

# 6 Course Specification of Descriptive Geometry

	I. Course Identification and General Information:					
1	Course Title:	Descr	iptive Geo	metry		
2	Course Code & Number:	BR006				
		С.Н				Credit
3	Credit hours:	Th.	Tu.	Pr.	Tr.	Hours
		2		2		3
4	Study level/ semester at which this course is offered:	1 <sup>st</sup> Level/1 <sup>st</sup> Semester				
5	Pre –requisite (if any):	NIL				
6	Co -requisite (if any):	NIL				
8	Program (s) in which the course is offered:	Civil Engineering				
9	Language of teaching the course:	English/Arabic				
10	Location of teaching the course:	Engineering Drawing Hall				
11	Prepared By:	Dr. Hamoud Al-Nahary Dr. Adel Al-Shakiri				
12	Date of Approval					

### **II.** Course Description:

This course is one of the basic courses which are important for Students at 1<sup>st</sup> level of study. It improves the imaginary ability of students to help them understand and recognize the different tiles of any engineering object on the engineering sheet. It is a comprehensive study of the graphical solutions to problems, including the following: orthographic projection, points and lines in a space, auxiliary views, planes, parallel and perpendicular lines, intersecting and nonintersecting lines, piercing points, revolutions and the development of surfaces for pattern layout.

Prepared by He

Head of Department Dr. Abdulkareem Yahya Al khattabi Quality Assurance Unit Ass. Prof. Dr. Mohammad Algorafi

Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti

	III. Course Intended Learning Outcomes (CILOs) of the Course	Referenced PILOs
a.1	Demonstrate an elementary understanding of engineering and drafting department practices.	A1
a.2	Demonstrate proficiency in the use of engineering scales (measurement).	A1
a.3	Define the alphabet of lines and demonstrate their use and properties in construction the orthographic projection.	A1
b.1	Demonstrate competence in identifying and understanding the Multiview drawing (orthographic projection).	
b.2	Demonstrate proficiency in the use of vertical Gothic upper- and lower-case lettering.	B1
b.3	Identify with practical proficiency the position of points and lines in space.	Bi
b.4	Demonstrate an understanding and practical proficiency in visualization of parallel and perpendicular lines.	
c.1	Apply of primary and secondary auxiliary views to construct the position of points and lines in space.	C2
c.2	Draw the geometric solids into flat patterns.	C2
c.3	Apply practical consideration in determining the true size and shape of planes and their visibility.	С3
d1	Share homework and assignment with classmate to realize the importance of individual and group work.	D3
d2	Integrate itself using different communication skills	D1

# (A) Alignment Course Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:

Prepared by Head of

Head of Department Dr. Abdulkareem Yahya Al khattabi Quality Assurance Unit Ass. Prof. Dr. Mohammad Algorafi Dean of the Faculty Prof. Dr. Mohammed AL-Bukhaiti

Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
a1- Demonstrate an elementary understanding of engineering and drafting		
department practices	- Active lectures	- Mid and final Terms
<b>a2</b> - Demonstrate proficiency in the use of	- Tutorials	- Homework and
engineering scales (measurement)	- Interactive class	assignment
a3- Define the alphabet of lines and	discussions	
demonstrate their use and properties in		
construction the orthographic projection.		

(B) Alignment Course Intended Learning Outcomes of Intellectual Skills to Teaching Strategies and Assessment Strategies:					
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies			
<b>b.1</b> - Demonstrate competence in identifying and understanding the Multiview drawing (orthographic projection)	<ul><li>Active lectures</li><li>Tutorials</li><li>Class work</li></ul>	- Mid and final Terms - Homework and assignment

I. C	ourse Policies:				
	Unless otherwise stated, the normal course administration policies and rules of the Faculty of				
Engir	neering apply. For the policy, see:				
	Class Attendance:				
1	The students should have more than 75 % of attendance according to rules and				
	regulations of the faculty.				
	Tardy:				
2	The students should respect the timing of attending the lectures. They should attend				
	within 1 minutes from starting of the lecture.				
	Exam Attendance/Punctuality:				
3	The student should attend the exam on time. The punctuality should be implemented				
	according to rules and regulations of the faculty for midterm exam and final exam.				
	Assignments & Projects:				
4	The assignment is given to the students after each chapter, the student has to submit				
	all the assignments for checking on time.				
	Cheating:				
5	If any cheating occurred during the examination, the student is not allowed to				
	continue and he/she has to face the examination committee for enquiries.				
	Plagiarism:				
6	The student will be terminated from the Faculty, if one student attends the exam on				
	another behalf according to the policy, rules and regulations of the university.				
	Other policies:				
7	- All the teaching materials should be kept out the examination hall.				
,	- The mobile phone is not allowed.				
	-There should be a respect between the student and his teacher.

### **III.** Course Description:

This course is one of the basic courses which are important for students at 1<sup>st</sup> level of study. It improves the imaginary ability of Students to help them to understand and recognize the different tiles of any engineering object on the engineering sheet. It is a comprehensive study of the graphical solutions to problems, including the following: orthographic projection, points and lines in a space, auxiliary views, planes, parallel and perpendicular lines, intersecting and nonintersecting lines, piercing points, revolutions and the development of surfaces for pattern layout.

### IV. Intended Learning Outcomes (ILOs) of the Course:

- Brief summary of the knowledge or skill the course is intended to develop:
- **a.1** Demonstrate an elementary understanding of engineering and drafting department practices. A1
- **a.2** Demonstrate proficiency in the use of engineering scales (measurement). A1
- **a.3** Define the alphabet of lines and demonstrate their use and properties in construction the orthographic projection. A1
- **b.1** Demonstrate competence in identifying and understanding the Multiview drawing (orthographic projection). B1
- **b.2** Demonstrate proficiency in the use of vertical Gothic upper- and lower-case lettering. B1
- **b.3** Identify with practical proficiency the position of points and lines in space. B1
- **b.4** Demonstrate an understanding and practical proficiency in visualization of parallel and perpendicular lines. B1
- **c.1** Apply of primary and secondary auxiliary views to construct the position of points and lines in space. C2
- **c.2** Draw the geometric solids into flat patterns. C2
- **c.3** Apply practical consideration in determining the true size and shape of planes and their visibility. C3
- **d.1** Share homework and assignment with classmate to realize the importance of individual and group work.
- **d.2** Integrate itself using different communication skills D1
