

## 47. Course Specification of Digital Control Systems

I. Course Identification and General Information:						
1.	Course Title:	Digital Control Systems				
2.	Course Code & Number:	CCE336				
3.	Credit hours:	C.H				Total
		Th.	Tu.	Pr.	Tr.	
		2	-	2	-	
4.	Study level/ semester at which this course is offered:	Fourth Year/ Second Semester				
5.	Pre –requisite (if any):	Analog Control System (CCE332)				
6.	Co –requisite (if any):	None				
7.	Program (s) in which the course is offered:	Computer Engineering and Control Program				
8.	Language of teaching the course:	English				
9.	Location of teaching the course:	Faculty of Engineering				
10.	Prepared By:	Asst. Prof. Dr. Mohammed Abdullah Al-olofi				
11.	Date of Approval					

II. Course Description:
<p>The course aims to provide students with advanced mathematical methods and concepts required in the design of modern control systems to meet the <b>increasing</b> demands in industrial and control applications. Course topics include the basic principles of Digital control systems, Quantization and quantization errors, data acquisitions, Z-transform method, application of Z-transform for solving of the difference equations &amp; Z- plane analysis for discrete time control systems, PID digital controllers, realization and implementation of digital controllers, mapping between continuous–time control systems and discrete-time control systems, stability analysis, transient and steady state response of digital control systems, basic concepts of conventional</p>

Prepared by	Head of Department Asst. Prof. Dr. Adel Ahmed Al-Shakiri	Quality Assurance Unit Assoc. Prof. Dr. Mohammad Algorafi	Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti	Academic Development Center & Quality Assurance Assoc. Prof. Dr. Huda Al-Emad

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

and modern design methods of digital control systems, design based on the root-locus method & bode plot, design based on the frequency response methods, analytical design methods, state space representation of discrete-time control systems, controllability, observability and the observer design & servo-controller. Throughout Lab and computer-based works students will develop the problem-solving skills related to the field of modern control systems for industrial and control issues and applications.

III. Course Intended learning outcomes (CILOs) of the course		Referenced PILOs
a1	Show the concepts and the mathematical modeling of digital feedback control systems in pulse transfer function model and state variable model.	A1
a2	Explain basic principles, components of digital control systems, and application of digital control systems in computer engineering and control.	A2
b1	Evaluate the digital control systems using the modern digital control engineering tools.	B1
b2	Analyze the digital systems and the others components of the digital control products by using the digital control system design methods.	B3
c1	Apply the digital control system hardware & software-based information technology tools to measure, evaluate and solve the computer and control systems performance and problems.	C1
c2	Design the digital controllers and the others components of the digital control systems by using the digital control system design methods.	C2
d1	Work productively as an individual and as a member of a team / multi-disciplinary team.	D1
d2	Prepare and present effective technical reports and presentations.	D4

**IV. Course Content:**

**A – Theoretical Aspect:**

Order	Units/Topics List	Learning Outcomes	Sub Topics List	Number of Weeks	Contact hours
1.	Introduction to discrete- time control systems	a1, a2	Introduction of digital control systems, types of digital control systems, quantization methods, data acquisition.	1	2
2.	The Z-Transform	a1, a2, b1, c2	Introduction, Z-transform, Z-transform of elementary function, properties and theorems of z-transform, Inverse Z-transform, solve the difference equations of digital control systems, example problems and solutions.	1	2
3.	The Z-plane analysis of discrete-time control systems	a1, a2, b1, c2	Impulse sampling and data holding, components of digital control systems, pulse transfer function, reduction block diagram in digital control systems, example problems and solutions.	1	2

Prepared by Head of Department  
 Asst. Prof. Dr. Adel  
 Ahmed Al-Shakiri

Quality Assurance Unit  
 Assoc. Prof. Dr.  
 Mohammad Algorafi

Dean of the Faculty  
 Prof. Dr. Mohammed  
 AL-Bukhaiti

Academic Development  
 Center & Quality Assurance  
 Assoc. Prof. Dr. Huda Al-Emad

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

4.	The Z-plane analysis of discrete-time control systems	a1, a2, b1, c2	PID digital controllers, realization and implementation of digital controllers, microcontroller implementation to digital controllers, select the sampling interval, example problems and solutions.	1	2
5.	Design of discrete-time control systems by the conventional methods	a1, a2, b1, b2, c2	Introduction to design methods, mapping between s-plane and z-plane, example problems and solutions.	1	2
6.	Design of discrete-time control systems by the conventional methods	a1, a2, b1, b2, c2	Transient and steady state response analysis of feedback digital control systems, example problems and solutions..	1	2
7.	Design of discrete-time control systems by the conventional methods	a1, a2, b1, b2, c2	Introduction to conventional design methods, the root locus method, design based the root locus method, example problems and solutions.	1	2
8.	Design of discrete-time control systems by the conventional methods	a1, a2, b1, b2, c2	Frequency response methods, bode plot, design based on the Frequency response methods, example problems and solutions.	1	2

Prepared by Head of Department  
 Asst. Prof. Dr. Adel

 Prof. Dr. Al-Qassim Mohammed Abbas

Order	Tasks/ Experiments	Number of Weeks	Contact hours	Learning Outcomes
1.	Introduction of digital control systems with MATLAB software.	1	2	a1, a2, d1
2.	Discrete-time control systems simulation and Simulink.	1	2	a1, b1, b2, c2, d1, d2
3.	Time-domain digital controller emulation.	1	2	a1, a2, b1, b2, c1, c2, d1, d2
4.	Frequency-domain digital controller emulation.	1	2	a1, a2, b1, b2, c1, c2, d1, d2
5.	Sampling, aliasing, zero-order hold (simulink).	1	2	a1, a2, b1, b2, c1, c2, d1, d2
6.	Discrete-time plant modeling.	1	2	a1, a2, b1, b2, c1, c2, d1, d2
7.	Midterm Practical Exam	1	2	a1, a2, b1, b2,, c1, c2, d1, d2
8.	Root-locus, frequency response design methods for digital controllers.	1	2	a1, a2, b1, b2,c1, c2, d1, d2
9.	Numerical optimal PID digital controller design in matlab program.	1	2	a1, a2, b1, b2,c1, c2, d1, d2
10.	State-space digital controllers design in matlab program.	1	2	a1, a2, b1, b2,c1, c2, d1, d2
11.	Introduction to arduino IDE.	1	2	a1, a2, b1, b2,c1, c2, d1, d2
12.	Implementation the digital controller with microcontroller by using the mikroc and proteus simulation software.	1	2	a1, a2, b1, b2, c1, c2, d1, d2

13.	Review	1	2	a1, a2, b1, b2, c1, c2, d1, d2
14.	Project Presentations: - students works in groups of 2 or 3 peoples for solving some practical problems related to computer and control engineering.	1 (Starting from week No. 3)	2	a1, a2, b1, b2, c1, c2, d1, d2
<b>Number of Weeks /and Units Per Semester</b>		<b>14</b>	<b>28</b>	

### V. Teaching strategies of the course:

In general, teaching and learning in undergraduate engineering education programs should use a variety of teaching methods, such as:

- Active Lectures (supported with discussions).
- Hands on Lab Works,
- Computer-based Lab Works,
- Design Work and Project,
- Homework & Assignments,
- Case Studies
- The Use of Communication and Information Technology.
- Group Learning.

### VI. Assignments:

No	Assignments	Aligned CILOs(symbols)	Week Due	Mark
1.	Problems, and advance problems, and computer problems of the Chapter 2	a1, a2, b1, c1	2 <sup>nd</sup>	1
2.	Problems, and advance problems, and computer problems of the Chapter 3	a1, a2, b1, c1, c2, d1, d2	5 <sup>th</sup>	1

Prepared by

Head of Department  
 Asst. Prof. Dr. Adel  
 Ahmed Al-Shakiri

Quality Assurance Unit  
 Assoc. Prof. Dr.  
 Mohammad Algorafi

Dean of the Faculty  
 Prof. Dr. Mohammed  
 AL-Bukhaiti

Academic Development  
 Center & Quality Assurance  
 Assoc. Prof. Dr. Huda Al-Emad

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

3.	Problems, and advance problems, and computer problems of the Chapter 4	a1, a2, b1, b2, c1, c2, c3, d1, d2	8 <sup>th</sup>	2
4.	Problems, and advance problems, and computer problems of the Chapter 5	a1, a2, b1, b2, c1, c2, c3, d1, d2	12 <sup>th</sup>	2
5.	Problems, and advance problems, and computer problems of the Chapter 6	a1, a2, b1, b2, c1, c2, c3, d1, d2	14 <sup>th</sup>	2
6.	Lab Reports	a1, a2, b1, b2, c1, c2, c3, d1	3 <sup>rd</sup> to 12 <sup>th</sup>	7
<b>Total</b>				<b>15</b>

<b>VII. Schedule of Assessment Tasks for Students During the Semester:</b>					
No.	Assessment Method	Week Due	Mark	Proportion of Final Assessment	Aligned Course Learning Outcomes
1.	Assignments & Reports	3 <sup>rd</sup> to 14 <sup>th</sup>	15	10%	a1, a2, b1, b2, c1,c2, d1, d2
2.	Quizzes	5 <sup>th</sup> , 10 <sup>th</sup> & 14 <sup>th</sup>	10	6.67%	a1, a2, b1, b2, c2, d1
3.	Midterm Exam (Theory)	8 <sup>th</sup>	20	13.33%	a1, a2, b1, b2, c2
4.	Final Lab. Exam (including Course Project Evaluation)	14 <sup>th</sup> & 15 <sup>th</sup>	30	20%	b1, b2, c1,c2, d1, d2
5.	Final Exam (Theory)	16 <sup>th</sup>	75	50%	a1, a2, b1, b2, c2,
<b>Total</b>			<b>150</b>	<b>100%</b>	
<b>VIII. Learning Resources:</b>					
<ul style="list-style-type: none"> <li>Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).</li> </ul>					
<b>1- Required Textbook(s) (maximum two ).</b>					
1. Katsuhiko Ogata, Discrete-time control systems, 2 <sup>nd</sup> Edition, Prentice Hall,2010					

Prepared by      Head of Department      Quality Assurance Unit      Dean of the Faculty      Academic Development  
 Asst. Prof. Dr. Adel      Assoc. Prof. Dr.      Prof. Dr. Mohammed      Center & Quality Assurance  
 Ahmed Al-Shakiri      Mohammad Algorafi      AL-Bukhaiti      Assoc. Prof. Dr. Huda Al-Emad

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

	2. Dogan Ibrahim, microcontroller based applied a digital controller, 1 <sup>st</sup> Edition, john wiley & sons Inc., 2006.
<b>2- Essential References.</b>	
	1. M. Sam Fadali, Digital control systems analysis and design, 1 <sup>st</sup> Edition, Elsevier Inc,2009
<b>3- Electronic Materials and Web Sites etc.</b>	
	1. <a href="http://www.sciencedirect.com/">http://www.sciencedirect.com/</a> 2. <a href="http://dl.acm.org/dl.cfm">http://dl.acm.org/dl.cfm</a> 3. <a href="http://ieeexplore.ieee.org/Xplore/guesthome.jsp">http://ieeexplore.ieee.org/Xplore/guesthome.jsp</a> 4. <a href="http://www.emeraldinsight.com">http://www.emeraldinsight.com</a> 5. <a href="http://www.scopus.com/home.url">http://www.scopus.com/home.url</a> 6. <a href="http://link.springer.com/">http://link.springer.com/</a>

<b>IX. Course Policies:</b>	
<b>1.</b>	<b>Class Attendance:</b> -A student should attend not less than 75 % of total hours of the subject; otherwise he will not be able to take the exam and will be considered as exam failure. If the student is absent due to illness, he/she should bring <b>an approved</b> statement from university Clinic
<b>2.</b>	<b>Tardy:</b> - For late in attending the class, the student will be initially notified. If he repeated lateness in attending class he will be considered as absent.
<b>3.</b>	<b>Exam Attendance/Punctuality:</b> - A student should attend the exam on time. He is Permitted to attend an exam half one hour from exam beginning, after that he/she will not be permitted to take the exam and he/she will be considered as absent in exam.
<b>4.</b>	<b>Assignments &amp; Projects:</b> - The assignment is given to the students after each chapter; the student has to submit all the assignments for checking on time.
<b>5.</b>	<b>Cheating:</b>

Prepared by	Head of Department Asst. Prof. Dr. Adel Ahmed Al-Shakiri	Quality Assurance Unit Assoc. Prof. Dr. Mohammad Algorafi	Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti	Academic Development Center & Quality Assurance Assoc. Prof. Dr. Huda Al-Emad
-------------	----------------------------------------------------------------	-----------------------------------------------------------------	----------------------------------------------------------	-------------------------------------------------------------------------------------

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

	- For cheating in exam, a student will be considered as fail. In case the cheating is repeated three times during his/her study the student will be disengaged from the Faculty.
6.	<b>Plagiarism:</b> Plagiarism is the attending of a student the exam of a course instead of another student. If the examination committee <b>proved</b> a plagiarism of a student, he will be disengaged from the Faculty. The final disengagement of the student from the Faculty should be confirmed from the Student Council Affair of the university.
7.	<b>Other policies:</b> - Mobile phones are not allowed to use during a class lecture. It must be closed, otherwise the student will be asked to leave the lecture room - Mobile phones are not allowed in class during the examination. Lecture notes and assignments my given directly to students using soft or hard copy

**III. Course Description:**

The course aims to provide students with advanced mathematical methods and concepts required in the design of modern control systems to meet the **increasing** demands in industrial and control applications. Course topics include the basic principles of Digital control systems, Quantization and quantization errors, data acquisitions, Z-transform method, application of Z-transform for solving of the difference equations & Z- plane analysis for discrete time control systems, PID digital controllers, realization and implementation of digital controllers, mapping between continuous-time control systems and discrete-time control systems, stability analysis, transient and steady state response of digital control systems, basic concepts of conventional and modern design methods of digital control systems, design based on the root-locus method & bode plot, design based on the frequency response methods, analytical design methods, state space representation of discrete-time control systems, controllability, observability and the observer design & servo-controller. Throughout tutorial and computer-based works students will develop the problem-solving skills related to the field of modern control systems for industrial and control issues and applications.

- IV. Intended learning outcomes (ILOs) of the course:**
- Brief summary of the knowledge or skill the course is intended to develop:
    1. Show the concepts and the mathematical modeling of digital feedback control systems in pulse transfer function model and state variable model.
    2. Explain basic principles, components of digital control systems, and application of digital control systems in computer engineering and control.
    3. Evaluate the digital control systems using the modern digital control engineering tools.
    4. Analyze the digital systems and the others components of the digital control products by using the digital control system design methods.
    5. Apply the digital control system hardware & software-based information technology tools to measure, evaluate and solve the computer and control systems performance and problems.

Prepared by	Head of Department Asst. Prof. Dr. Adel Ahmed Al-Shakiri	Quality Assurance Unit Assoc. Prof. Dr. Mohammad Algorafi	Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti	Academic Development Center & Quality Assurance Assoc. Prof. Dr. Huda Al-Emad
-------------	----------------------------------------------------------------	-----------------------------------------------------------------	----------------------------------------------------------	-------------------------------------------------------------------------------------

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

6. Design the digital controllers and the others components of the digital control systems by using the digital control system design methods.
7. Work productively as an individual and as a member of a team / multi-disciplinary team.
8. Prepare and present effective technical reports and presentations.

**V. Course Content:**

- Distribution of Semester Weekly Plan Of course Topics/Items and Activities.

**A – Theoretical Aspect:**

Order	Topics List	Sub Topics List	Week Due	Contact Hours
1.	Introduction to discrete- time control systems	Introduction of digital control systems, types of digital control systems, quantization methods, data acquisition.	1 <sup>st</sup>	2
2.	The Z-Transform	Introduction, Z-transform, Z-transform of elementary function, properties and theorems of z-transform, Inverse Z-transform, solve the difference equations of digital control systems, example problems and solutions.	2 <sup>nd</sup>	2

8.	Midterm Exam		8 <sup>th</sup>	2
9.	Design of discrete-time control systems by the conventional methods	Frequency response methods, bode plot, design based on the Frequency response methods, example problems and solutions.	9 <sup>th</sup>	2
10.	Design of discrete-time control systems by the conventional methods	Analytical design methods, dead beat response design methods, example problems and solutions.	10 <sup>th</sup>	2
11.	State Space Analysis	state space representation of discrete-time control systems, solving the discrete-time state space equations, design example problems and solutions.	11 <sup>th</sup>	2
12.	Pole placement and observer	Controllability, observability, useful transformations in state space analysis,	12 <sup>th</sup>	2

Prepared by

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

	design (modern design methods)	design example problems and solutions.		
13.	Pole placement and observer design (modern design methods)	Pole placement design method, example problems and solutions.	13 <sup>th</sup>	2
14.	Pole placement and observer design (modern design methods)	observer design method, example problems and solutions.	14 <sup>th</sup>	2
15.	Pole placement and observer design (modern design methods)	Servo-controller design method, example problems and solutions.	15 <sup>th</sup>	2
16.	Final Exam		16 <sup>th</sup>	2
<b>Number of Weeks /and Units Per Semester</b>			<b>16</b>	<b>32</b>

<b>B – Practical Aspect:</b>			
<b>Order</b>	<b>Topics List</b>	<b>Week Due</b>	<b>Contact Hours</b>
1.	Introduction of digital control systems with matlab software.	1 <sup>st</sup>	2
2.	Discrete-time control systems simulation and Simulink.	2 <sup>nd</sup>	2
3.	Time-domain digital controller emulation.	3 <sup>rd</sup>	2
4.	Frequency-domain digital controller emulation.	4 <sup>th</sup>	2
5.	Sampling, aliasing, zero-order hold (simulink).	5 <sup>th</sup>	2
6.	Discrete-time plant modeling.	6 <sup>th</sup>	2
7.	Midterm Practical Exam	7 <sup>th</sup>	2
8.	Root-locus, frequency response design methods for digital controllers.	8 <sup>th</sup>	2

Prepared by      Head of Department      Quality Assurance Unit      Dean of the Faculty      Academic Development

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

9.	Numerical optimal PID digital controller design in matlab program.	9 <sup>th</sup>	2
10.	State-space digital controllers design in matlab program.	10 <sup>th</sup>	2
11.	Introduction to arduino IDE.	11 <sup>th</sup>	2
12.	Implementation the digital controller with microcontroller by using the mikroc and proteus simulation software.	12 <sup>th</sup>	2
13.	Review	13 <sup>th</sup>	2
14.	Project Presentations	14 <sup>th</sup>	2
15.	Final Practical Exam	15 <sup>th</sup>	2
<b>Number of Weeks /and Units Per Semester</b>		<b>15<sup>th</sup></b>	<b>28</b>

## VI. Teaching strategies of the course:

In general, teaching and learning in undergraduate engineering education programs should use a variety of teaching methods, such as:

- Active Lectures (supported with discussions).
- Hands-on Laboratory Work,
- Computer-based Lab Works,
- Homework & Assignments,
- Design Work & Projects,
- Independent Learning and Work.
- Group Learning and Problem-Based Learning.
- The Use of Communication and Information Technology.
- Case Studies.

## VII. Assignments:

No	Assignments	Week Due	Mark
----	-------------	----------	------

 Prof. Dr. Al-Qassim Mohammed Abbas

1.	Problems, and advance problems, and computer problems of the Chapter 2	2 <sup>nd</sup>	1
2.	Problems, and advance problems, and computer problems of the Chapter 3	5 <sup>th</sup>	1
3.	Problems, and advance problems, and computer problems of the Chapter 4	8 <sup>th</sup>	2
4.	Problems, and advance problems, and computer problems of the Chapter 5	12 <sup>th</sup>	2
5.	Problems, and advance problems, and computer problems of the Chapter 6	14 <sup>th</sup>	2
6.	Lab Reports	3 <sup>rd</sup> to 12 <sup>th</sup>	7
<b>Total</b>			<b>15</b>

<b>VIII. Schedule of Assessment Tasks for Students During the Semester:</b>				
Assessment	Type of Assessment Tasks	Week Due	Mark	Proportion of Final Assessment
1.	Assignments & Reports	3 <sup>rd</sup> to 14 <sup>th</sup>	15	10%
2.	Quizzes	5 <sup>th</sup> , 10 <sup>th</sup> & 14 <sup>th</sup>	10	6.67%
3.	Midterm Exam (Theory)	8 <sup>th</sup>	20	13.33%
4.	Final Lab. Exam (including Course Project Evaluation)	14 <sup>th</sup> & 15 <sup>th</sup>	30	20%
5.	Final Exam (Theory)	16 <sup>th</sup>	75	50%
<b>Total</b>			<b>150</b>	<b>100%</b>

<b>IX. Learning Resources:</b>	
<ul style="list-style-type: none"> <li>• <i>Written in the following order: (Author – Year of publication – Title – Edition – Place of publication – Publisher).</i></li> </ul>	
<b>1- Required Textbook(s) (maximum two ).</b>	
<ol style="list-style-type: none"> <li>1. Katsuhiko Ogata, Discrete-time control systems, 2<sup>nd</sup> Edition, Prentice Hall,2010</li> <li>2. Dogan Ibrahim, microcontroller based applied a digital controller, 1<sup>st</sup> Edition, john wiley &amp; sons Inc., 2006</li> </ol>	
<b>2- Essential References.</b>	
<ol style="list-style-type: none"> <li>1. Sam Fadali, Digital control systems analysis and design, 1<sup>st</sup> Edition, Elsevier Inc,2009</li> </ol>	
<b>3- Electronic Materials and Web Sites etc.</b>	
<ol style="list-style-type: none"> <li>1. <a href="http://www.sciencedirect.com/">http://www.sciencedirect.com/</a></li> <li>2. <a href="http://dl.acm.org/dl.cfm">http://dl.acm.org/dl.cfm</a></li> <li>3. <a href="http://ieeexplore.ieee.org/Xplore/guesthome.jsp">http://ieeexplore.ieee.org/Xplore/guesthome.jsp</a></li> <li>4. <a href="http://www.emeraldinsight.com">http://www.emeraldinsight.com</a></li> <li>5. <a href="http://www.scopus.com/home.url">http://www.scopus.com/home.url</a></li> <li>6. <a href="http://link.springer.com/">http://link.springer.com/</a></li> </ol>	

<b>X. Course Policies:</b>	
<b>1.</b>	<p><b>Class Attendance:</b></p> <p>-A student should attend not less than 75 % of total hours of the subject; otherwise he will not be able to take the exam and will be considered as exam failure. If the student is absent due to illness, he/she should bring <b>an approved</b> statement from university Clinic</p>
<b>2.</b>	<p><b>Tardy:</b></p> <p>- For late in attending the class, the student will be initially notified. If he repeated lateness in attending class he will be considered as absent.</p>
<b>3.</b>	<p><b>Exam Attendance/Punctuality:</b></p> <p>- A student should attend the exam on time. He is Permitted to attend an exam half one hour from exam beginning, after that he/she will not be permitted to take the exam and he/she will be considered as absent in exam.</p>

-------------	----------------------------------------------------------------	-----------------------------------------------------------------	----------------------------------------------------------	-------------------------------------------------------------------------------------

Rector of Sana'a University  
 Prof. Dr. Al-Qassim Mohammed Abbas

<b>4.</b>	<p><b>Assignments &amp; Projects:</b></p> <ul style="list-style-type: none"> <li>- The assignment is given to the students after each chapter; the student has to submit all the assignments for checking on time.</li> </ul>
<b>5.</b>	<p><b>Cheating:</b></p> <ul style="list-style-type: none"> <li>- For cheating in exam, a student will be considered as fail. In case the cheating is repeated three times during his/her study the student will be disengaged from the Faculty.</li> </ul>
<b>6.</b>	<p><b>Plagiarism:</b></p> <p>Plagiarism is the attending of a student the exam of a course instead of another student. If the examination committee <b>proved</b> a plagiarism of a student, he will be disengaged from the Faculty. The final disengagement of the student from the Faculty should be confirmed from the Student Council Affair of the university.</p>
<b>7.</b>	<p><b>Other policies:</b></p> <ul style="list-style-type: none"> <li>- Mobile phones are not allowed to use during a class lecture. It must be closed, otherwise the student will be asked to leave the lecture room</li> <li>- Mobile phones are not allowed in class during the examination.</li> </ul> <p>Lecture notes and assignments my given directly to students using soft or hard copy</p>
