

قائمة الاسئلة

امتحان نهاية الفصل الدراسي الأول - للعام الجامعي 1446 هـ - الموافق -2024/2025-مكلية الطب والعلوم الصحية :: تصوير الإشعاعي في

- 1) Must interrupt radiological results immediately in emergency situations
 - 1) Radiologists
 - 2) Catheterization only
 - 3) IVU & Catheterization
 - 4) all
- 2) Is the first line of imaging in emergency situations.
 - 1) Conventional radiography
 - 2) CT scans
 - 3) M.R.I.
 - 4) All
- 3) Provides the best result for neurological and spinal emergencies.
 - 1) M.R.I.
 - 2) CT scans
 - 3) x-rays
 - 4) كل ما ذكر
- 4) Is used for initial assessment in immobilized patients.
 - 1) Mobile radiography
 - 2) CT scans
 - 3) M.R.I.
 - 4) لا يوجد
- 5) Pneumonia, pneumothorax, pulmonary embolism, Acute aortic syndrome are
 - 1) Brain emergencies
 - 2) Chest emergencies
 - 3) Abominal emergencies
 - 4) كل ما ذكر
- 6) Is the abbreviation of pulmonar angiography CT.
 - 1) CTPA
 - 2) CTA
 - 3) M.R.A
 - 4) لا يوجد
- 7) Appendicitis is well diagnosed using
 - 1) Lab investigations
 - 2) x-rays
 - 3) Ultrasound
 - 4) None
- 8) Cardiovascular emergencies are well diagnosed by all except
 - 1) CT scans
 - 2) M.R.I.
 - 3) Lab investigations
 - 4) all
- 9) arthrography is the best in evaluating intra and extra- articular tendinous injuries
 - 1) M.R.I.
 - 2) CT
 - 3) Ultrasound
 - 4) All
- 10) Ectopic pregnancy, Ovarian torsion, Placental Abruption are

- 1) Gynecological emergencies
 - 2) Male Genitourinary emergencies
 - 3) pediatric emergencies
 - 4) None
- 11) Testicular torsion, Urinary retention, urolithiasis, are
- 1) Gynecological emergencies
 - 2) Male Genitourinary emergencies
 - 3) pediatric emergencies
 - 4) All
- 12) All are among pediatric emergencies except
- 1) pediatric trauma
 - 2) pediatric infections
 - 3) bronchiolitis
 - 4) prostatic enlargements
- 13) Mobile radiography are applied in
- 1) emergency rooms
 - 2) Operation rooms
 - 3) Bedside of the patient
 - 4) All
- 14) In H.D.U. the number of nurses is
- 1) One nurse per patient
 - 2) One nurse for two patients
 - 3) One nurse for all patient
 - 4) None
- 15) In I.C.U. the number of nurses is
- 1) The sme like H.D.U.
 - 2) One nurse per patient
 - 3) One nurse for two patients
 - 4) All
- 16) (ICU) ,(CCU) , (NICU) , (PACU), (ED) , (HDU) units are
- 1) Operation rooms
 - 2) Surgical Wards
 - 3) Special Care Units
 - 4) All
- 17) When the patient is laying on an alcohol or water filled pad to raise or lower body temperature , it is important to place IR.....
- 1) anywhere
 - 2) on the top of the pad to avoid artifacts
 - 3) Under the pad
 - 4) all
- 18) You should not elevate or abduct the patient's left arm for 24 hours post "placement of pacemaker" surgery so as not to
- 1) cause blurring
 - 2) cause pain for the patient
 - 3) displace the pacemaker and the the catheter
 - 4) none
- 19) The purpose of is to study radiographically the anatomy, and function of the biliary system.
- 1) Arthrograph
 - 2) I.V.U.

- 3) O.C.G.
4) كل ما ذكر
- 20) The warming blanket emergency situation is called
- 1) Mylar Warming Blanket
2) Swan - Ganz Blanket
3) Central Venous Catheter
4) all
- 21) Very ill, weak or trauma patients, require
- 1) adaptations in both patient positioning and patient care.
2) Portable x-ray Units
3) Mobile x-ray units
4) All
- 22) Computed Radiography (CR) is more helpful for..... For their fast results.
- 1) trauma and mobile imaging
2) emergency rooms
3) theatre radiography
4) all
- 23)are important for all imaging systems, including digital imaging.
- 1) Close collimation and accurate centering
2) Patient motion
3) Keeping metals on the patient's clothing
4) none
- 24) The C – Arm Mobile Fluoroscopy Unit uses:
- 1) one monitor
2) two monitors
3) three monitors
4) four monitors
- 25) The active monitor is on the RT's and the hold monitor is on the RT's
- 1) Left , Right
2) Right , Left
3) None
4) Right.
- 26) The O-arm is a portable imaging device with a
- 1) C-shaped arm that fits over the surgical table
2) O-shaped arm that fits over the surgical table
3) T-shaped arm that fits over the surgical table
4) All
- 27) In, two views are done either by turning the patient, or by adapting the CR - Part alignment.
- 1) PRINCIPLE TWO
2) PRINCIPLE THREE
3) PRINCIPLE ONE
4) ALL
- 28) InYou place the IR diagonally so to include both joints.
- 1) PRINCIPLE TWO
2) PRINCIPLE THREE
3) PRINCIPLE ONE
4) ALL
- 29) In, you have maintain the safety of THE PATIENT, HEALTH CARE WORKERS

AND THE PUBLIC.

- 1) PRINCIPLE THREE
 - 2) PRINCIPLE ONE
 - 3) PRINCIPLE TWO
 - 4) All
- 30) is the study of synovial joints and the related soft tissue structures by using contrast media.
- 1) I.V.U.
 - 2) Arthrograph
 - 3) Barium Meal
 - 4) ALL
- 31) T-Tube Cholangiogram is done
- 1) Pre Operative
 - 2) During Operation
 - 3) Post Operative
 - 4) All
- 32) كشف النخاع الشوكي يسمى
- 1) O.P.T
 - 2) Lumbar Spine
 - 3) Radiculography
 - 4) لا يوجد
- 33) The Oil contrast medium is removed so as to reduce
- 1) Complication of adhesive arachnoiditis
 - 2) Lumbar Puncture headache
 - 3) Positive Contrast
 - 4) لم يذكر
- 34) The patient is asked to drink fluids before the exam so as to decrease
- 1) Lumbar Puncture headache
 - 2) Complication of adhesive arachnoiditis
 - 3) Contrast Negative
 - 4) All
- 35) arthrography is the best in evaluating osseous (bony) defects and cartilage's surface,
- 1) CT
 - 2) M.R.I.
 - 3) ULtrasound
 - 4) All
