التشريح الاشعاعي-الثاني-التصوير التشخيصي الطبي-برامج العلوم الصحية-درجة الامتحان(70)

د/ أمل الماخذي

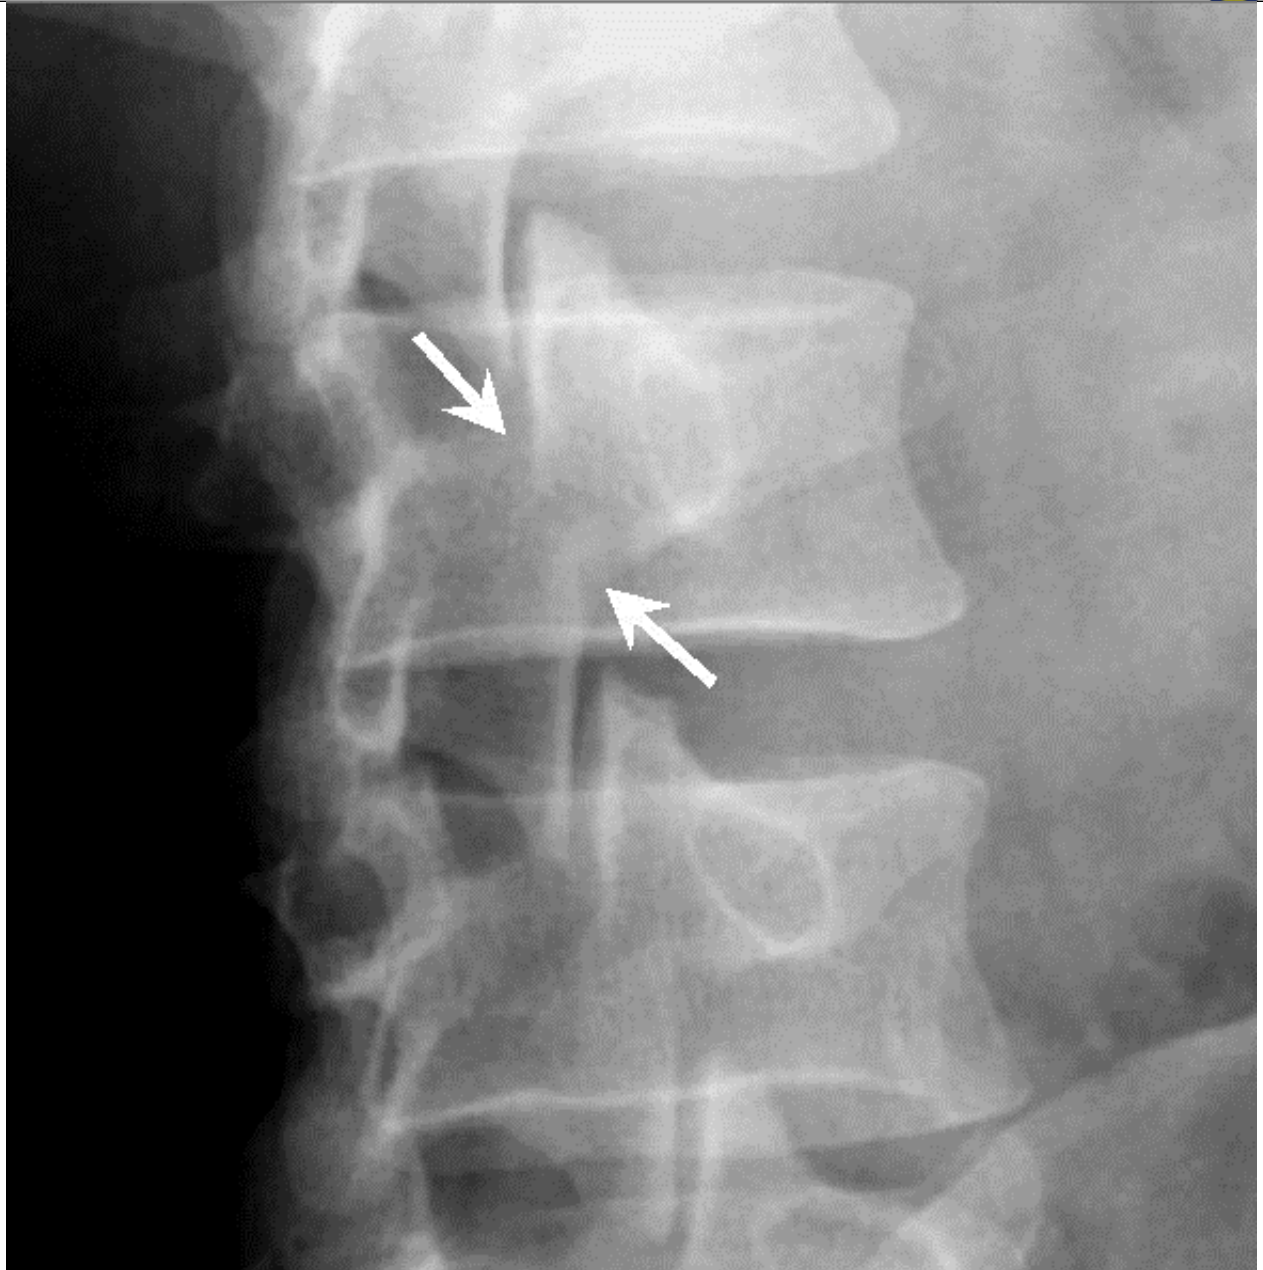

- 1) 1-Indications of IVP except :
 - 1) - 1)kidney stones
 - 2) + 2)Renal infection
 - 3) - 3) Surgery on the urinary tract
 - 4) - 4)Congenital anomalies of the urinary tract
- 2) 2-Opening of the middle cranial fossa are the following except:
 - 1) - 1)Foramen ovale
 - 2) - 2)Foramen rotundum
 - 3) + 3)Foramen magnum
 - 4) - 4)Foramin spinosum
- 3) 3-Which statement about myelogram is true:
 - 1) + 1)Introduction of the contrast is accomplished via puncture of subarachnoid space
 - 2) - 2)The puncture generally located at L3-4 and C4-5
 - 3) - 3)The cervical area is easier and safe than the lumbar area
 - 4) - 4)The patient should not be on bed rest
- 4) 4-All are tarsal bones except :
 - 1) - 1)Talus
 - 2) - 2)Navicular
 - 3) - 3)Cuboid
 - 4) + 4)Trapezium
- 5) 5-The barium used to evaluate the small intestine is called
 - 1) + 1)Barium follow through
 - 2) - 2)double contrast barium enema
 - 3) - 3)single contrast barium enema
 - 4) - 4)barium meal
- 6) 6-Regarding the patella , all are true except
 - 1) - 1)It articulates with the anterior aspect of the distal end of the femur
 - 2) + 2)Its apex directed upward
 - 3) - 3)It's the largest sesamoid bone in the body
 - 4) - 4)Bipartite patella is a normal variant
- 7) 7-Which of the following is false regarding the spinal cord :
 - 1) - 1)Its terminal end is called conus medullaris
 - 2) + 2)Its terminated at the level of L3/4 level
 - 3) - 3)Its surrounded by three layers of meninges
 - 4) - 4)The cuda equine is found below L2
- 8) 8-The name of this examination is,:

- 1) - 1)Percutaneous transhepatic cholangiography

- 2) ☒ 2)Endoscopic retrograde cholangiopancreatography
- 3) ☐ 3)Mylography
- 4) ☐ 4)Intravenous pylography
- 9) 9-All are knee joints Ligaments except :
- 1) ☐ 1)medial collateral ligament
- 2) ☒ 2)posterior collateral ligament
- 3) ☐ 3)anterior cruciate ligament
- 4) ☐ 4)posterior cruciate ligament
- 10) 10-On normal chest x ray,all are true except:
- 1) ☐ 1)The two clavicular heads should be on either side of the trachea and with the spinous processes being in the middle
- 2) ☐ The costocardiac angles (as well as 2)the costophrenic angles) should fairly sharp and well defined
- 3) ☐ 3)The aortic knob should be visualized in the normal chest radiograph around the level of T3 to T4 or just lateral to the carina
- 4) ☒ 4)The right hemidiaphragm normally sits slightly lower than the left
- 11) 11-Which of the following is NOT an articulating surface of the elbow joint?
- 1) ☐ 1)Trochlea
- 2) ☐ 2)Radial head
- 3) ☐ 3)Capitulum
- 4) ☒ 4)Radial tuberosity
- 12) 12-Those arrows in this picture are pointed to

- 1) - 1)Spinous process
 - 2) - 2)Articular facets
 - 3) ☒ 3)Pars interarticularis
 - 4) - 4)Transverse processes
- 13) 13-Fallopian tubes portions that can be seen in the HSG are true except :
- 1) - 1)Interstitial section, which connects through the wall of the uterus to the interior of the uterus
 - 2) - 2)Isthmus, a narrow section that is about one-third of the length of the tube
 - 3) - 3)Ampulla, which is thin-walled like the isthmus and makes up about half the length of the tube
 - 4) ☒ 4)Myometrial wall
- 14) 14-Which of the following bones ,the radius not articulate with?
- 1) - 1)Ulna
 - 2) - 2)Humerus
 - 3) - 3)Scaphoid

- 4) ☒ 4) Pisiform
- 15) 15- Which of the following statements is false regarding radiological Planes and projections :
- 1) - 1,) The axial plane is a horizontal plane perpendicular to the long axis of the body divides the body into superior and inferior part
 - 2) - 2) The sagittal plane: vertical plane perpendicular to the median plane divides the body into right half and left half
 - 3) ☒ 3) Trendelenburg position: the patient is supine with the feet lower than the head
 - 4) - 4) Lateral decubitus: lying on his lateral side
- 16) 16- All are true regarding the imaging of the spine except:
- 1) - 1) The thoracic vertebral bodies appear smaller than the lumbar vertebral bodies
 - 2) - 2) The body of the lumbar vertebra has a kidney shape
 - 3) ☒ 3) The pelvis is connected to the spinal column at the lumbar section
 - 4) - 4) There are 4 articular processes for each lumbar vertebral
- 17) 17- All are true regarding this picture except:

- 1) - 1)AP, or PA Esophagus.
2) - 2)Single-contrast study.
3) ☒ 3)Lower esophageal lumen and gastro-oesophageal junction can be assessed in this picture
4) - 4)Demonstrating esophagus over spine.
- 18) 18-Complete the sentence: The frontal fontanelle represents the junction of the _____ and _____ sutures
1) - 1)Frontal and parietal
2) - 2)Sagittal and lambdoid
3) - 3)Coronal and lambdoid
4) ☒ 4)Coronal and sagittal
- 19) 19-Which structure lies in the sella turcica fossa?
1) - 1)Hypothalamus
2) - 2)Thyroid gland
3) ☒ 3)Pituitary gland
4) - 4)Maxillary nerve
- 20) 20-Which of the following can not be diagnosed by simple radiography for GB pathology:
1) ☒ 1)90% of GB stones
2) - 2)Porcelain GB
3) - 3)Emphysematous GB
4) - 4)Milk of calcium bile
- 21) 21-True statement about basic terms of relations
1) - 1) - Medial is away from the midline
2) - 2) - Contralateral is on the same side of the body
3) - 3) - Ipsilateral is on the opposite side of the body
4) ☒ 4) Non of the above
- 22) 22-All of those muscles are rotator cuff of the shoulder except:
1) - 1) - Supraspinatus
2) - 2) - Infraspinatus
3) ☒ 3) Teres major
4) - 4) - Subscapularis
- 23) 23-At this x ray the bone fracture was noted at

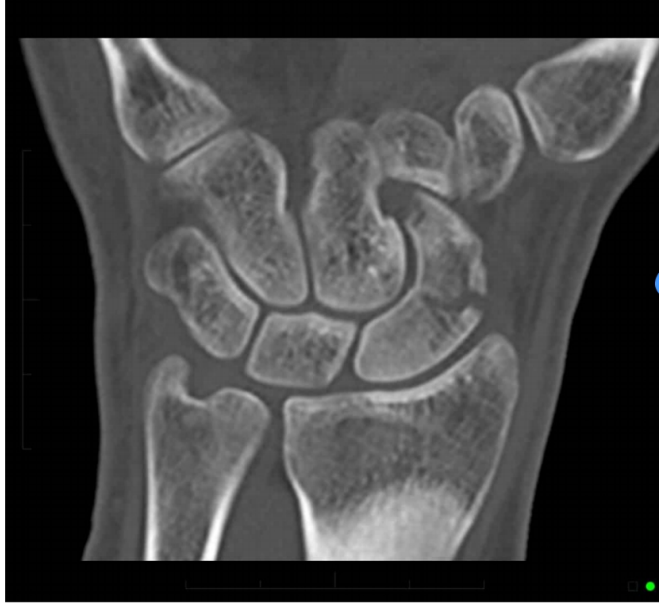

8:19

- 1) - Lunate bone
- 2) - Navicular bone

- 1) - 1) - Lunate bone
2) - 2) - Navicular bone
3) - 3) - Pisiform
4) + 4) Scaphoid bone
24) 24-The name of this ligament colored by red is:

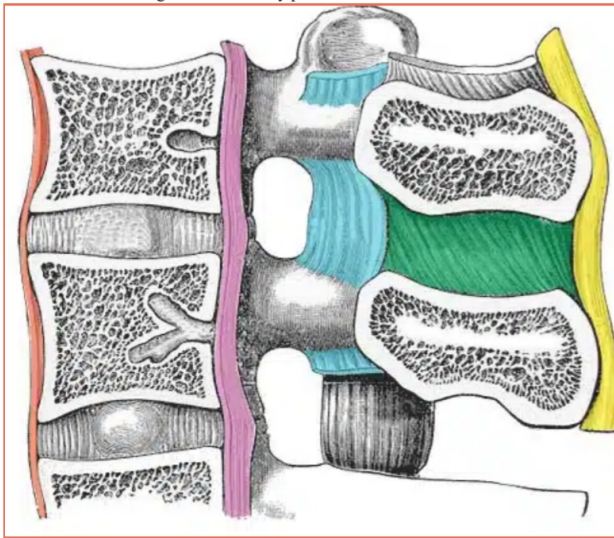

8:24 ٢٨% ٩/٥

> قالب امتحان مادة التشريح

- the spinal cord, arteries and nerves that travel from the brain to the body
- 3) - The 2nd vertebra (C2) is the ring-shaped atlas that connects directly to the skull.
- The atlanto-axial joint is responsible for nodding or "yes" motion of the head.
- 14-All statement is true regarding Sacrum spin except:
- 1) - The sacrum is the section located at the base of the spine.
2) - It does not have discs separating the vertebrae, .
3) - The pelvis is connected to the spinal column at the sacrum section
4) + Non of the above .
- 15) 15-Lumbar vertebrae have the following criteria except:

نسخ لصق إضافة مربع نص الحافظة مشاركة

- 16) 16-The name of this ligament colored by pink is:

- 1) - Ligamenta Flava
2) + Posterior longitudinal ligament
3) - Anterior longitudinal ligament

مركز الاختبارات الالكترونية

- 4) - Supraspinatus ligament
- 17) 17-The name of suture marks the borders between the parietal and occipital bones is:
- 1) - Coronal suture
2) + Lambdoid suture
3) - Sagittal suture
4) - Parieto-occipital suture
- 18) 18-All are foramina of the middle cranial fossa except :
- 1) + Juglar foramina
2) - foramen Vesalii

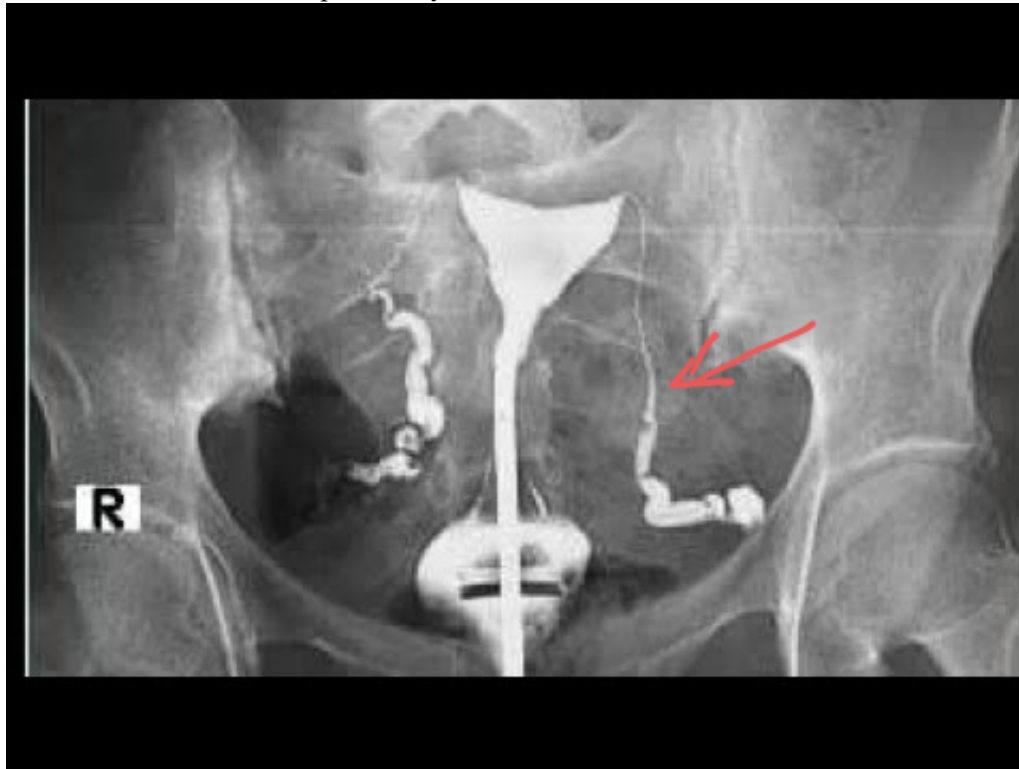

- 1) - 1) - Ligamenta Flava
 - 2) - 2) Posterior longitudinal ligament
 - 3) + 3) - Anterior longitudinal ligament
 - 4) - 4) Supraspinatus ligament
- 25) 25-All of the following are contents of superior mediastinum except:
- 1) - 1) - Thymus
 - 2) - 2) - Trachea,
 - 3) - 3) - Esophagus,
 - 4) + 4) Heart
- 26) 26-The name of this study is,:

- 1) - 1) - Hystrosalpingography
 - 2) + 2) Intravenouspyelography
 - 3) - 3) - Myelogram
 - 4) - 4) - None of the above
- 27) 27-Which statement is wrong regarding kidneys:
- 1) - 1) Kidneys are retroperitoneal organs lying against the posterior abdominal wall at the T12-L2 level.
 - 2) - 2) They have superior and inferior poles, medial and lateral margins.
 - 3) + 3) Kidneys are intraperitoneal organs lying against the posterior abdominal wall at the T12-L2 level.
 - 4) - 4) Blood vessels enter through the kidney hilum.
- 28) 28-All of the following are contraindication of the barium meal except
- 1) - 1) - Suspected cases of gastroduodenal perforation
 - 2) - 2) - History or suspicion of aspiration
 - 3) - 3) - Large bowel obstruction
 - 4) + 4) Upper GI hemorrhage
- 29) 29-Joints of the lower limbs are the following except?
- 1) - 1) - Hip joints
 - 2) + 2) Shoulder joints
 - 3) - 3) - Ankle joints
 - 4) - 4) - knee joints
- 30) 30-Normal anatomical esophageal structure are the following except?
- 1) - 1) - The oesophagus shares a similar structure with many of the organs in the alimentary tract
 - 2) + 2) Adventitia is the inner layer
 - 3) - 3) - Muscle layer – external layer of longitudinal muscle and inner layer of circular muscle

- 4) - 4) - Submucosa and mucosa
- 31) 31-Chest x ray projections are the following.:
- 1) - 1)Posteroanterior
 - 2) - 2)Anteroposterior
 - 3) - 3)Lateral
 - 4) + 4)All of the above
- 32) 32-True statement regarding GB ultrasound are the following except:
- 1) - 1)Fasting is required ,minimum about 6hrs
 - 2) - 2)Investigation was done for the jaundiced patients
 - 3) - 3)Ultrasound is the only Investigation necessary in detection of the gall bladder stones
 - 4) + 4)Non of the above
- 33) 33-This structure which is pointed by red arrow is:

- 1) - 1)Uterine cavity
 - 2) - 2)Cervix
 - 3) + 3)Fallopian tube
 - 4) - 4)Ovary
- 34) 34-Which statement is true regarding Positions:
- 1) - 1)Erect: either standing or sitting
 - 2) - 2)Supine: lying on back
 - 3) - 3)Prone: lying face-down
 - 4) + 4)All of the above
- 35) 35) This picture is :

- 1) - 1)CT Cervical spin
- 2) - 2)MRI cervical spin
- 3) + 3)MRI Dorsal spin
- 4) - 4)CT lumbar spin
