

41.Course Specification of Embedded Systems and Interfacing

I.Course Identification and General Information:						
.1	Course Title:	Embedded Systems and Interfacing.				
.2	Course Code & Number:	MT302.				
.3	Credit hours:	C.H.				TOTALCR. HRS.
		Th.	Seminar	Pr.	Tu.	
		2	-	2	-	3
.4	Study Level/ Semester at which this Course is offered:	Fourth Year- First Semester.				
.5	Pre –Requisite (if any):	Electronics (2), Microcontrollers and Microprocessors, Computer Programming (1) and Logic System Design.				
.6	Co –Requisite (if any):	None.				
.7	Program (s) in which the Course is offered:	Mechatronics Engineering Program.				
.8	Language of Teaching the Course:	English Language.				
.9	Location of Teaching the Course:	Mechatronics Engineering Department.				
.10	Prepared by:	Assoc. Prof. Dr. Farouk AL-Fuhaidy.				
.11	Date of Approval:					

II.Course Description:

This course provides students of mechatronics with the principles and fundamental concepts in embedded and interfacing engineering systems. It offers the desired skills for the student to construct and design a complete embedded and interfacing system for various work environments. The course includes the Formal models and specification languages for acquisition and capturing system's behaviors, techniques for timers/interrupts handling and automation functioning, peripheral interfacing, specification, exploration and refinement, system partitioning and hardware/software co-design in assembly/Micro-C programming. Students also gain the knowledge and understanding on the standard tools used for the design, simulation, validation, and verification of embedded and interfacing systems. Laboratory experiments **include** the design, implementation, and programming of embedded, measuring, controlling, and interfacing systems. This course is important for mechatronic systems, and robotics courses.

III.Course Intended learning outcomes (CILOs) of the course		Reference d PILOs
a1.	Describe knowledge of the basic theoretical concepts and applications of standard approaches and computer tools used in the design and implementation of embedded and interfacing systems as a part of mechatronics systems.	A1
a2.	Depict the impact of effective embedded and interfacing systems solutions on society, markets, and industries.	A7
b1.	Create innovative embedded and interfacing solutions for monitoring, interfacing, and automating industrial processes.	B3
b2.	Design useful embedded and interfacing systems considering economic, social, and environmental issues.	B6
c1.	Conduct laboratory and environmental experiments safely to verify theoretical concepts related to embedded and interfacing systems.	C1
c2.	Solve engineering problems related to embedded and interfacing systems using appropriate tools and computer software.	C2
d1.	Co-operate in work as a team leader or a part of a team coherently and share learned knowledge successfully.	D1
d2.	Estimate an awareness of ethical principles while designing embedded and interfacing systems to different environmental issues.	D4

(A) Alignment Course Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:

Prof. Dr. Al-Qassim Mohammed Abbas

- The Use of Communication and Information Technology.
- Problem-Based Learning.
- Case Studies.

VI. Assessment Methods of the Course:

The assessment methods of the course are as follows:

- Written Assessment.
- Short Essays.
- Project Reports.
- Presentations.
- Simulations.
- Practical Assessment.
- Laboratory Reports.
- Case Studies.

VII. Assignments:

Order	Assignments	Aligned CILOs (symbols)	Week Due	Mark
1.	PIC16-Mc assembly programming.	a1, c2	2 nd to 4 th	1.5
2.	Timing and interrupts handling and programming.	a1, a2, b1, c2	5 th to 8 th	3
3.	Data acquisition and interfacing systems and ADC/DAC.	a1, a2, b1, b2, c2	9 th to 11 th	3
4.	Human interfacing and on-chip modules.	a1, a2, b1, b2, c2	12 th to 14 th	3
5.	Serial communication and serial/parallel port.	a1, a2, b1, b2, c2	15 th	1.5
Total				12

VIII. Schedule of Assessment Tasks for Students During the Semester:

Order	Assessment Method	Week Due	Mark	Proportion of Final Assessment	Aligned Course Learning Outcomes
1.	Assignments & Home Works.	2 nd to 15 th	12	8%	a1, a2, b1, b2, c2

2.	Lab. Work and Experiments Reports.	3 rd to 14 th	10	6.67%	c1, c2, d1, d2
3.	Practical Term-Project and Presentation.	3 rd to 14 th	18	12%	a1, a2, b1, b2, c1, c2, d1, d2
4.	Mid-Term Exam (Theoretically).	8 th	10	6.67%	a1, a2, b1
5.	Final Exam (Practically).	14 th	10	6.67%	c1, c2, d1, d2
6.	Final Exam (Theoretically).	16 th	90	60%	a1, a2, b1, b2, c2, d2
Total			150	100%	

IX. Learning Resources:

- Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).

1- Required Textbook(s) (maximum two).

1. Tim Wilmshurst, 2010, Designing Embedded Systems with PIC Microcontrollers Principles and applications, 2nd edition, USA, Elsevier Ltd.
2. Park & Mackay, 2003, Practical Data Acquisition for Instrumentation and Control Systems, UK, Newnes.
3. Kevin James, 2000, PC Interfacing and Data Acquisition: Techniques for Measurement, Instrumentation and Control, UK, Newnes.

2- Essential References.

- 1- Steve Heath, 2002, Embedded Systems Design, 2nd edition , UK, Newnes.
- 2- Programming Embedded Systems in C and C++, Michael Barr, O'Reilly Media,
- 3- John Essick, 2008, Hands On Introduction to LabVIEW for Scientist and Engineers, 1st edition, Oxford University Press, Oxford.
- 4- Travis and Kring, 2006, LabVIEW for Everyone, 1st edition, NJ-USA, Prentice Hall.
- 5- Muhamad Ali Mazidi, 2012, Embedded Systems Design Using PIC18", 1st , NJ-USA, , Prentice Hall.

3- Electronic Materials and Web Sites etc.

- 1- <http://www.ocw.mit.edu/courses>.
- 2- Lecture notes prepared by the Lecturer.

X. Course Policies:

1.	The students should have more than 75 % of attendance according to rules and regulations of the Faculty.	Class Attendance:
2.	Tardy: The students should respect the timing of attending the lectures. They should attend within 10 minutes from starting of the lecture.	
3.		Exam Attendance/Punctuality:

Head of the Department

Prof. Dr. Al-Qassim Mohammed Abbas

8.	Smart Systems and IOT.	<ul style="list-style-type: none"> Introduction to IOT and its relation to Embedded Systems as a recently technology trends and their application in smart rooms, building, and cities. Introduction to Smart Systems like PIC18 and PIC32 Microcontrollers, Raspberry-Pi, and Python Programming. 	15	2
9.	Final-Exam.	All the chapters.	16	2
Number of Weeks /and Units Per Semester			16	32

B - Practical Aspect:				
Order	Tasks/ Experiments	Number of Weeks	Contact Hours	Learning Outcomes
1.	<ul style="list-style-type: none"> Pre-laboratory hardware/lab-view software orientations, embedded and interfacing system's standard simulation software, Exploring features and applications of PIC16F84 and PIC16F877 in embedded and interfacing systems. 	1	2	a1, c2
2.	<ul style="list-style-type: none"> PIC16F84 and PIC16F877 assembly and micro-C programming and interfacing to simple I/O devices, like switches and leds ...etc. Generating delay time using software program and on-chip hardware configuration. 	2,3,4	6	c1, c2, d1
3.	<ul style="list-style-type: none"> Exploring interrupt and timing work and function them using PIC16-Mcs to build automated/control embedded and interfacing systems to monitor some phenomena like motion and self-react to it. 	5,6	4	c1, c2, d1
4.	<ul style="list-style-type: none"> On-Off temperature controller using on-chip ADC. 	7	2	c1, c2, d1
5.	<ul style="list-style-type: none"> Implementing a PID temperature controller using PIC16F877. 	8	2	c1, c2, d1, d2

6.	• Controlling m otors/ a ctuators using ADC/DAC, timers, interrupts and CCP module to build a simple toy derbot/CAR.	9,10	4	c1, c2, d1, d2
7.	• Serial c ommunication experiments to interface external modules/ICs like memory or another m icrocontrollers using USART and MSSP on-chip PIC16 modules.	11	2	c1, c2, d1, d2
8.	• Students work in groups to complete their term projects, present and discuss their suggested embedded and interfacing projects.	12,13	4	a1, a2, b1, b2, c1, c2, d1, d2
9.	Final Practical Exam.	14	2	c1, c2, d1, d2
Number of Weeks /and Units Per Semester		14	28	

VI. Teaching strategies of the course:

The teaching strategies of the course are as follows:

- Active Lectures.
- Independent Learning and Work.
- Group Learning.
- Hands-on Laboratory Work.
- Design Work.
- The Use of Communication and Information Technology.
- Problem-Based Learning.
- Case Studies.

VII. Assignments:

Order	Assignments	Aligned CILOs (symbols)	Week Due	Mark
1.	PIC16-Mc a ssembly programming.	a1, c2	2 nd to 4 th	1.5
2.	Timing and interrupts handling and programming.	a1, a2, b1, c2	5 th to 8 th	3
3.	Data acquisition and interfacing systems and ADC/DAC.	a1, a2, b1, b2, c2	9 th to 11 th	3
4.	Human interfacing and on-chip modules.	a1, a2, b1, b2, c2	12 th to 14 th	3
5.	Serial c ommunication and serial/parallel port.	a1, a2, b1, b2, c2	15 th	1.5

VIII. Schedule of Assessment Tasks for Students During the Semester:					
Order	Assessment Method	Week Due	Mark	Proportion of Final Assessment	Aligned Course Learning Outcomes
1.	Assignments & Home Works.	2 nd to 15 th	12	8%	a1, a2, b1, b2, c2
2.	Lab. Work and Experiments Reports.	3 rd to 14 th	10	6.67%	c1, c2, d1, d2
3.	Practical Term-Project and Presentation.	3 rd to 14 th	18	12%	a1, a2, b1, b2, c1, c2, d1, d2
4.	Mid-Term Exam (Theoretically).	8 th	10	6.67%	a1, a2, b1
5.	Final-Term Exam (Practically).	14 th	10	6.67%	c1, c2, d1, d2
6.	Final-Term Exam (Theoretically).	16 th	90	60%	a1, a2, b1, b2, c2, d2
Total			150	100%	

IX. Learning Resources:	
<ul style="list-style-type: none"> Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher). 	
1- Required Textbook(s) (maximum two).	
	1- Tim Wilmshurst, 2010, Designing Embedded Systems with PIC Microcontrollers Principles and applications, 2 nd edition, USA, Elsevier Ltd. 2- Park & Mackay, 2003, Practical Data Acquisition for Instrumentation and Control Systems, UK, Newnes. 3- Kevin James, 2000, PC Interfacing and Data Acquisition: Techniques for Measurement, Instrumentation and Control, UK, Newnes.
2- Essential References.	
	1- Steve Heath, 2002, Embedded Systems Design, 2 nd edition , UK, Newnes. 2- Programming Embedded Systems in C and C++, Michael Barr, O'Reilly Media, 3- John Essick, 2008, Hands On Introduction to LabVIEW for Scientist and Engineers, 1 st edition, Oxford University Press, Oxford. 4- Travis and Kring, 2006, LabVIEW for Everyone, 1 st edition, NJ-USA, Prentice Hall. 5- Muhamad Ali Mazidi, 2012, Embedded Systems Design Using PIC18", 1 st , NJ-USA, , Prentice Hall.
3- Electronic Materials and Web Sites etc.

1- http://www.ocw.mit.edu/courses .
2- Lecture notes prepared by the Lecturer.

X.Course Policies:	
1.	Class Attendance: The students should have more than 75 % of attendance according to rules and regulations of the Faculty.
2.	Tardy: The students should respect the timing of attending the lectures. They should attend within 10 minutes from starting of the lecture.
3.	Exam Attendance/Punctuality: The student should attend the exam on time. The punctuality should be implemented according to rules and regulations of the faculty for mid-term exam and final exam.
4.	Assignments & Projects: The assignment is given to the students after each chapter, the student has to submit all the assignments for checking on time.
5.	Cheating: If any cheating occurred during the examination, the student is not allowed to continue and he the examination committee for enquiries. has to face
6.	Plagiarism: The student will be terminated from the Faculty, if one student attends the exam on another university. behalf according to the policy, rules and regulations of the
7.	Other Policies: <ul style="list-style-type: none"> All the teaching materials should be kept out the examination hall. The mobile phone is not allowed. There should be a respect between the student and his teacher.
