I. Course Identification and General Information:

1	Course Title	Medicinal Chemistry II				
2	Course Number & Code:	Ph579				
3	Credit hours:	C.H				Total
		Th.	Pr.	Tr.	Seminar.	
		2	2			3
4	Study level/ semester at which this course is offered:	4 th level /1 st semester				
5	Pre –requisite (if any):	Pharmaceutical analytical chemistry I&II and pharmaceutical organic chemistry I, II& III and Medicinal Chemistry I				
6	Co –requisite (if any):	Pharmacology III				
7	Program (s) in which the course is offered:	Bachelor of pharmacy				
8	Language of teaching the course:	English				
9	The department in which the course is offered:	Department of Medicinal Chemistry, Pharmaceutical Organic and Analytical Chemistry				
10	Location of teaching the course:	Faculty of pharmacy- Sana`a University				
11	Prepared by:	Associate Prof. Tawfeek Ahmed Alobaidy				
12	Date of approval:					

II. Course description:

The course is concerned with the providing of fundamental knowledge about the synthesis, metabolism, physicochemical properties and their effect on pharmacokinetic and pharmacodynamic profile of drug. The practical part includes the qualitative and quantitative determination and synthesis of some drugs in this course.

II. Intended learning outcomes (ILOs) of the course:

At the end of this course the students should be able to:

1. Recognize the structural mechanism of action of studied classes of drugs
2. Recognize the synthesis of some studied classes of drugs
3. Illustrate the structure activity relationship (SAR) of each category in the course.
4. Discuss the metabolism and toxicity of studied classes of drugs.
5. Recognize the stereochemistry in drug structure and their effect on pharmacokinetic and pharmacodynamic profile of the drugs.
6. Identify the pharmacophores and toxicophores in the structure and their effect on pharmacokinetic and pharmacodynamic properties of the drugs.
7. Predict the metabophores in the drug structure that are responsible for metabolism in the biological system.
8. Analyze the result of experimental tests that is practiced for some studied drugs
9. Design and evaluate qualitative and quantitative analysis of some drugs
10. Handle and dispose the chemical and pharmaceutical preparations safely and effectively.
11. Carry out synthesis some drugs.
12. Determine the quantitative analysis of some drugs.
13. Practice the qualitative analysis of some drugs.
14. Communicate and cooperate effectively with his colleagues and other specialist to engage in teamwork planning and team processes.
15. Implement writing and presentation skills and demonstrate creativity and time management.
16. Use technology and technology efficiently to perform the required tasks in field of medicinal chemistry.

1- Accommodation:
Well-equipped lecture halls with data show facilities, whiteboards, internet connection, etc.
Well-equipped laboratories with all required equipment and reagents.

2- Computing resources: Computer laboratory with internet facilities.

II. Course Improvement Processes:

1- Strategies for obtaining student feedback on effectiveness of teaching

- Student-based assessment of the effectiveness of teaching using a questionnaire designed by the Quality Assurance Unit at the end of the semester.
- Meeting with students and faculty (once per semester).

2- Other strategies for evaluation of teaching by the instructor or by the department.

- Assessment of the course syllabus and contents by the teachers using a questionnaire designed by the Quality Assurance Unit of the university at the end of the semester.
- Regular meeting and discussion of the course content between the Head of Department and the teaching staff of the course (for theory and practice).

3- Processes for improvement of teaching.

- Revision of the course specification and its teaching strategies every three academic years after consideration of all issues raised by the teachers and/or students during regular meetings and discussions.
- Exploring any possible defects in the course that might be encountered by the teaching staff and their mitigation in subsequent improved versions of course specification.

4- Processes for verifying standards of students' achievement

- Checking of a sample of students' work by an independent faculty member.
- Periodic exchange and check marking of a sample of students' assignments with a faculty member from another institution.
- Adoption of scoring rubrics to assess the students' achievement (both for ongoing or summative

X

	assessments). ▪ Regular follow-up of laboratory logbooks to assess the practical achievement of students.
5th Procedures for periodically reviewing of course effectiveness and planning for improvement	
	▪ Student rating and feedback ▪ Peer rating and feedback ▪ Regular meeting of the Curriculum Committee of the faculty.
6- Course development plans	
	▪ Conducting regular workshops for the staff for improving their course specification skills. ▪ Regular revision of course specification and syllabus items.

XIII. Course Policies: (including plagiarism, academic honesty, attendance etc)	
The University Regulations on academic misconduct will be strictly enforced. Please refer to -----	
1	Class Attendance: ▪ Attendance of all lectures and practical sessions is required. Unexcused absence exceeding 25% of the lectures or practical sessions will disqualify the student from entering the final exam.
2	Tardy: - Roll will be called in the very beginning of each lecture and practical class. Retardation for more than three weeks without a reasonable excursion, the student involved shall not be allowed to attend the class any longer and consequently shall be considered to be absent.
3	Exam Attendance/Punctuality: ▪ Exam attendance is obligatory unless being excused by the department and faculty. ▪ Absence from assignments or exams will be dealt with according to the general policy of the university.

- 5- Recognize the stereochemistry in drug structure and their effect on pharmacokinetic and pharmacodynamic profile of the drugs.
- 6- Identify the pharmacophores and toxicophores in the structure and their effect on pharmacokinetic and pharmacodynamic properties of the drugs.
- 7- Predict the metabophores in the drug structure that are responsible for metabolism in the biological system.
- 8- Analyze the result of experimental tests that is practiced for some studied drugs
- 9- Design and evaluate qualitative and quantitative analysis of some drugs
- 10- Handle and dispose the chemical and pharmaceutical preparations safely and effectively.
- 11- Carry out synthesis some drugs.
- 12- Determine the quantitative analysis of some drugs.
- 13- Practice the qualitative analysis of some drugs.
- 14- Communicate and cooperate effectively with his colleagues and other specialist to engage in teamwork planning and team processes.
- 15- Implement writing and presentation skills and demonstrate creativity and time management.
- 16- Use technology and technology efficiently to perform the required tasks in field of medicinal chemistry.

6- Strategies for obtaining student feedback on effectiveness of teaching

- Student-based assessment of the effectiveness of teaching using a questionnaire designed by the Quality Assurance Unit at the end of the semester.
- Meeting with students and faculty (once per semester).

7 Other strategies for evaluation of teaching by the instructor or by the department.

- Assessment of the course syllabus and contents by the teachers using a questionnaire designed by the Quality Assurance Unit of the university at the end of the semester.
- Regular meeting and discussion of the course content between the Head of Department and the teaching staff of the course (for theory and practice).

8- Processes for improvement of teaching.

- Revision of the course specification and its teaching strategies every three academic years after consideration of all issues raised by the teachers and/or students during regular meetings and discussions.
- Exploring any possible defects in the course that might be encountered by the teaching staff and their mitigation in subsequent improved versions of course specification.

9- Processes for verifying standards of students' achievement

- Checking of a sample of students' work by an independent faculty member.
- Periodic exchange and check marking of a sample of students' assignments with a faculty member from another institution.
- Adoption of scoring rubrics to assess the students' achievement (both for ongoing or summative assessments).
- Regular follow-up of laboratory logbooks to assess the practical achievement of students.

10- Procedures for periodically reviewing of course effectiveness and planning for improvement
