

Course Specification of Sterile Preparations

I. Course Identification and General Information:					
1	Course Title:	Sterile Preparations			
2	Course Number & Code:	Ph2713			
3	Credit hours:	C.H			Total
		Theoretical	Practical	Training	
		1			
4	Study level / semester at which course is offered:	Level: - Fourth years/ First Semester			
5	Pre –requisite (if any):	Pharmaceutics I,II,III and IV			
6	Co –requisite (if any):	-			
7	Programs in which course is offered:	Bachelor of pharmacy			
8	Language of teaching the course:	English			
9	Department in which course is offered:	Pharmaceutics and Industrial Pharmacy			
10	Location of teaching the course:	Faculty of Pharmacy- Sana`a university			
11	Prepared by:	Prof. Dr. Maged Alwan			
12	Date of approval:				

II. Course description:

Upon successful completion of the course, the students should be able to Recognize liquid dosage forms, sterile products, specification of radiopharmaceutical products, design and additives maintaining the stability, bioavailability of drug and quality attributes of the selected products.

III. Intended learning outcomes (ILOs) of the course:

At the end of this course, the students will be able to:

- Recognize sterile products such injectable and ocular preparations according the cGMP regulation
1. Explain knowledge of radiopharmaceutical formulations
2. Recognize the role of formulation design and additives in maintaining the stability of the dosage forms and the bioavailability of drug.
3. Discuss the quality attributes of the selected products.
4. Select the best liquid forms, additives and packaging to enhance the stability of pharmaceutical solutions, suspensions and other disperse systems
5. Predict instability problems in selected products and suggest solutions for these problems.
6. Adjust the quality attributes of sterile pharmaceuticals.
7. Analyze stable effective liquid dosage form.
8. Examine the best method for sterilization of different pharmaceutical products.
9. Assess the quality attributes of liquid dosage forms and packaging.
10. Examine the necessary quality control tests of parenteral and other sterile products according to the cGMP regulation.
11. Work independently and in groups
12. Retrieve and evaluate information from different sources.

IV. Intended learning outcomes (ILOs) of the course:

(A) Knowledge and Recognizing:

Alignment of Course Intended Learning Outcomes (CILOs) to Program Intended Learning Outcomes (PILOs) in: **Knowledge and Recognizing.**

Program Intended Learning Outcomes (Sub-PILOs) in: Knowledge and Recognizing		Course Intended Learning Outcomes (CILOs) in: Knowledge and Recognizing	
After completing this program, students will be able to:		After completing this course, students will be able to:	
A4-	Recognize the pharmaceutical dosage form design and the quality control of pharmaceutical formulations according to	a1-	Recognize sterile products such injectable and ocular preparations according the cGMP regulation.

GMP and pharmacopeial requirements to support the pharmaceutical industries.	a2-	Explain knowledge of radiopharmaceutical formulations
	a3	Recognize the role of formulation design and additives in maintaining the stability of the dosage forms and the bioavailability of drug.
	a4	Discuss the quality attributes of the selected products

Teaching And Assessment Methods For Achieving Learning Outcomes:

Alignment of Learning Outcomes of Knowledge and Recognizing to Teaching and Assessment Methods:

Course Intended Learning Outcomes (CILOs) in Knowledge and Recognizing		Teaching strategies/methods to be used	Methods of assessment
completing this course, students will be able to:		<ul style="list-style-type: none"> Lectures brainstorming and discussion 	<ul style="list-style-type: none"> Attendance Written and oral exams Quiz and Small Projects
a1-	Recognize sterile products such injectable and ocular preparations according the cGMP regulation.		
a2-	Explain knowledge of radiopharmaceutical formulations		
a3	Recognize the role of formulation design and additives in maintaining the stability of the dosage forms and the bioavailability of drug.		
a4	Discuss the quality attributes of the selected products		

(B) Intellectual Skills:

Alignment of Course Intended Learning Outcomes (CILOs) to Program Intended Learning Outcomes (PILOs) in: Intellectual skills

Program Intended Learning Outcomes (Sub-PILOs) in Intellectual skills	Course Intended Learning Outcomes (CILOs) of Intellectual Skills
After completing this program, students will be able to:	After completing this course, students will be able to:

B3-	Design different types of safe and effective pharmaceutical dosage forms and develop novel methods of analysis for pharmaceutical and biopharmaceutical products that support pharmaceutical research.	b1-	Select the best liquid forms, additives and packaging to enhance the stability of pharmaceutical solutions, suspensions and other disperse systems.
B5-	Interpret the prescriptions, patient and clinical data, Analysis all the encountered	b2-	Predict instability problems in selected products and suggest solutions for these problems.
	pharmaceutical problems and plan the strategies for their solution, to develop the health care.	b3-	Adjust the quality attributes of sterile pharmaceuticals.

Teaching And Assessment Methods For Achieving Learning Outcomes:

Alignment of Learning Outcomes of Intellectual Skills to Teaching Methods and Assessment Methods:

Course Intended Learning Outcomes (CILOs) in Intellectual Skills.		Teaching strategies/methods to be used	Methods of assessment
After completing this course, students will be able to:		Lectures, discussion and brain storming	Written , report and oral exams
b1-	Select the best liquid forms, additives and packaging to enhance the stability of pharmaceutical solutions, suspensions and other disperse systems.		
b2-	Predict instability problems in selected products and suggest solutions for these problems.		
b3-	Adjust the quality attributes of sterile pharmaceuticals.		

(C) Professional and Practical Skills:

Alignment of Course Intended Learning Outcomes (CILOs) to Program Intended Learning Outcomes (PILOs) in: Professional and Practical Skills

Program Intended Learning Outcomes (Sub-PILOs) in Professional and Practical Skills		Course Intended Learning Outcomes (CILOs) in Professional and Practical Skills	
After completing this program, students will be able to:		After completing this course, students will be able to:	
C1-	Operate different pharmaceutical equipments and instruments and use emerging technologies in preformulation, formulation, packaging, storage and analysis of pharmaceutical products according to GLP, GSP and cGMP guidelines.	c1-	Analyze stable effective liquid dosage form..
		c2-	Examine the best method for sterilization of different pharmaceutical products.
		c3-	Assess the quality attributes of liquid dosage forms and packaging.
		c4-	Examine the necessary quality control tests
			of parenteral and other sterile products according to the cGMP regulation.

Teaching And Assessment Methods For Achieving Learning Outcomes:

Alignment of Learning Outcomes of Professional and Practical Skills to Teaching and Assessment Methods:		
Course Intended Learning Outcomes (CILOs) in Professional and Practical Skills	Teaching strategies/methods to be used	Methods of assessment
After completing this course, students will be able to:	Lectures, Problem solving sessions, tutorials, discussion and brain storming	Written and oral exams
c1- Analyze stable effective liquid dosage form..		
c2- Examine the best method for sterilization of different pharmaceutical products.		
c3- Assess the quality attributes of liquid dosage forms and packaging.		
c4- Examine the necessary quality control tests of parenteral and other sterile products according to the cGMP regulation.		

(D) General / Transferable Skills:

Alignment of Course Intended Learning Outcomes (CILOs) to Program Intended Learning Outcomes (PILOs) in: General and Transferable skills
--

XII. Course Improvement Processes:	
1- Strategies for obtaining student feedback on effectiveness of teaching	
	<ul style="list-style-type: none"> ▪ Student-based assessment of the effectiveness of teaching using a questionnaire designed by the Quality Assurance Unit at the end of the semester. ▪ Meeting with students and faculty (once per semester).
2- Other strategies for evaluation of teaching by the instructor or by the department.	
	<ul style="list-style-type: none"> ▪ Assessment of the course syllabus and contents by the teachers using a questionnaire designed by the Quality Assurance Unit of the university at the end of the semester. ▪ Regular meeting and discussion of the course content between the Head of Department and the teaching staff of the course (for theory and practice).
3- Processes for improvement of teaching.	
	<ul style="list-style-type: none"> <input type="checkbox"/> Revision of the course specification and its teaching strategies every three academic years after consideration of all issues raised by the teachers and/or students during regular meetings and discussions. <input type="checkbox"/> Exploring any possible defects in the course that might encountered by the teaching staff and their mitigation in subsequent improved versions of course specification.
4- Processes for verifying standards of students' achievement	
	<ul style="list-style-type: none"> ▪ Checking of a sample of students' work by an independent faculty member. ▪ Periodic exchange and check marking of a sample of students' assignments with a faculty member from another institution. ▪ Adoption of scoring rubrics to assess the students' achievement (both for ongoing or summative assessments). ▪ Regular follow-up of laboratory logbooks to assess the practical achievement of students.
5- Procedures for periodically reviewing of course effectiveness and planning for improvement	
	<ul style="list-style-type: none"> ▪ Student rating and feedback ▪ Peer rating and feedback ▪ Regular meeting of the Curriculum Committee of the faculty.
6- Course development plans	
	<ul style="list-style-type: none"> ▪ Conducting regular workshops for the staff for improving their course specification skills. ▪ Regular revision of course specification and syllabus items.

XIII. Course Policies: (including plagiarism, academic honesty, attendance etc)

الموصف نائب العميد لشؤون الجودة رئيس القسم عميد الكلية عميدة مركز التطوير وضمان الجودة رئيس الجامعة ا.د. ماجد ا.د. القاسم محمد عباس

علوان ا.د. محمود البريهي ا.د. ماجد علوان د. خالد الشوية ا.م.د. هدى العماد

The University Regulations on academic misconduct will be strictly enforced. Please refer to -----	
1	Class Attendance: <ul style="list-style-type: none"> Attendance of all lectures and practical sessions is required. Unexcused absence exceeding 25% of the lectures or practical sessions will disqualify the student from entering the final exam.
2	Tardy: <p>- Roll will be called in the very beginning of each lecture and practical class. Retardation for more than three weeks without a reasonable excursion, the student involved shall not be allowed to attend the class any longer and consequently shall be considered to be absent.</p>
3	Exam Attendance/Punctuality: <ul style="list-style-type: none"> Exam attendance is obligatory unless being excused by the department and faculty. Absence from assignments or exams will dealt with according to the general policy of the university.
4	Assignments & Projects: <ul style="list-style-type: none"> Assignments: Written and oral; Laboratory logbook signed by the responsible demonstrator. ▪ Projects: Not applicable.
5	Cheating: <ul style="list-style-type: none"> Punishment of cheating will be according to the general policy of the university in this respect.
6	Plagiarism: <ul style="list-style-type: none"> Plagiarism in written essays, reports, etc. is not accepted, and students who plagiarize the works of others will be punished according to the general policy of the university.
7	Other policies: <ul style="list-style-type: none"> General policies of the Students' Affairs of the University and the Quality Assurance Unit.
