Sana'a University
Faculty of Engineering
Mechatronics Engineering Department
Mechatronics Engineering Program

Elective Course (1)
Course Specification of Renewable Energy Technology

I. Course Identification and General Information:

1.	Course Title:	Renewable Energy Technology.				
2.	Course Code & Number:	MT310.				
3.	Credit hours:	C.H.				TOTAL C.R. Hrs.
		Th.	Seminar	Pr	Tu.	
		2	-	-	2	3
4.	Study level/ semester at which this course is offered:	Fourth Year -Second Semester.				
5.	Pre –requisite (if any):	Mathematics, Physics ,Thermodynamics and Heat Transfer.				
6.	Co –requisite (if any):	-				
7.	Program (s) in which the course is offered:	Mechatronics Engineering Department.				
8.	Language of teaching the course:	English Language.				
9.	Location of teaching the course:	Mechatronics Engineering Department..				
10.	Prepared By:	Associate Prof. Dr. Abdul-Malik Momin.				
11.	Date of Approval:					

II. Course Description:

Since 1973, in the wake of energy crisis, scientists started looking for renewable energy sources especially the solar energy. Interest in the use of renewable energy has grown during the past few years. The design and implementation of renewable energy based technologies and their integration with existing technologies and distribution system for example how the orientation should be towards the fundamentals of Energy Science and Technology.

Prepared by	Head of Department	Quality Assurance Unit	Dean of the Faculty	Academic Development Center & Quality Assurance
Ass. Prof. Dr. Abdul-Malik Momin	Ass. Prof. Dr. Abdul-Malik Momin	Ass. Prof. Dr. Mohammad Algorafi	Prof. Dr. Mohammed AL-Bukhaiti	Ass. Prof. Dr. Huda Al-Emad

Rector of Sana'a University
Prof. Dr. Al-Qassim Mohammed Abbas

This introductory course of Renewable Energy Technology will provide in-depth understanding of the technology, applications, economics and policies relevant to each type of energy source. In this course, an overview of various renewable energy technologies and sustainable design practices and their current applications will be taken as: the details of Solar Thermal Energy, Solar Photovoltaics, Wind, Geothermal Energy, Hydro, Wave and Tidal. Emphasis will be placed on energy production efficiency and conservation. This course would review the renewable sources and their need in world energy scenario. The course also includes a research project in which students would be required to do a detailed literature survey analysis taking into account economics of power generation and cost performance and reliability.

III.Course Intended learning outcomes (CILOs) of the course		**Referenced PILOs**
a1.	Label different engineering management principles and their developments.	A5
a2.	Depict the impact on society.	A7
b1.	Analyze problems with the support of the renewable energy technology.	B1
b2.	Explore innovative solutions to support industrial applications.	B3
b3.	Combine fundamental parameters to reach to standard products.	B5
c1.	Solve engineering problems with the support of the software related to the subject (for example homer).	C2
c2.	Implement feasibility studies.	C4
d1.	Co-operate with team members to share different knowledge.	D1
d2.	Assess to tasks with the support of the different resources.	D3
d3.	Evaluate technical reports.	D6

Prepared by	Head of Department	Quality Assurance Unit	Dean of the Faculty	Academic Development Center & Quality Assurance
Ass. Prof. Dr. Abdul-Malik Momin	Ass. Prof. Dr. Abdul-Malik Momin	Ass. Prof. Dr. Mohammad Algorafi	Prof. Dr. Mohammed AL-Bukhaiti	Ass. Prof. Dr. Huda Al-Emad

Rector of Sana'a University
Prof. Dr. Al-Qassim Mohammed Abbas

(A) Alignment Course Intended Learning Outcomes of Knowledge and Understanding to Teaching Strategies and Assessment Strategies:		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
a1. Complete data collection.	• Active Lectures. • Tutorials.	• Written Assessment. • Short Essays.
a2. Depict the impact on society.	• Active Lectures.	• Presentation.

(B) Alignment Course Intended Learning Outcomes of Intellectual Skills to Teaching Strategies and Assessment Strategies:		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
b1. Analyze problems with the support of the renewable energy technology.	• Design Work and Project. • Case Studies	• Practical Assessment. • Reports.
b2. Explore innovative solutions to support industrial applications.	• The use of computer and web-based learning. • Case Studies.	• Practical Assessment. • Project Reports.
b3. Combine fundamental parameters to reach to standard products.	• Active Lectures. • Case studies.	• Practical Assessment. • Presentations.

© Alignment Course Intended Learning Outcomes of Professional and Practical Skills to Teaching Strategies and Assessment Strategies:		
Course Intended Learning Outcomes	Teaching strategies	Assessment Strategies
c1. Solve engineering problems with the support of the software.	• Active Lectures. • The use of computer and web-based learning	• Reports. • Presentations.
c2. Implement feasibility studies.	• Active Lectures	• Reports.

Prepared by	Head of Department	Quality Assurance Unit	Dean of the Faculty	Academic Development Center & Quality Assurance

Ass. Prof. Dr. Huda Al-Emad

Rector of Sana'a University
Prof. Dr. Al-Qassim Mohammed Abbas

3.	Final Exam.	16	105	70 %	a1, b1, b2, b3, c1.
Total			**150**	**100%**	

VIII. Learning Resources:

- Written in the following order: (Author - Year of publication – Title – Edition – Place of publication – Publisher).

1- Required Textbook(s) (maximum two).

1. S.P. Sukhumi, 1998, Solar Energy-Principles of Thermal Collection and Storage, Se Edition, Tata McGraw Hill.
2. Dr. P.C. Sharma, 2000, Power Plant Engineering, Sixth Edition, S.K. Katarina and Son
3. P.K. Nag, 2008, Power Plant Engineering, Third Edition, Tata McGraw Hill.

2- Essential References.

1. John A. Duffy and William A. Beckman, 1980, Solar Engineering of Thermal Processe Second Edition, John Wiley & Sons Inc.

3- Electronic Materials and Web Sites *etc*.

1. www.environmentalsciencedegree.com.
2. www.irena.org.
3. www.renewable-technology.com

IX. Course Policies:

1.	**Class Attendance:** - The students should have more than 75% of attendance according to rules and regulations of the faculty.
2.	**Tardy:** - The students should respect the timing of attending the lectures. They should attend within 15 minutes from starting of the lecture.

Prepared by	Head of Department	Quality Assurance Unit	Dean of the Faculty	Academic Development Center & Quality Assurance
Ass. Prof. Dr. Abdul-Malik Momin	Ass. Prof. Dr. Abdul-Malik Momin	Ass. Prof. Dr. Mohammad Algorafi	Prof. Dr. Mohammed AL-Bukhaiti	Ass. Prof. Dr. Huda Al-Emad

Rector of Sana'a University
Prof. Dr. Al-Qassim Mohammed Abbas

3.	**Exam Attendance/Punctuality:** - The student should attend the exam on time. The punctuality should be implemented according to rules and regulations of the faculty for mid-term exam and final exam.
4.	**Assignments & Projects**: - The assignment is given to the students after each chapter; the student has to submit all the assignments for checking on time.
5.	**Cheating:** - If any cheating occurred during the examination, the student is not allowed to continue and he has to face the examination committee for enquires.
6.	**Plagiarism:** - If one student attends the exam on another behalf; he will be dismissed from the faculty according to the policy, rules and regulations of the university.
7.	**Other policies:** - All the teaching materials should be kept out the examination hall and mobile phones are not allowed. - Mutual respect should be maintained between the student and his teacher and also among students. Failing in keeping this respect is subject to the policy, rules and regulations of the university.
