

## 66. Elective 2

### Course Specification of Introduction to Robotics

<b>I. Course Identification and General Information:</b>						
1.	Course Title:	Introduction to Robotics (Elective Course)				
2.	Course Code & Number:	ME328				
3.	Credit hours:	C.H				TOTAL CR. Hrs.
		Th.	Seminar/Tu	Pr	Tr.	
		2	--	--	--	
4.	Study level/ semester at which this course is offered:	Fourth Year- Second Semester				
5.	Pre –requisite (if any):	Technical Writing, Engineering Mechanics – Statics , Mechanics of Machines.				
6.	Co –requisite (if any):	None				
7.	Program (s) in which the course is offered:	Mechanical Engineering Program.				
8.	Language of teaching the course:	English Language.				
9.	Location of teaching the course:	Mechanical Engineering Department.				
10	Prepared By:	Asst. Prof. Dr. Hatem Al-Dois.				
11	Date of Approval:					

### **II. Course Description:**

This course is an introductory course to robotics. Students in this course will learn robot terminology, different types and configurations of robots, structure and main components, essential concepts and skills of programming and control, and applications of robots. Proper robot safety procedures will be emphasized throughout the study. The course is examined with assignments, quizzes, mid and final exams.

Head of  
 Department  
 Asst. Prof. Dr.  
 Adel Ahmed  
 Al-Shakiri

Quality Assurance  
 Unit  
 Assoc. Prof. Dr.  
 Mohammad  
 Algorafi

Dean of the Faculty  
 Prof. Dr. Mohammed  
 AL-Bukhaiti

 Development  
 Center & Quality  
 Assurance  
 Assoc. Prof. Dr.  
 Huda Al-Emad

Rector of Sana'a  
 University  
 Prof. Dr. Al-Qassim  
 Mohammed Abbas

III. Alignment course intended learning outcomes (CILOs)		Referenced PILOs
a1	<b>Outline</b> systematically the structure of a robotic manipulator and the operation of its main components.	<b>A1</b> Demonstrate knowledge & understanding of Mathematics, Science, and Engineering relevant to Mechanical Engineering.
a2	Identify safety considerations during installation, maintenance, programming, automatic operations of robotic systems.	<b>A.3</b> Explain the principles of different mechanical systems and their effects on global environment and societal contexts.
b1	Locate the main components of the robot including the controller, manipulator arm, teach pendant, standard operator panel, sensors, actuators, and end-of-arm-tooling or vacuum components.	<b>B1</b> Apply the principles of engineering, basic science and mathematics to model, analyze, design, and realize physical systems, components or processes in innovative ways.
b2	Classify robotic systems according to their application, control system, arm geometry, actuators and sensors used, and end-of-arm tooling.	<b>B2</b> Design the Mechanical systems or processes within realistic constraints such as economic, environmental, social, political, ethical, health and safety, manufacturability and sustainability.
c1	Write programs to perform various complex tasks and motions of robotic systems.	<b>C1</b> Use the various techniques, skills, equipment and modern engineering tools and methods necessary for Mechanical Engineering practice.
d1	Search the literature for different information related to the given assignments in robotics.	<b>D.4</b> Perform searches of literature, use databases, as well as, evaluate information and evidence from various sources.

4	Final Exam	16 <sup>th</sup> week	60	60 %	a1, a2, b1, b2
<b>Total</b>			<b>100</b>	<b>100 %</b>	

## IX. Learning Resources:

- *Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).*

### 1- Required Textbook(s) (maximum two ).

1. Groover, M. P., Weiss, M., Nagel, R. N., and Odrey, N. G. , 1986, Industrial Robotics, Technology, Programming, and Applications. New Delhi: McGraw-Hill.
2. Saeed Niku, 2002, Introduction to Robotics: Analysis, Systems, Applications, 1<sup>st</sup> Edition, NJ, Prentice Hall.

### 2- Essential References.

1. Spong, M. W., & Vidyasagar, M., 2004, Robot Dynamics and Control, NY, Wiley.
2. Mittal, R. K., & Nagrath, I. J., 2008, Robotics and Control. New Delhi, India: Tata McGraw-Hill.
3. Lung-S-Wen Tsai, 1999, Robot Analysis, NY, John Wiley & Sons, Inc.
4. K.S. Fu, R.C. Gonzalez, and C.S.G. Lee, 1987, Robotics: Control, Sensing, Vision and Intelligence, NY, McGrawHill.
5. H.Asada and J. Slotive, 1986, Robot Analysis and Control, NY, John Wiley & Sons.
6. Lynch and Park, 2017, Modern Robotics, Cambridge, Cambridge University Press.
7. Thrun, Burgard, and Fox, 2005, Probabilistic Robotics, USA, MIT Press.

### 3- Electronic Materials and Web Sites etc.

1. Teaching ROBOTC for Innovation First Robots, Carnegie Mellon Robotics Academy. [http://www.robotc.net/vex\\_full/](http://www.robotc.net/vex_full/).
2. Introduction to Robotics Course (2DD2410) - KTH <https://www.kth.se/social/course/DD2410/>

<b>X. Course Policies:</b>	
	<b>Class Attendance:</b>
1.	The students should have more than 75 % of attendance according to rules and regulations of the Faculty.
	<b>Tardy:</b>
2.	The students should respect the timing of attending the lectures. They should attend within 10 minutes from starting of the lecture.
	<b>Exam Attendance/Punctuality:</b>
3.	The student should attend the exam on time. The punctuality should be implemented according to rules and regulations of the faculty for mid-term exam and final exam.
	<b>Assignments &amp; Projects:</b>
4.	The assignment is given to the students after each chapter, the student has to submit all the assignments for checking on time.
	<b>Cheating:</b>
5.	If any cheating occurred during the examination, the student is not allowed to continue and he has to face the examination committee for <b>enquiries</b> .
	<b>Plagiarism:</b>
6.	The student will be terminated from the Faculty, if one student attends the exam on another behalf according to the policy, rules and regulations of the university.
	<b>Other policies:</b>
7.	<ul style="list-style-type: none"> <li>• All the teaching materials should be kept out the examination hall.</li> <li>• The mobile phone is not allowed.</li> <li>• There should be a respect between the student and his teacher.</li> </ul>

### III. Course Description:

This course is an introductory course to robotics. Students in this course will learn robot terminology, different types and configurations of robots, structure and main components, essential concepts and skills of programming and control, and applications of robots. Proper robot safety procedures will be emphasized throughout the study. The course is examined with assignments, quizzes, mid and final exams.

### IV. Intended learning outcomes (ILOs) of the course:

- Brief summary of the knowledge or skill the course is intended to develop:
  - 1- **Outline** systematically the structure of a robotic manipulator and the operation of its main components.
  - 2- Identify safety considerations during installation, maintenance, programming, automatic operations of robotic systems.
  - 3- Locate and identify the main components of the robot including the controller, manipulator arm, teach pendant, standard operator panel, sensors, actuators, and end-of-arm-tooling or vacuum components.
  - 4- Classify robotic systems according to their application, control system, arm geometry, actuators and sensors used, and end-of-arm tooling.
  - 5- Write programs to perform various complex tasks and motions of robotic systems.
  - 6- Search the literature for different information related to the given assignments in robotics.
