projects:</b></p> <p>- In general one assignment is given after each chapter of a course. The student should submit the assignment on time, mostly one week after <b>giving</b> the assignment</p>
5	<p><b>Cheating:</b></p> <p>- For cheating in exam, the student <b>is</b> considered as <b>failure</b>. <b>In case</b> the cheating <b>is</b> repeated three times during study the student will <b>be disengaged</b> from the Faculty</p>
6	<p><b>Plagiarism:</b></p> <p>Plagiarism is the attending of the student the exam of a course instead of other student. If the examination committee <b>proved</b> a plagiarism of a student, he will be disengaged from</p>

design of springs. The course is centered on a major design project, which is undertaken in groups.

**IV. Intended learning outcomes (ILOs) of the course:**

- Brief summary of the knowledge or skill the course is intended to develop:
  1. Identify appropriate analytical models to describe and predict the behaviour of standard machine components;
  2. Apply stress analysis theory, fatigue theory and appropriate criteria of failure to the design of simple machine elements;
  3. Select appropriate mechanical components from manufacturers' catalogues;
  4. Apply codes and standards to machine component design;
  5. **Understand** safety and reliability concepts in the design of machine elements.
  6. Communicate the results of a design assignment by means of drawings and a design report
  7. Make appropriate use of available computer aided design software.

**V. Course Content:**

- Distribution of Semester Weekly Plan Of course Topics/Items and Activities.

**A – Theoretical Aspect:**

Order	Topics List	Sub Topics List	Week Due	Contact Hours

<b>VI. Teaching strategies of the course:</b>
<ul style="list-style-type: none"> <li>– Active Lectures,</li> <li>– Project</li> <li>– Tutorials</li> <li>– Software Packages (ANSYS, SOLIDWORKS &amp; ABAQUS)</li> <li>– Projects.</li> <li>– Interactive Class Discussions</li> <li>– Exercises and <b>Homework</b></li> <li>– Problem Based Learning</li> <li>– Real-World Problem</li> </ul>

<b>VII. Assignments:</b>				
No	Assignments	Aligned CILOs(symbols)	Week Due	Mark
1	Homework 1	a1, b1, b2, b3,c1,c3	2 <sup>nd</sup>	1.25
2	Homework 2	a1, b1, b2, b3, c3	3 <sup>rd</sup>	1.25
3	Homework 3	a1, b1, b2, b3, c3	4 <sup>th</sup>	1.25
4	Homework 4	a1, a2, a3, b1, b2, b3, c3	5 <sup>th</sup>	1.25
5	Homework 5	a1, a2, a3, b1, b2, b3, c3	6 <sup>th</sup>	1.25
6	Homework 6	a1, a2, a3, b1, b2, b3, c3	7 <sup>th</sup>	1.25
7	Homework 7	a1, a2, a3, b1, b2, b3, c3	9 <sup>th</sup>	1.25
8	Homework 8	a1, a2, a3, b1, b2, b3, c3	10 <sup>th</sup>	1.25
9	Homework 9	a1, a2, a3, b1, b2, b3, c3	11 <sup>th</sup>	1.25
10	Homework 10	a1, a2, a3, b1, b2, b3, c3	12 <sup>th</sup>	1.25
11	Homework 11	a1, a2, a3, b1, b2, b3, c3	13 <sup>th</sup>	1.25
12	Homework 12	a1, a2, a3, b1, b2, b3, c3	14 <sup>th</sup>	1.25
<b>Total</b>				<b>15</b>

<b>VIII. Schedule of Assessment Tasks for Students During the Semester:</b>				
Assessment	Type of Assessment Tasks	Week Due	Mark	Proportion of Final Assessment
Head of Department Asst. Prof. Dr. Adel Ahmed Al-Shakiri	Quality Assurance Unit Assoc. Prof. Dr. Mohammad Algorafi	Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti	Academic Development Center & Quality Assurance Assoc. Prof. Dr. Huda Al-Emad	Rector of Sana'a University Prof. Dr. Al-Qassim Mohammed Abbas

1	Homework 1 to Homework 12	2 <sup>nd</sup> to 14 <sup>th</sup>	15	10%
2	Real Problem Presentation	5 <sup>th</sup> to 11 <sup>th</sup>	10	6.67.%
3	Project Report and Presentation	4 <sup>th</sup> , 5 <sup>th</sup> , 6 <sup>th</sup> , 11 <sup>th</sup> , 14 <sup>th</sup>	15	10%
4	Quiz 1 - Quiz 3	4 <sup>th</sup> , 7 <sup>th</sup> , 11 <sup>th</sup>	15	10%
5	Mid-Term Exam	8 <sup>th</sup>	20	13.33%
6	Final Exam	15 <sup>th</sup>	75	50%
<b>Total</b>			<b>150</b>	<b>100%</b>

## IX. Learning Resources:

- *Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).*

### 1- Required Textbook(s) (maximum two ).

1. Budynas, RG & Nisbett, JK, 2015, Shigley's Mechanical Engineering Design (SI units), 10<sup>th</sup> ed, McGraw Hill, New York.
2. Course Notes And Power Point Presentations

### 2- Essential References.

1. Juvinall, RC & Marshek, KM 2017, Fundamentals of machine component design, 6<sup>th</sup> ed., John Wiley & Sons, Hoboken, NJ.
2. Hamrock, B.J., Schmid, S.R., Jacobson, B., 2014, Fundamentals of Machine Elements (SI units), 3<sup>rd</sup> ed., CRC Press (Taylor & Francis Group, LLC).
3. Norton, R. L., 2012, Machine Design: An Integrated Approach, 3<sup>rd</sup> ed., Pearson Education.
4. Shahin Nudehi, John Steffen, 2017, Analysis of Machine Elements Using SOLIDWORKS Simulation 2017, SDC Publications.
5. Ansel C. Ugural, 2015, Mechanical Design of Machine Components, 2<sup>nd</sup> ed., CRC Press (Taylor & Francis Group, LLC)

### 3- Electronic Materials and Web Sites etc.

Software packages: ANSIS & SolidWorks

## II. Course Policies:

### 1 | Class Attendance:

Head of  
 Department  
 Asst. Prof. Dr.  
 Adel Ahmed  
 Al-Shakiri

Quality Assurance  
 Unit  
 Assoc. Prof. Dr.  
 Mohammad  
 Algorafi

Dean of the Faculty  
 Prof. Dr. Mohammed  
 AL-Bukhaiti

Academic  
 Development  
 Center & Quality  
 Assurance  
 Assoc. Prof. Dr.  
 Huda Al-Emad

Rector of Sana'a  
 University  
 Prof. Dr. Al-Qassim  
 Mohammed Abbas

	- The student should be attending not less than 75% of total contact hours of the subject, otherwise he will not able to take exam and <b>be considered</b> as <b>an</b> exam failure. If the student is absent due to illness, he/she should bring <b>an approved</b> statement from university Clinic.
2	<b>Tardy:</b> - For <b>lateness</b> in attending the class, the student will be initially <b>notified</b> . If he <b>repeats</b> late in attending class <b>he will be considered absent</b> .
3	<b>Exam Attendance/Punctuality:</b> - The student should attend the exam on time. He is <b>permitted</b> to attend the exam half one hour from exam beginning, after that he/she will not <b>be</b> permitted to take exam and he/she <b>is considered</b> absent in <b>the</b> exam.
4	<b>Assignments &amp; Projects:</b> - In general one assignment is given after each chapter of a course. The student should submit the assignment on time, mostly one week after <b>giving</b> the assignment
5	<b>Cheating:</b> - For cheating in exam, the student <b>is</b> considered as <b>failure</b> . <b>In case</b> the cheating <b>is</b> repeated three times during study the student will <b>be disengaged</b> from the Faculty
6	<b>Plagiarism:</b> Plagiarism is the attending of the student the exam of a course instead of other student. If the examination committee <b>proved</b> a plagiarism of a student, he will be disengaged from the Faculty. The final disengagement of the student from the Faculty should be confirmed from the Student <b>Affair Council</b> of the university.
7	<b>Other policies:</b> - The mobile phone is not allowable <b>to be used</b> during class lecture. It must <b>be switched off</b> , otherwise the student will <b>be ordered</b> to leave the lecture room. - The mobile phone is not allowed <b>to be taken during the examination time</b> . - Lecture notes and assignments <b>may be</b> given directly to students using soft or hard copy.
