

قائمة الاسئلة

IM567) - امتحان نهاية الفصل الدراسي الأول - للعام الجامعي 1446 هـ - كلية الطب البيطري :: الامراض المشتركة disease zoonotic د.حميد الرفاعي

- 1) pathogenic microorganisms penetrate the host defenses, enter the tissues, and multiply , is called
  - 1)  Infection
  - 2)  Disease
  - 3)  Infectious disease
  - 4)  all are true
- 2) Zoonoses diseases are infections which are naturally transmitted between ...
  - 1)  people and animals
  - 2)  vertebrate animals and people
  - 3)  invertebrate and vertebrate animals and people
  - 4)  all are true
- 3) a live animal that transmits an infectious agent from one host to another is called
  - 1)  Carrier
  - 2)  Reservoir
  - 3)  Source
  - 4)  vector
- 4) Cryptococcosis is
  - 1)  Protozoan zoonosis
  - 2)  bacterial zoonosis
  - 3)  Fungal zoonosis
  - 4)  viral zoonosis
- 5) Hydatid disease is
  - 1)  Obligatory cyclozoonoses
  - 2)  Euzoonoses
  - 3)  Orthozoonoses
  - 4)  non Obligatory cyclozoonoses
- 6) Which the zoonotic disease is Orthozoonoses
  - 1)  Tuberculosis
  - 2)  Taenia solium
  - 3)  Toxoplasmosis
  - 4)  Taenia saginata
- 7) plague disease is
  - 1)  Orthozoonoses
  - 2)  Euzoonoses
  - 3)  Pherozoonoses
  - 4)  Saprozoonoses
- 8) Ancylostomiasis is
  - 1)  Saproanthropozoonoses
  - 2)  Saproamphixenoses
  - 3)  Metazoonoses
  - 4)  cyclozoonoses
- 9) Zooanthroponoses such as
  - 1)  Leptospirosis
  - 2)  rabies
  - 3)  amoebias
  - 4)  Staphylococcosis
- 10) humans are Ebola infected by close contact with the

- 1) - blood of infected animals
  - 2) - body fluids of infected animals
  - 3) - blood and other body fluids of infected human
  - 4)  all are true
- 11) Reservoir of Rabies virus is
- 1)  wild animals
  - 2) - domestic animals
  - 3) - dogs and cats
  - 4) - all are true
- 12) Erythema migrans is clinical signe of
- 1) - ringworm disease
  - 2) - tularemia disease
  - 3)  lyme disease
  - 4) - cats schataches
- 13) the people at risk for infection with hanta virus are
- 1) - Vets
  - 2)  farmers, sweepers and labourers
  - 3) - abattoir workers
  - 4) - all are true
- 14) Which Agent Avian Influenza that cause the disease in human, Avian influenza virus subtype
- 1) - H5N6
  - 2) - H7N7
  - 3) - H6N1
  - 4)  H5N1
- 15) Transmission of Cryptosporidiosis is fecal-oral rout by
- 1) - person to person
  - 2) - person to animal
  - 3) - Foodborne
  - 4)  all are true
- 16) the infective stage of Leishmaniasis is
- 1) - amastigote parasites
  - 2)  promastigotes
  - 3) - mastigotes parasites
  - 4) - all are true
- 17) the followed clinical sings (symptoms) of Visceral Leishmaniasis except
- 1) - anemia and petechiae on the skin
  - 2)  leukocytosis and leukopenia
  - 3) - iarrhea and weight loss
  - 4) - bleeding from GI tract
- 18) the parasitic infectious stage of Toxoplasmosis is
- 1) - Tachyzoites
  - 2) - bradyzoit
  - 3) - sporulated Oocysts
  - 4)  all are true
- 19) Acute phase of Chagas disease includes the followed symptoms except ;
- 1)  difficult of respiratory
  - 2) - conjunctivitis
  - 3) - chagoma
  - 4) - lymphadenitis

- 20) The following diseases cause lymphadenitis except
- 1)  Lyme Disease
  - 2)  Chagas Disease
  - 3)  tularemia diseases
  - 4)  Glanders
- 21) the following Complications are Complications of Cat Scratch Disease .... Except
- 1)  Encephalitis
  - 2)  Endocarditis
  - 3)  enteritis
  - 4)  Pneumonia
- 22) the followed symptoms are Typical late symptoms of Lyme Disease except
- 1)  Erythema migrans
  - 2)  Bell's Palsy
  - 3)  Meningitis
  - 4)  Arthritis
- 23) the following salmonella species have a single host species .... Except
- 1)  Salmonella abortus
  - 2)  Salmonella ovis
  - 3)  Samlonella typhimurium
  - 4)  Salmonella gallinarum
- 24) the etiology of cellulitis in human is
- 1)  Brucella melitensis
  - 2)  Pasteurella maultocida
  - 3)  Borrelia burgdorferi
  - 4)  Yersinia pests
- 25) the following symptoms are flu like (sudden fever,chills ,...) and diarrhea, dry cough , pneumonia, wollen and painful eyes, ulcers on the skin or mouth, swollen and painful lymph glands of ....
- 1)  Plague disease
  - 2)  Cat Scratch Disease
  - 3)  Tularemia disease
  - 4)  chagas disease
- 26) Reservoir of chagas disease is
- 1)  cats
  - 2)  dogs
  - 3)  rodents
  - 4)  all are true
- 27) the tick is vector of the following diseases ....except
- 1)  lyme disese
  - 2)  tularemia
  - 3)  Babesiosis
  - 4)  chagas disease
- 28) The Tularemia disease can be transmitted to human by
- 1)  Tick and deer fly bites
  - 2)  Skin contact with infected animals
  - 3)  Ingestion of contaminated water and Inhalation of contaminated dusts or aerosols
  - 4)  all are true
- 29) CHAGASE DISEASE in human occurs in
- 1)  two stages
  - 2)  one stage

- 3)  + three stages
- 4)  - one clinical picture
- 30) the Reservoir of lyme disease is
- 1)  - deer
- 2)  - mice
- 3)  - ticks
- 4)  + all are true
- 31) The Typical symptoms of Hand, foot and mouth disease are fluid-filled blisters on
- 1)  - hands
- 2)  - feet
- 3)  - inside of the mouth
- 4)  + all are true
- 32) Symptoms of SARS coronavirus are
- 1)  - flu-like symptoms
- 2)  - pneumonia
- 3)  - respiratory disease
- 4)  + all are true
- 33) The Leptospirosis disease is characterized by
- 1)  + two phases
- 2)  - three phases
- 3)  - one phase
- 4)  - four phases
- 34) the following Symptoms are symptoms of botulism in Adult human ..... Except
- 1)  - nausea and vomiting
- 2)  + diarrhea
- 3)  - nerve paralysis
- 4)  - fatigue
- 35) In severe cases of Salmonella food poisoning there is septicaemia with .... One of them is not correct
- 1)  - leucopenia
- 2)  + leukocytosis
- 3)  - endocarditis
- 4)  - pericarditis
- 36) the species of Campylobacter which is found in large numbers in cattle feces, and poultry as normal flora
- 1)  + Campylobacter jejuni
- 2)  - Campylobacter coli
- 3)  - Campylobacter fetus
- 4)  - Campylobacter cocisus
- 37) Etiology Of Cryptosporidiosis Primarily infects
- 1)  - large intestine
- 2)  + small intestine
- 3)  - large and small intestine
- 4)  - all are true
- 38) Enterohemorrhagic Eshreshia coli infection is caused by Escherichia coli serotype
- 1)  + O157:H7
- 2)  - O159:H7
- 3)  - O156:H7
- 4)  - all are true
- 39) The diagnostic stage of SCHISTOSOMES in human is
- 1)  - Cercaria

- 2) - Miracidium  
3)  eggs  
4) - Schistosomulum
- 40) Foods poisoning occurs by consumption  
1) - Cl.osterdium perfringens endospores  
2) - Vegetables cells of Cl. Perfringens  
3) - Cl.osterdium perfringens enterotoxin  
4)  all are true
- 41) The Glanders Disease in Humans has  
1) - one form  
2) - two forms  
3) - three forms  
4)  four forms
- 42) Main hosts of glanders disease are  
1)  horses and donkys and mules  
2) - horses and cattle  
3) - goats and swine  
4) - carivores and goats
- 43) Definitive host for Toxoplasma gondii is  
1)  cats  
2) - dogs and cats  
3) - rodents  
4) - all are true
- 44) What are the infections have short incubation periods and lack fever  
1) - food borne salmonella infection  
2) - food borne Q fever  
3)  Staphylococcus aureus food borne intoxication  
4) - food borne Campylobacter infection
- 45) Emetic syndrome is food borne intotoxication produced by  
1) - Staphylococcus aureus  
2)  Bacillus cereus  
3) - Clostridium perfringens  
4) - Clostridium botulinum
- 46) the staphylococcal enterotoxins are inactivated by  
1) - pasteurization  
2) - cooking procedures  
3) - heating at 100oC  
4)  all are false
- 47) Adult flukes primarily live in the bile tract of  
1) - infected domestic  
2) - Infected wild herbivorous animals  
3) - Infected human  
4)  all are true
- 48) Definitive hosts of Echinococcus granulosus is  
1) - sheep and goats  
2)  dogs  
3) - human  
4) - cattle
- 49) Taenia saginata lives in the small intestine of

- 1) - sheep and goats
- 2) - cattle
- 3) - swine
- 4)  human

50) Infective stage of *Taenia solium*

- 1) - eggs
- 2) - *Cysticercus bovis*
- 3)  *Cysticercus cellulosae*
- 4) - Cysticercosis
