- 1) What is the therapeutic effect of a medication?
 - 1) Predictable and often unavoidable secondary effects
 - 2) Unintended and undesirable severe responses
 - 3) + Expected or predicted physiological response
 - 4) Allergic reaction after ingestion
- 2) Which therapeutic action of drugs relieves the symptoms of a disease but does not affect the disease itself?
 - 1) + Palliative
 - 2) Curative
 - 3) Supportive
 - 4) Substitutive
- Which of the following type of order calcium gluconate twice daily \times 2 days
 - 1) A stat order
 - 2) + The standing order.
 - 3) one-time order.
 - 4) As-needed order
- 4) All of them are factors affecting respiration except
 - 1) + Hormones
 - 2) Medication
 - 3) Stress
 - 4) Physical activity
- 5) Which type of medication order indicates that the medication is to be given immediately and only once?
 - 1) Standing order
 - 2) Single order
 - 3) Prn order
 - 4) + Stat order
- 6) Which site is commonly used to measure blood pressure?
 - 1) Radial artery
 - 2) Femoral artery
 - 3) + Brachial artery
 - 4) Carotid artery
- 7) Oxygen delivery systems are traditionally divided into high-flow and medium-flow systems
 - 1) TRUE.
 - 2) + FALSE.
- 8) All of them are Disadvantages Sublingual administration except
 - 1) Cannot be given to unconscious patient.
 - 2) Large quantities cannot be given.
 - 3) + Quick termination of undesirable drug effects
 - 4) Cannot be given in severe vomiting
- 9) Orthostatic hypotension is a blood pressure that decreases when the client sits or stands
 - 1) + TRUE.
 - 2) FALSE.
- 10) A temperature significantly below normal is called......
 - 1) Pyrexia
 - 2) + Hypothermia
 - 3) Hyperthermia

- 4) Non all above
- 11) The dorsalis pedis pulse is used to determine circulation to the foot
 - 1) + TRUE.
 - 2) FALSE.
- 12)is to refer to the movement of air in and out of the lungs
 - 1) Inhalation
 - 2) + Ventilation
 - 3) Dyspnea
 - 4) Non all above
- 13) The difference between the diastolic and the systolic pressures is called the pulse pressure
 - 1) + TRUE.
 - 2) FALSE.
- 14) Which of the following are characteristics of the respiration
 - 1) Rate
 - 2) Rhythm
 - 3) Depth
 - 4) + All the above
- 15) Absorption at lectasis is caused by high FiO2
 - 1) + TRUE.
 - 2) FALSE.
- 16) Which of the following are causes of medication errors
 - 1) Limit verbal orders; follow all procedures
 - 2) Similar drug names and the increasing number of new drugs
 - 3) Giving the wrong medication or giving at the wrong time
 - 4) + All the above
- 17) Vital Signs are signs that reflect changes in the functions of the body
 - 1) + TRUE.
 - 2) FALSE.
- 18) Which of the following are pulse rate categories
 - 1) Pulse rhythm
 - 2) Elasticity of arterial wall
 - 3) Pulse volume
 - 4) + All the above
- 19) Abnormally slow respirations are referred to as Apnea
 - 1) TRUE.
 - 2) + FALSE.
- 20) is a chemical or biological substance that administration for human or animals to make change body function
 - 1) A medication error
 - 2) An injection
 - 3) + A medication
 - 4) Syringes
- 21) Which of the following are purposes of injection
 - 1) Preventive
 - 2) Medical
 - 3) Diagnostic
 - 4) + All of above
- 22) Bradycardia is heart rate slowed below 60/min.
 - 1) + TRUE.

5 / 2 الصفحة

- 2) FALSE.
- 23) refers to a persistent systolic pressure greater than 140 mm Hg and a diastolic pressure greater than 90 mm Hg
 - 1) Hypotension
 - 2) + Hypertension
 - 3) Pulse pressure
 - 4) Mean arterial pressure
- 24) What is the recommended humidification for oxygen therapy?
 - 1) + Recommended if more than 4 liters/min is delivered
 - 2) Recommended if less than 4 liters/min is delivered
 - 3) Not recommended for any oxygen therapy
 - 4) Recommended for all oxygen therapy
- 25) Drugs after absorption are metabolized in liver before reaching the systemic circulation; this is called
 - 1) Idiosyncratic reaction
 - 2) Therapeutic effect
 - 3) + First Pass Effect
 - 4) Non all above
- 26) Position changes is factor affecting on pulse and temperature
 - 1) TRUE.
 - 2) + FALSE.
- 27) All of them are disadvantages intramuscular injection except
 - 1) Danger of infection if proper sterilization techniques are not used
 - 2) Small quantities up to 10 ml of the drug can be given at a time
 - 3) + Less safe, once the side effects produced, they are difficult to control
 - 4) A technical person is needed, self-administration is difficult
- Which surgical procedure involves creating an opening into the stomach for administering foods and fluids via a feeding tube?
 - 1) + Gastrostomy
 - 2) Nasogastric intubation
 - 3) Orogastric intubation
 - 4) Naso-intestinal tube insertion
- 29) Which of the following are disadvantages of Oral administration medication
 - 1) Not used in unconscious and uncooperative patients
 - 2) Some drugs have slow absorption
 - 3) Onset of drug action is slow
 - 4) + All of above
- 30) Gavage feeding is an indication for gastric tube placement
 - 1) + TRUE.
 - 2) FALSE.
- 31) Which of the following are purposes of drug administration
 - 1) Control of undesirable disease symptoms.
 - 2) Replacement of substances missing in the body.
 - 3) Strengthening the body function
 - 4) + All of above
- 32) How should multi-dose vials be handled?
 - 1) With bare hands
 - 2) + With aseptic technique
 - 3) Without checking the expiration date

- 4) Without labeling the syringe
- 33) Which of the following are disadvantages Intravascular injection
 - 1) Chances of thrombophlebitis.
 - 2) Repeated I/V administration require patent veins sometimes that may not be possible.
 - 3) Less safe, once the side effects produced, they are difficult to control
 - 4) + All of above
- 34) Low-flow oxygen delivery systems are recommended for patients with a tidal volume less than 300 ml.
 - 1) TRUE.
 - 2) + FALSE.
- 35) Extra doses of medication are not considered medication errors.
 - 1) TRUE.
 - 2) + FALSE.
- 36) Medication is injected in the layer of skin directly below the epidermis and dermis
 - 1) Intramuscular injection
 - 2) Intradermal injection
 - 3) + Subcutaneous injection
 - 4) Non all above
- What is one advantage of sublingual administration?
 - 1) + Avoidance of first-pass effect
 - 2) Large quantities can be given
 - 3) Suitable for unconscious patients
 - 4) Minimal drug absorption
- 38) The systolic pressure is the pressure when the ventricles are at rest
 - 1) TRUE.
 - 2) + FALSE.
- Which of the following is described as relieves the symptoms of a disease but does not affect the disease itself.
 - 1) + Palliative
 - 2) Substitutive
 - 3) Supportive
 - 4) Curative
- 40) Intramuscular injection avoids the first-pass effect.
 - 1) + TRUE.
 - 2) FALSE.
- 41) Dyspnea is the term for difficult or painful of breathing.
 - 1) + TRUE.
 - 2) FALSE.
- 42) Which of the following are purposes of Rectal administration
 - 1) To produce local sedative in the treatment of hemorrhoids or rectal abscess.
 - 2) To produce general sedative effects when medications cannot be taken by mouth.
 - 3) To check rectal bleeding
 - 4) + All of above
- 43) Hypotension does not impact urinary elimination
 - 1) TRUE.
 - 2) + FALSE.
- Shallow breathing is a large volume of air inhaled & exhaled, inflates most of the lungs
 - 1) TRUE.
 - 2) + FALSE.
- 45) Which injection route is commonly used for administering insulin?

- 1) Intramuscular (IM)
- 2) Intravascular (IV)
- 3) + Subcutaneous (SC)
- 4) Intradermal (ID)
- 46) Which of the following are methods of assessment of pulse
 - 1) + Peripheral, Apical pulse
 - 2) Femoral, Brachial pulse
 - 3) Peripheral, Apical, Femoral, Brachial pulse
 - 4) All of above
- Which condition is characterized by a critical increase in body temperature resulting from exposure to high environmental temperatures?
 - 1) Heat exhaustion
 - 2) + Heat stroke
 - 3) Hyperpyrexia
 - 4) Fever
- 48) How does increased body temperature affect heart rate?
 - + Increases heart rate
 - 2) Decreases heart rate
 - 3) Has no effect on heart rate
 - 4) Causes an irregular heart rate
- 49) Which of the following is type of injection that injected in upper arm, at deltoid area for BCG vaccination
 - 1) Intramuscular injection
 - 2) + Intradermal injection
 - 3) Subcutaneous injection
 - 4) Non all above
- All of them are factors affecting respiration except:
 - 1) Physical activity
 - 2) Medications
 - 3) Age
 - 4) + sex
