- التداوي بالاعشاب - العقاقير - الخامس - عام - درجة الاختبار (70)

د. بشرى محرم

- 1) bearberry is contraindicated in pregnancy due to
 - 1) oxytocic effect
 - 2) cytotoxic effect
 - 3) laxative effect
 - 4) All answers are correct
- 2) Mechanism of action of Bearberry in UTI
 - 1) in bladder the arbutin converted to hydroquinon which has antiseptic effect
 - 2) in intestin the arbutin converted to hydroquinon which has antiseptic effect in bladder
 - 3) arbutin in liver hydrolysis into hydroquinon which has antiseptic effect in bladder
 - 4) hydroquinon in intestin is conjugated in liver then release hydroquinon in bladder which has antiseptic effect
- 3) clinical management to control the interaction between digoxin and antiaacid is by
 - 1) a. monoting the digoxin serum concentration
 - 2) b. Reduse the dose of digoxin
 - 3) c. space doses at least 2 hours
 - 4) d. B and c
- 4) Carbenoxolone is
 - 1) a mucilages from chamomil and used for gastric ulcer
 - 2) a semisynthetic derivative of glycyrrhetic acid and used for gastric ulcer
 - 3) a glycyrrhetic acid used for gastric ulcer
 - 4) a flavnoids and used for inflammation
- 5) thymoquinone is the active compound responsible for the activity of
 - 1) Black Cumin seed
 - 2) Digitalis
 - 3) Fonugreek
 - 4) garlic
- 6) the side effect of Phytodolor is due to the presence of salicylate
 - 1) TRUE.
 - 2) FALSE.
- 7) mechanism of action of Licorice in treating peptic ulcer is by
 - 1) increasing 15-ketoproglandins E2 by decreasing SDR
 - 2) increasing prostaglandins E2 by inhibiting SDR
 - 3) increasing hydrocortisone by inhibiting SDR
 - 4) increasing cortisone by inhibiting by inhibiting SDR
- 8) Liquorice is used
 - 1) As laxative
 - 2) For odema
 - 3) for dermetitis
 - 4) for gastritis
- 9) Witch hazel is used for
 - 1) a. Angina
 - 2) b. Hemorrhoid
 - 3) c. Gastric upset
 - 4) d. Both a and c
- 10) Herbal remedies for arthritis is

- 1) - colchecine
 - 2) - NSAIDs
 - 3) Willow bark
 - 4) - Aspirin
- 11) Mechanism of action of Garlic in hypertension by
- 1) - Inducing H₂S production and alliin content which has angiotensin II inhibiting and vasodilating effects.
 - 2) - depleting catecholamines and serotonin from nerves in the CNS
 - 3) Inducing H₂S production and allicin content which has angiotensin II inhibiting and vasodilating effects.
 - 4) - No answer is correct
- 12) Chronic intake of plant containing tannins is dangerous because they
- 1) - inhibit digestive enzymes which bind to the small intestinal mucosa
 - 2) - complex metal ions thus inhibiting their absorption
 - 3) - react with thiamin, decreasing their absorption
 - 4) All oanswers are correct
- 13) The most Adverse effect of liquorice is
- 1) - Hypersensitivity
 - 2) - irritating effect
 - 3) - inflammation
 - 4) mineralocorticoid effect
- 14) Angina is treated naturally by
- 1) - Nitrates
 - 2) - Atenolol
 - 3) Hawthorn
 - 4) - Verapamil
- 15) all correct for phytodolor except
- 1) - Herbal formula (Phytodolor ®) Ash, aspen, European goldenrod
 - 2) It only inhibits phospholipase A₂ enzyme
 - 3) - It inhibits cyclo-oxygenase and lipoxygenase enzymes
 - 4) - It is used as analgesic and antiinflammation
- 16) Aged garlic extract is better than any garlic preparations because
- 1) does not cause bleeding problems
 - 2) - has odor
 - 3) - contain unstable component allicin
 - 4) - all answer are correct
- 17) All correct for Devil's claw except
- 1) - it has anti-inflammatory activity through inhibition of lipoxygenase enzyme.
 - 2) it has anti-inflammatory activity through inhibition of cyclooxygenase enzyme
 - 3) - the activity of the plant is due to harpagoside
 - 4) - it is safer than pharmaceutical treatments
- 18) Side effect of garlic is
- 1) - breath odor
 - 2) - GI irritation
 - 3) - Heartburn
 - 4) All answers are correct
- 19) Do not take Bearberry with vit C because
- 1) - It increase bearberry effect
 - 2) It decrease bearberry effect

- 3) - Synergistic effect
4) - Non of the answer is correct
- 20) the therapeutic properties of willow bark are expressed more slowly than salicylate because of
- 1) - the time required for the conversion of arbutin to salicylic acid
2) - the time required for the conversion of salicylic alcohol to salicylic acid
3) + the time required for the conversion of salicin to salicylic acid
4) - Non of the answer is correct
- 21) care should be taken when use digoxin along with diuretic
- 1) + a. may cause hypokalemia thereby increase digoxin toxicity
2) - b. may increase digoxin bioavailability
3) - c. may decrease digoxin excretion
4) - d. a and c
- 22) Mechanisms of action of Horse Chestnut in Varicose veins
- 1) - increase lysosomal enzyme
2) - leukocyte accumulation
3) + increase the tone of the veins
4) - inhibit the tone of the veins
- 23) mustard oil should not applied to the affected area for a long period of time
- 1) - may induce redness of the skin
2) - may induce cold sensation
3) + may blister the skin.
4) - All oanswers are correct
- 24) Bromelain is used for
- 1) + a. Osteoarthritis
2) - b. Gout
3) - c. Cardiac diseases
4) - d. A and c
- 25) Refrigerants are
- 1) - a. produce dilation of the cutaneous vasculature and reddening of the skin.
2) + b. Product produce a cooling sensation on the skin
3) - c. produce irritation and warmth
4) - d. a and b
- 26) Hawthorn may
- 1) - dilates coronary blood vessels
2) - reduces myocardial oxygen demand
3) - reduces symptoms of angina
4) + all answer are correct
- 27) Peptic ulcer is naturally treated with
- 1) - Aspirin and nonsteroidal antiinflammatory drugs
2) - Antacids drugs
3) + Chamomile
4) - agrimony
- 28) All the following statement for Tannin-containing herbs in treating diarrheal are correct except
- 1) + increase intraluminal secretion
2) - inactivate the hypersecretory activity of some toxins.
3) - producing protective layer
4) - antibacterial activity
- 29) Rawolfia is used for
- 1) - Angina pectoris

- 2) Hypertension
3) Hypotension
4) Constipation
- 30) Corn silk
1) has cardiotoxic activity
2) facilitate the renal elimination of water
3) has diuretic effect
4) all answers are correct
- 31) Green banana act by
1) converting tannins in small intestine to short-chain fatty acids which has stimulate absorption of water
2) converting tannins in large intestine to short-chain fatty acids which has decrease absorption of water
3) Pectins is converted in large intestine to short-chain fatty acids which has stimulate absorption of water
4) converting Pectins in small intestine to short-chain fatty acids which has decrease absorption of water
- 32) The side effect of Willow bark is GIT upset which caused by
1) tannins
2) salicin
3) flavonoids
4) both a and b
- 33) Buchu leaves has
1) antiseptic effect
2) aquaretic and antiseptic effect
3) diuretic and antiseptic effect
4) aquaretic effect
- 34) herbal medicine for Gout is
1) indomethacin
2) colchicine
3) aspirin
4) all of above
- 35) Phytotherapy of Urinary Stones act by
1) alkalinizing capacity of the herb
2) urinary antiseptic activity
3) reduce renal stones formation
4) all answer are correct
- 36) Corn silk is used as
1) Cardio tonic
2) Herbal diuretic
3) Anti-inflammatory
4) Analgesic
- 37) Nigella sativa (black cumin) is used as hypotensive agent because of
1) Antioxidant activity
2) Diuretic effect
3) Ca channel blocker effect
4) all answer are correct
- 38) Antiseptic effect of Bearberry is due to
1) arbutin

- 2) - disphenol
3) - flavonoids
4) - all of above
- 39) Bromelain is A mixture of
1) - Tannin and flavonoids
2) + proteolytic enzymes
3) - mixture of Ash, aspen and European goldenrod
4) - Anthraglycosides
- 40) digoxin is used for
1) + Congestive Heart Failure
2) - hypertension
3) - Venous Insufficiency
4) - non of the answers are correct
- 41) Which herb is used for Varicose veins
1) - Digitalis
2) - banana
3) + Horse Chestnut
4) - Hawthorn
- 42) Camphor is
1) - a. Used for gout
2) - b. Rubefacients agents
3) + c. Used as Refrigerants agents
4) - d. a and b
- 43) care should be taken when use digoxin along with antacid
1) - may increase digoxin bioavailability
2) + may decrease digoxin bioavailability
3) - increase Serum Digoxin Concentration
4) - no interaction occur
- 44) Which compound is responsible for the antibiotic effect of couchgrass
1) - carbohydrates
2) - arbutin
3) + Agropyrene
4) - Diosmin
- 45) Mechanism of action of willow bark in arthritis is
1) - Salicin in small intestine convert to salicylic alcohol then to salicylic acid in liver
2) - Salicin in stomach convert to salicylic alcohol then to salicylic acid in liver
3) + Salicin in large intestine convert to salicylic alcohol then to salicylic acid in liver
4) - Non of all answers is correct
- 46) Methyl salicylate should not be used after vigorous exercise because
1) + a. Increase its percutaneous absorption which lead to salicylate toxicity.
2) - b. blister the skin.
3) - c. Counterirritant effect
4) - d. A and b
- 47) Which plant constituent used for hemorrhoids
1) - Mucilage
2) - Tannins
3) - Fibers
4) + All answers are correct
- 48) bearberry is contraindicated in pregnancy due to :

- 1) oxytocic effect
 - 2) cytotoxic effect
 - 3) laxative effect
 - 4) all of above
- 49) What is the active compound in Bilberry fruit responsible for its effect on Varicose veins
- 1) tannins
 - 2) Anthocyanins
 - 3) flavonoids
 - 4) not of all answers are correct
- 50) all the following plants contain anthraquinone and used in Constipation except
- 1) senna
 - 2) rhubarb
 - 3) tamarind
 - 4) cascara
- 51) which plant acts centrally as antihypertension
- 1) ginseng
 - 2) Hawthorn
 - 3) Forskolin
 - 4) Rauwolfia
- 52) infection of the upper urinary tract
- 1) Urethritis
 - 2) pyelonephritis
 - 3) arthritis
 - 4) Cystitis
- 53) Cranberry
- 1) a. inhibit bacterial adhesion to bladder wall
 - 2) b. is Anti-infective herbs
 - 3) c. Diuretic herbs
 - 4) d. Both a and b
- 54) aspirin can be used in gout, because it can decrease uric acid levels
- 1) true .
 - 2) FALSE.
- 55) quinidine with digoxin lead to
- 1) a. increase digoxin bioavailability
 - 2) b. decrease digoxin bioavailability
 - 3) c. inhibits P-glycoprotein
 - 4) d. a and c
