

41. Course Specification of Fluid Mechanics -II

I. Course Identification and General Information:						
1.	Course Title:	Fluid Mechanics-II.				
2.	Course Code & Number:	ME242.				
3.	Credit Hours:	C.H				TOTAL CR. HRS.
		Th.	Seminar/Tu	Pr	Tr.	
		2	2	-	-	
4.	Study level/ semester at which this course is offered:	Third Year-Second Semester.				
5.	Pre –requisite (if any):	Fluid Mechanics-I (ME241).				
6.	Co –requisite (if any):	None.				
7.	Program (s) in which the course is offered:	Mechanical Engineering Program.				
8.	Language of teaching the course:	English Language.				
9.	Location of teaching the course:	Mechanical Engineering Department.				
10.	Prepared By:	Associate Professor Dr. Abdul-Malik Momin.				
11.	Date of Approval:					

II. Course Description:		
This course is the extension of Fluid Mechanics –I. The course provides a study on main characteristics of fluid flow such as dimensional analysis and similitude. It will focus also on the main concepts of boundary layer which are applicable in the field. The characteristics of the drag and lift will be introduced in details. The significant learning outcomes will focus on conceptual knowledge and procedural knowledge. The practical case studies will be discussed in details. Also , field visits will be implemented.		
	III. Alignments of the Course Intended learning outcomes (CILOs)	Referenced PILOs
a1	Express different fluid properties and types of fluid flow and their applications.	A1
a2	Illustrate different principles and methods regarding the design approach.	A2

Head of
 Department
 Asst. Prof. Dr.
 Adel Ahmed
 Al-Shakiri

Quality Assurance

b1	Explore accurate mechanical systems related to the real applications of fluid mechanics.	B2
b2	Combine the principles of management to work in an efficient way in the area of fluid mechanics.	B3
c1	Apply ideas of development for best practice.	C1
c2	Implement different techniques for the analysis of the complex systems.	C2
d1	Estimate the needs for life- long learning.	D3
d2	Co-operate effectively within a team to finalize the technical reports.	D5

(A) Alignment Course Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:

Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
a1- Express different fluid properties and types of fluid flow and their applications.	<ul style="list-style-type: none"> Active Lectures. Tutorials. 	<ul style="list-style-type: none"> Written Exam. Homework.
a2- Illustrate different principles and methods regarding the design approach.		

(B) Alignment Course Intended Learning Outcomes of Intellectual Skills to Teaching Strategies and Assessment Strategies:

Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
b1- Explore accurate mechanical systems related to the real applications of fluid mechanics.	<ul style="list-style-type: none"> Active Lectures. Seminars. Projects. 	<ul style="list-style-type: none"> Examination. Homework. Project Reports.
b2- Combine the principles of management to work in an efficient way in the area of fluid mechanics.

Total			150	100 %	

VIII. Learning Resources:

- *Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).*

1- Required Textbook(s) (maximum two).

1. Crowe, C. T., Elger, D.F.,William, B.C., Roberson, J.A., 2009, "Engineering Fluid Mechanics" , 9th Edition, John Wiley and Sons.
2. Frank, M. and White, 1994, "Fluid Mechanics", 3rd Edition, McGraw Hill Inc.

2- Essential References.

3. Bruce, R., Munson, Donald Young and Theodore H. Okishi, 2006, "Fundamentals of Fluid Mechanics", 5th Edition, John Wiley and Sons Inc.
4. Streeter, V.I., Wylie, E.B. and Bedford, K.W., 1998, "Fluid Mechanics", 9th Edition, McGraw Hill, N.Y.

3- Electronic Materials and Web Sites etc.

5. Journal of ASME, Fluid Mechanics.
6. The Fluid Power Journal: <http://www.fluidpowerjournal.com>.

I. Course Policies:

1	Class Attendance: - The student should be attending not less than 75% of total contact hours of the subject, otherwise he will not able to take exam and be considered as an exam failure. If the student is absent due to illness, he/she should bring an approved statement from university Clinic.
2	Tardy: - For lateness in attending the class, the student will be initially notified . If he repeats late in attending class he will be considered absent .
3	Exam Attendance/Punctuality: - The student should attend the exam on time. He is permitted to attend the exam half one hour from exam beginning, after that he/she will not be permitted to take exam and he/she is considered absent in the exam.
4	Assignments & Projects:

Head of
Department
Asst. Prof. Dr.
Adel Ahmed
Al-Shakiri

Quality Assurance
Unit
Assoc. Prof. Dr.

Rector of Sana'a
University
Prof. Dr. Al-Qassim
Mohammed Abbas

	- In general one assignment is given after each chapter of a course. The student should submit the assignment on time, mostly one week after giving the assignment
5	Cheating: - For cheating in exam, the student is considered as failure . In case the cheating is repeated three times during study the student will be disengaged from the Faculty
6	Plagiarism: Plagiarism is the attending of the student the exam of a course instead of other student. If the examination committee proved a plagiarism of a student, he will be disengaged from the Faculty. The final disengagement of the student from the Faculty should be confirmed from the Student Affair Council of the university.
7	Other policies: - The mobile phone is not allowable to be used during class lecture. It must be switched off , otherwise the student will be ordered to leave the lecture room. - The mobile phone is not allowed to be taken during the examination time . - Lecture notes and assignments may be given directly to students using soft or hard copy.

4.	Final Exam.	16 th	90	60 %
Total			150	100 %

IX. Learning Resources:	
<ul style="list-style-type: none"> Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher). 	
1- Required Textbook(s) (maximum two).	
	<ol style="list-style-type: none"> Crowe, C. T. , Elger, D.F.,William, B.C., Roberson, J.A., 2009, "Engineering Fluid Mechanics" , 9th Edition, John Wiley and Sons. Frank, M. and White, 1994, "Fluid Mechanics", 3rd Edition, McGraw Hill Inc.
2- Essential References.	
	<ol style="list-style-type: none"> Bruce, R., Munson, Donald Young and Theodore H. Okishi, 2006, "Fundamentals of Fluid Mechanics", 5th Edition, John Wiley and Sons Inc. Streeter, V.I., Wylie, E.B. and Bedford, K.W., 1998, "Fluid Mechanics", Edition, McGraw Hill, N.Y.
3- Electronic Materials and Web Sites etc.	
	<ol style="list-style-type: none"> Journal of ASME, Fluid Mechanics. The Fluid Power Journal: http://www.fluidpowerjournal.com.

II. Course Policies:	
1	<p>Class Attendance:</p> <p>- The student should be attending not less than 75% of total contact hours of the subject, otherwise he will not able to take exam and be considerd as an exam failure. If the student is absent due to illness, he/she should bring an approved statement from university Clinic.</p>
2	<p>Tardy:</p> <p>- For lateness in attending the class, the student will be initially notified. If he repeates late in attending class he will be considered absent.</p>
3	<p>Exam Attendance/Punctuality:</p>

Head of Department
 Asst. Prof. Dr. Adel Ahmed Al-Shakiri

Quality Assurance Unit
 Assoc. Prof. Dr. Mohammad Algorafi

Dean of the Faculty
 Prof. Dr. Mohammed AL-Bukhaiti

Academic Development Center & Quality Assurance
 Assoc. Prof. Dr. Huda Al-Emad

Rector of Sana'a University
 Prof. Dr. Al-Qassim Mohammed Abbas

	- The student should attend the exam on time. He is permitted to attend the exam half one hour from exam beginning, after that he/she will not be permitted to take exam and he/she is considered absent in the exam.
4	Assignments & Projects: - In general one assignment is given after each chapter of a course. The student should submit the assignment on time, mostly one week after giving the assignment
5	Cheating: - For cheating in exam, the student is considered as failure . In case the cheating is repeated three times during study the student will be disengaged from the Faculty
6	Plagiarism: Plagiarism is the attending of the student the exam of a course instead of other student. If the examination committee proved a plagiarism of a student, he will be disengaged from the Faculty. The final disengagement of the student from the Faculty should be confirmed from the Student Affair Council of the university.
7	Other policies: - The mobile phone is not allowable to be used during class lecture. It must be switched off , otherwise the student will be ordered to leave the lecture room. - The mobile phone is not allowed to be taken during the examination time . - Lecture notes and assignments may be given directly to students using soft or hard copy.

42. Course Specification of Thermodynamics - II

I. Course Identification and General Information:						
1.	Course Title:	Thermodynamics - II.				
2.	Course Code & Number:	ME 252.				
3.	Credit Hours:	C.H			TOTAL CR. HRS.	
		Th.	Seminar/Tu	Pr		Tr
		2	2	-	-	3
4.	Study level/ semester at which this course is offered:	Third Year - Second Semester				
5.	Pre –requisite (if any):	Thermodynamics - I				
6.	Co –requisite (if any):	None.				
7.	Program (s) in which the course is offered:	Mechanical Engineering Program.				
8.	Language of teaching the course:	English Language.

9.	Location of teaching the course:	Mechanical Engineering Department.
10.	Prepared By:	Asst. Prof. Dr. Abduljalil Al-Abidi.
11.	Date of Approval:	

II. Course Description:

This course covers irreversibility and combustion. Thermodynamic principles are applied to the analysis of gas power generation cycles, steam power cycles, refrigeration, and air-conditioning systems (including Rankine Cycle, vapor compression cycle, Otto cycle, Diesel cycle, Brayton cycle). Thermodynamic analysis of non-reacting and reacting mixtures of Thermodynamic relations. Mixtures and solutions. Chemical reactions and combustion.

III. Alignments of the Course Intended learning outcomes (CILOs)

Referenced PILOs

a1	Describe the thermodynamics principles of power generation, refrigeration, air-conditioning, and combustion systems.	A.1
a2	Identify general principles of design and analysis of the power generation, refrigeration, air-conditioning, and combustion systems.	A.2
b1	Analyze process involving energy and mass balances of power generation, refrigeration, air-conditioning, and combustion systems .	B.1
b2	Explore the first law, second law of thermodynamics to engineering processes of the power generation, refrigeration, air-conditioning, and combustion.	B.2
c1	Solve problems in the power generation, refrigeration, air-conditioning, and combustion systems	C.1
c2	Calculate efficiency and coefficient of performance of power generation, refrigeration, air-conditioning, and combustion systems	C.2
d1	Evaluate effective communication skill through oral and written modes.	D.1
d2	Justify ideas and work in a team in an efficient and effective manner under controlled supervision or independently.	D.2

Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
a1- Describe the thermodynamics principles of power generation, refrigeration, air-conditioning, and combustion systems.	Lectures, Tutorial. Class Activity, Interactive, Class Discussion. Problem-Based Learning.	Homework and Assignments. Written Tests. (Mid and Final Terms Exam). Coursework Activities. Quizzes.
a2- Identify general principles of design and analysis of the power generation, refrigeration, air-conditioning, and combustion systems.	Lectures, Tutorial Class Activity, Interactive Class Discussion, Exercises and Homework , Problem-Based Learning.	Homework and Assignments. Written Tests. (Mid and Final Terms Exam). Coursework Activities. Quizzes.

(B) Alignment Course Intended Learning Outcomes of Intellectual Skills to Teaching Strategies and Assessment Strategies:		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
b1. Analyze process involving energy and mass balances of power generation, refrigeration, air-conditioning, and combustion systems	Lectures, Tutorial Class Activity, Interactive Class Discussion, Exercises and Homework , Problem-Based Learning.	Homework and Assignments. Written Tests. (Mid and Final Terms Exam). Coursework Activities. Quizzes.
b2. Explore the first law, second law of thermodynamics to engineering processes of the power generation, refrigeration, air-conditioning, and combustion.	Lectures, Tutorial Class Activity, Interactive Class Discussion, Exercises and Homework , Problem-Based Learning.	Home Works and Assignments. Written Tests. (Mid and Final Terms Exam). Coursework Activities. Quizzes.

IV. Course Content:					
A – Theoretical Aspect:					
Order	Units/Topics List	Learning Outcomes	Sub Topics List	Number of Weeks	Contact hours
1.	Gas Power Cycles.	a1,a2,b1.b2, c1,c2 d1,d2	Concepts of Gas Power Cycles and their Applications: Otto cycle, Diesel cycle, Brayton cycle, Jet-propulsion cycles.	3	6
2.	Steam Power Cycles.	a1,a2,b1.b2, c1,c2 d1,d2	Concepts of Vapor Power Cycles and their Applications: Rankine Cycle for Steam Power Plants, Reheat Rankine Cycle, Regenerative Rankine Cycle.	3	6
3.	Refrigeration Cycles.	a1,a2,b1.b2, c1,c2 d1,d2	Concepts of Refrigeration Cycles and their Applications: Refrigerators and Heat Pumps, Vapor-Compression Refrigeration Cycle. Selection of the Right Refrigerant. Heat Pump Systems. Gas Refrigeration Cycles.	1	2
4.	Mid-Term Exam.	a1,a2,b1.b2, c1,c2	The First 3 Chapters.	1	2
5.	Refrigeration Cycles.	a1,a2,b1.b2, c1,c2 d1,d2	Concepts of Refrigeration Cycles and their Applications: Refrigerators and Heat Pumps, Vapor-Compression Refrigeration Cycle. Selection of the Right Refrigerant. Heat Pump Systems. Gas Refrigeration Cycles.	1	2
