جلدية-تمريض عالي-الثالث - درجة هذا الاختبار (15)

د تيسير عامر

- 1) Scabies is a:
 - 1) - Viral infection.
 - 2) - Bacterial infection.
 - 3) Parasitic infestation.
 - 4) - Fungal infection
- 2) The primary lesion of molluscum contagiosum is:-
 - 1) - Macule.
 - 2) Papule.
 - 3) - Plaque.
 - 4) - Vesicle
- 3) Ivermectin is indicated in the treatment of:
 - 1) - Syphilis
 - 2) Scabies
 - 3) - Tuberculosis
 - 4) - Dermatophytosis
- 4) Which of the following is Secondary lesion :
 - 1) - a.papule
 - 2) - b.Vesicle
 - 3) c.Lichenification.
 - 4) - d.(a) + (c).
- 5) Verrucae vulgaris are:
 - 1) - Genital warts.
 - 2) - Plantar warts.
 - 3) Common warts.
 - 4) - Plane warts
- 6) vesicle can be differentiated from a bulla by:
 - 1) Its size.
 - 2) - Its location.
 - 3) - Having a wall.
 - 4) - It's content
- 7) A burrow is the primary lesion of:
 - 1) - Acne vulgaris.
 - 2) - Lupus vulgaris.
 - 3) Scabies.
 - 4) - None of the above.
- 8) Primary varicella zoster virus infection leads to:
 - 1) - Facial palsy.
 - 2) - Genital herpes.
 - 3) Chickenpox.
 - 4) - Herpes zoster.
- 9) Warts can be treated by all of the following EXCEPT:-
 - 1) - Laser.
 - 2) - Cryotherapy.
 - 3) - Electrocautery.
 - 4) Intralesional s

- 10) The most characteristic lesion of urticaria is:
- 1) Wheal.
 - 2) Burrow.
 - 3) Furrow.
 - 4) Herald patch.
- 11) All of the followings are primary lesion except:
- 1) pustule
 - 2) plaque
 - 3) macules
 - 4) Lichenification
- 12) Characteristic lesion in psoriasis :
- 1) crust
 - 2) Burrow
 - 3) Silvery scales
 - 4) wheal
- 13) The vector of leishmaniasis is:
- 1) sandfly
 - 2) Simulium
 - 3) mosquitos
 - 4) Mite
- 14) The following may help in the diagnosis of scabies:-
- 1) Positive family history.
 - 2) Night itching.
 - 3) Distribution of lesions.
 - 4) All answers true.
- 15) female has a large, symmetrical, brown-pigmented patch on her cheeks, forehead What is the most likely diagnosis?
- 1) acne
 - 2) Melasma
 - 3) Polymorphic eruption of pregnancy
 - 4) Rosacea
- 16) Burrow is:
- 1) Localised collection of fluid.
 - 2) macules
 - 3) Tunnel in the epidermis produced by female sarcoptes scabii.
 - 4) Bullae
- 17) complication of topical corticosteroid all true except
- 1) atrophy
 - 2) telagectasia
 - 3) hypopigmentation
 - 4) malignancy
- 18) Histamine is the chief mediator of:
- 1) Urticaria.
 - 2) Acne
 - 3) Discoid lupus erythematosus.
 - 4) Psoriasis.
- 19) Permethrin is used in the treatment of:
- 1) Scabies
 - 2) Leprosy

- 3) - Body louse
4) - Leishmaniasis
- 20) Warts can be treated by all of the following EXCEPT:
1) - Laser.
2) - Cryotherapy.
3) - Electrocautery.
4) Intralesional steroids.
- 21) Scabies in adults involves the following body sites EXCEPT:
1) - Wrist.
2) upper back
3) - Genitalia.
4) - Flexures
- 22) Herpes genitalis is:
1) - Caused by HSV type II.
2) - Caused by. HSV type 1
3) Caused by HSV type 2&1
4) - No answer true
- 23) A plaque is a:
1) Patch of abnormal change of skin texture.
2) - Area of depigmentation.
3) - The primary lesion of acne vulgaris.
4) - Localised epidermal collection of fluid
- 24) The primary lesion of molluscum contagiosum is:
1) - Macule.
2) Papule.
3) - Plaque.
4) - Vesicle.
- 25) Evanescent elevations of the skin caused by edema of the dermis are:
1) - Macules.
2) - Papules.
3) Wheals.
4) - Nodules
- 26) The skin appendages include all of the following EXCEPT:
1) - Sebaceous glands.
2) - Eccrine sweat glands.
3) Melanocytes.
4) - Apocrine sweat glands
- 27) The following may help in the diagnosis of scabies:
1) - Positive family history.
2) - Night itching.
3) - Distribution of lesions.
4) All answers true.
- 28) In herpes simplex, all is true except:
1) - The primary lesion is a vesicle.
2) - Neuralgia is a frequent complication.
3) - It usually affects the mucocutaneous junction.
4) not recurrent
- 29) A bulla may be the primary lesion of all the following diseases EXCEPT:
1) - burn.

- 2) - Drug eruption.
3) - Herpes zoster.
4) + Molluscum contagiosum
- 30) A burrow is the primary lesion of:-
1) - Acne vulgaris.
2) - Lupus vulgaris.
3) + Scabies.
4) - No answer true
