د. رقية علي العماد

- 1) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
- Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
- Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
- These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.
- Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

Which was not one of the problems with the first metal detectors?

- 1) + They were unsafe.
- 2) - They were too expensive.
- 2) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the

beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.

Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.

Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.

Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.

These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.

Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

Which best describe the main idea of the second paragraph?

- 1) - It explains how metal detector work.
 - 2) - It warns about the effects of metal detectors.
 - 3) It explains how magnetic waves move.
- 3) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People

kept trying to make them better.

Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.

Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.

These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.

Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

How do metal detectors makes clothing safer?

- 1) - Metal detector help people recover lost clothing at the beach
- 2) - Metal detector make sure workers do not bring weapons in the factories.
- 3) + Metal detector make sure that broken needles do not get into clothing.
- 4) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer.

It sounds funny, but it is true.

Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

Why do people bring metal detectors to the beach?

- 1) - Students may be bored.
- 2) + Metal detectors help people find valuable items.
- 3) - Metal detectors create magnetic waves.
- 4) - Metal detectors help people keep the sand clean and safe.

5) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.

Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.

Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.

Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.

These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.

Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

How did metal detectors get better over time?

- 1) - They began working better.
- 2) - They became cheaper.
- 3) All of these.

- 6) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
- Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
- Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
- These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.
- Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

Which happen first?

- 1) - The magnetic wave hit metal and change.
- 2) + The metal detectors create magnetic waves.
- 3) - The magnetic waves go through the ground.

- 7) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
- Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
- Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
- These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.
- Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

Which title would best describe the purpose of this text?

- 1) - Magnetism and More: How a Metal Detector Works
- 2) - Metal Detectors: What They Do and How We Use them
- 3) + Metal Detec+C36tor to Find Things

- 8) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
- Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
- Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
- These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.
- Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

According to the text, metal detectors have been used in all the following EXCEPT which?

- 1) - airport
- 2) - schools
- 3) + churches

- 9) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
- Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
- Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
- These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.
- Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

Why were metal detectors first used?

- 1) + to help miner
- 2) - to help security guards
- 3) - to help soldiers

- 10) Read the passage about Metal Detectors and answer the following questions: Have you ever been to the beach? Did you see a man with a headset pointing a long pole at the ground? If you might have seen person using a metal detector. People use these devices to find metal.
- Metal detectors make magnetic waves. These waves go through the ground. The waves change when they hit metal. Then the devices know that metal is close. The first metal detectors were meant to help miners. They were big. They cost a lot of money. They used a lot of powder. And worst of all, they didn't work well. People kept trying to make them better.
- Metal detector gets smaller. Now they are light and cheap. They also work better. That is why people bring them to the beach. They can look for rings in the water. They can look for phones in the sand. Metal detectors help them find these things. They usually just find junk though.
- Metal detectors also protect people. They help to keep guns out of some places. They are in airports they are in the courthouses. Some schools use them. They help guards look for weapons. Guards use special wards to find metal on a person.
- These devices save lives in other ways too. During war. People plant bombs in the ground. When the war ends, they do not clean up their messes. This is unsafe for the people who live in those places. Other use metal detectors to find bombs. They remove them and help the people. These devices also make clothes safer. It sounds funny, but it is true.
- Most clothes are made in big factories. There are lots of needles in these places. Needles break from time to time. They get stuck in the clothes. They would poke people trying them on. They would poke people trying them on. They do not though. That is because our clothes are scanned for metal detectors. They make the world a safer place.

How do metal detectors help soldiers?

- 1) - They find weaknesses in their armor.
 - 2) They help soldiers find hidden bombs.
 - 3) - They wore soldiers when bullets are coming.
- 11) The course for the Tour de France is "altered"----- every year, but it is always about 4,000 kilometers.
- 1) - measured
 - 2) changed
 - 3) - marked
- 12) The course is "designed"----- to travel through towns, up steep mountains, and across flat lands.
- 1) - located
 - 2) - expected
 - 3) planned
- 13) Riders come from all over Europe as well as from "overseas " to take part in the 22-day race-----
- 1) other continents
 - 2) - oceans
 - 3) - islands.
- 14) The rider who has the fastest race time in all of the stages is the overall winner. Armstrong is the only " individual" ----- to win seven Tour de France competitions.
- 1) person
 - 2) - man
 - 3) - foreigner
- 15) The " framework" ----- of modern racing bicycle is made of lightweight steel, aluminum, titanium and carbon fiber tubes.
- 1) structure
 - 2) - mechanism
 - 3) - wheel
- 16) I couldn't "access " ----- my email.
- 1) use
 - 2) - send

- 3) - understand
- 17) The relationship between the word 'bouquet' and 'flower' is -----.
- 1) part
 - 2) - synonym
 - 3) - action
- 18) Riders must be good athletes to meet the physical demands that are an "inherent "-----part of a long race.
- 1) natural
 - 2) - dangerous
 - 3) - unexpected
- 19) The doctor tries to "minimize" -----the pain,when the rider is "injurid ".
- 1) lessen/ hurt
 - 2) - lessen/ sick
 - 3) - few/ hurt
- 20) The relationship between the words 'direct' and 'implicit' is -----C85
- 1) - synonym
 - 2) antonym
 - 3) - action
- 21) The relationship between the words 'bus' and 'vehicle' is -----
- 1) synonym
 - 2) - antonym
 - 3) - action
- 22) The relationship between the words 'spend' and 'money+C96' is -----
- 1) - antonym
 - 2) - synonym
 - 3) action
- 23) Jon was ----- that everyone was watching him.
- 1) aware of
 - 2) - success
 - 3) - dominance
- 24) The relationship between the words 'manage' and 'administer' is -----
- 1) action
 - 2) - synonym
 - 3) - antonym
- 25) Both countries ----- in various domains.
- 1) differentiates
 - 2) - different
 - 3) - revolution
